The Secretary of Transportation may hereafter issue notes or other obligations to the Secretary of the Treasury, in such forms and denominations, bearing such maturities, and subject to such terms and conditions as the Secretary of the Treasury may prescribe. Such obligations may be issued to pay any necessary expenses required pursuant to any guarantee issued under the Act of September 7, 1957, Public Law 85-307, as amended (49 U.S.C. 1324 note). The aggregate amount of such obligations during fiscal year [1986] *1987* shall not exceed [$75,000,000] *$125,000,000*. Such obligations shall be redeemed by the Secretary from appropriations authorized by this section. The Secretary of the Treasury shall purchase any such obligations, and for such purpose he may use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as now or hereafter in force. The purposes for which securities may be issued under such Act are extended to include any purchase of notes or other obligations issued under the subsection. The Secretary of the Treasury may sell any such obligations at such times and price and upon such terms and conditions as he shall determine in his discretion. All purchases, redemptions, and sales of such obligations by such Secretary shall be treated as public debt transactions of the United States. *(Department of Transportation and Related Agencies Appropriations Act, 1986, as included in Public Law 99-190.)*

The fund currently provides direct support for the aviation insurance program authorized under title XIII of the Federal Aviation Act.

Income to the fund is derived from premium deposits for premium insurance coverage issued, income from authorized investments, and binder fees for nonpremium coverage issued. The binders provide aviation insurance coverage for U.S. air carrier aircraft used in connection with certain Government contract operations entered into by the Department of Defense (DOD) and Department of State (DOS). There exist indemnity agreements under which the DOD and DOS agree to reimburse the Department of Transportation for all payments on account of losses to air carriers sustaining damage to their aircraft by an insured peril with respect to the aircraft operating under contract to DOD and DOS.

Administrative costs are paid from the Aviation Insurance Revolving Fund, into which are credited receipts from premiums, salvage, and interest on assets of the fund (49 U.S.C. 1536).

The Tax Equity and Fiscal Responsibility Act of 1982 (26 U.S.C. 9502) provides for the revenues received in the Treasury from the 8 percent passenger ticket tax and certain other taxes paid by airport and airway users to be transferred from the general fund of the Treasury to the Airport and Airway trust fund. The Secretary of the Treasury estimates the amount to be so transferred. In turn, appropriations are authorized from this fund to meet obligations for airport planning and development and noise compatibility planning and programs; facilities and equipment; research, engineering and development; and a portion of operations.

The status of the fund is as follows (in thousands of dollars):

Primarily because of penalty provisions built into the 1982 Act, actual appropriations from the Trust Fund for FAA's cost of operating the airport and airway system has been substantially lower than amount contemplated in the Act and have resulted in overall user share of system cost well below the 85 percent share appropriately allocated to non-Federal users.

Legislation is proposed to be effective in 1987, to amend the provisions governing Trust Fund share of FAA operating cost to provide for a flat 75 percent recovery rate, to eliminate the penalties, and to suspend investment of the fund in interest bearing securities.

Under this appropriation, the Federal airway system is improved by the installation of new equipment and the construction and modernization of facilities to keep pace with aeronautical activity. The appropriation also finances major capital investments required by other agency programs, such as aircraft for flight inspection of facilities, and related training, and experimental facilities for the engineering and development program. The operating costs of facilities procured under this appropriation are financed under the Operations appropriation.

The funding requested for 1987 is in accordance with the Federal Aviation Administration's comprehensive plan for modernizing and improving air traffic control and airway facilities services.

Budget activities include:

Air route traffic control centers.—Long-range radar, communications and automation equipment provide air traffic controllers information on aircraft positions and weather at distances up to 185 miles.

Airport traffic control towers.—Terminal area radar, doppler weather radar, communications and automation equipment aid air traffic controllers in handling air traffic at distances up to 60 miles.

Flight service facilities.—Flight service stations and associated facilities provide flight assistance to pilots, particularly general aviation pilots.

Air navigation facilities.—Very high, medium and low frequency facilities are used to define airways and air routes and provide distance, direction and weather

Facilities and Equipment (Airport and Airway Trust Fund)—Continued

information to pilots. Precision landing systems, distance measuring equipment and visual lighting aids assist pilots in making final approaches to airport runways.

Housing, utilities, and miscellaneous facilities.—This activity includes general facility support requirements which apply to a wide range of FAA installations.

Aircraft and related equipment.—This activity includes the procurement, modification and/or replacement of aircraft and equipment both to inspect the accuracy and other characteristics of navigation and traffic control aids from the air and to conduct research and development activities.

Development, test and evaluation facilities.—This activity provides for leasing and improvements of the plant and facilities at the Federal Aviation Administration Technical Center in Atlantic City, NJ.

The FAA conducts engineering and development programs to improve the national air traffic control system and to increase its safety, productivity and capacity to meet the expected air traffic demands of the future. The agency also administers aviation medical research aimed at increasing the personal effectiveness of air traffic controllers and the safety of aircrewmembers.

These programs are conducted by the agency's technical personnel, and through contracts with qualified private firms, universities, individuals and other Government agencies.

Air traffic control.—Existing technology is applied to air traffic control problems to keep the current system operating safely and system improvements are made to increase the productivity and capacity of the current system. These improvements include the development and implementation of a collision avoidance capability which operates independently of the ATC system and development of a communications switching system for improved voice communications between controllers within an ATC facility, between controllers at adjacent facilities, and between controllers and pilots over air-ground radio outlets.

This program also includes activities designed to insure that the air traffic control system will satisfy the demands of the 1990's, particularly those affecting the interface between pilots and traffic controllers. This work includes developing new traffic control concepts; assessing their technical, economic, and operational feasibility and conducting selected feasibility demonstrations.

Advanced computer.—This activity modernizes the air traffic control system by providing for an advanced automation system to accommodate the demand for air traffic services forecasted for the post-1990's. Program efforts include design, development, and testing of a host computer and advanced automation system.

Navigation.—This activity provides for modernization, expansion, and improvement of the common navigation system facilities. The requested funds will support research and development activities for enroute navigation to assess and develop standards for candidate navigation systems for use in the post-1995 period.

Aviation weather.—This activity provides for a program, coordinated with the Departments of Defense and Commerce, to modernize the acquisition, processing, dissemination, and display of weather information tailored to the needs of aviation users. Development of weather radars and weather processors, and research into hazardous weather phenomena in terminal areas will be emphasized.

Aviation medicine.—Aeromedical research is directed toward identifying and eliminating those physiological and psychological factors harmful to personnel engaged in operating the traffic control system or which may jeopardize flight safety.

Aircraft safety.—This activity covers the research work in support of developing improved regulations to promote flight safety of civil aircraft. Development of systems and devices to prevent and deter sabotage in the civil air transportation system will also continue. Funds requested will continue research in fire safety, including cabin fires, and will continue research in air transport, general aviation, and flight safety.

Environment.—Principal efforts under this activity are the development of data to support rulemaking and to minimize the undesired environmental effects on the public attributable to the air transportation system. Research will continue into air pollution and noise control, primarily associated with certification and enforcement requirements.

The Airport and Airway Improvement Act of 1982 authorizes use of the Airport and Airway trust fund as the source of financing a portion of FAA's operating costs. Cost allocation studies by the FAA show that, overall, 85 percent of the cost of the FAA's programs is attributable to the users contributing to the trust fund. In 1987, it is proposed accordingly that 75 percent of the Operations appropriation be financed from the trust fund to provide an overall 85 percent recovery. Appropriate legislation is proposed to effect this level of financing.

Funds for operating expenses represent more than two-thirds of the total Coast Guard program level. To carry out its unique duties as a peacetime operating agency and one of the military services, the Coast Guard employs multipurpose vessels, aircraft and shore units, strategically located along the coasts and inland waterways of the United States and in selected areas overseas. In 1987, search and rescue and enforcement of laws and treaties still account for the major portion of the budget. Amounts requested for the activities described below reflect the continued introduction into the operating forces of new equipment and capital facilities, including new medium endurance cutters, patrol vessels, and specialized law enforcement platforms. Although program increases are included for these new resources, they are partially offset by savings achieved through a reduction in older existing platforms. Additional savings will be achieved through continued management improvements, including productivity increases, improved efficiency of operations, and continued contracting out of support activities. The modest growth in the budget reflects built-in changes required by military pay raises, cost-of-living adjustments, and a return to the Coast Guard's budget base of the fixed costs associated with polar icebreaking operations.

Search and rescue.—The Coast Guard maintains a nationwide system of boats, aircraft, cutters, and rescue coordination centers on 24-hour alert capable of responding to notice of a distress incident.

Aids to navigation.—A network of manned and unmanned aids to navigation is maintained along our coasts and on inland waterways to insure the safe passage of the mariner. Eight OMEGA stations, which are operated and funded to various levels by the seven host partner nations, provide navigational coverage to military and civilian ships and aircraft nearly worldwide. Loran C stations are operated in the United States and abroad to serve the needs of the armed services and marine and air commerce. Radiobeacons operated in the United States provide mariners with an all-weather, low user cost navigational system along our coasts and in the Great Lakes. Administrative control is exercised over the construction, maintenance, and operation of bridges across navigable waters of the United States.

Marine safety.—The Coast Guard reviews plans and specifications for the construction or alteration of merchant vessels; conducts periodic inspections; investigates casualties; and sets standards, procedures, and practices under which merchant marine personnel are licensed and regulated. The Coast Guard operates a boat safety standards program and provides boater information and support of the Coast Guard Auxiliary and the individual State boating safety programs.

Marine environmental protection.—Under various laws, international agreements, and conventions, the Coast Guard is charged with the prevention of damage to the marine environment, response to pollution incidents, and the enhancement of environmental quality. Also, under statutory requirements the Coast Guard must safeguard and secure U.S. ports and waterways.

WORKLOAD DATA

Harbor patrols (operating hours)	57,378	44,000	44,000

Enforcement of laws and treaties.—Maritime enforcement of laws and treaties is accomplished by cutters and aircraft conducting patrols to enforce international agreements and Federal laws on the high seas and waters over which the U.S. exercises jurisdiction. Fisheries enforcement involves living marine resources, while general law enforcement concerns drug smuggling, illegal immigration, hijacking/theft of vessels and other unlawful activities. In 1987 the drug law enforcement program will continue to receive major emphasis.

Ice operations.—Polar ice operations are performed by icebreakers in support of programs of the Coast Guard and other agencies. In 1987 funding of the fixed costs of operating polar icebreakers is proposed to be transferred to the Coast Guard from the Navy and the National Science Foundation. Domestic ice operations are performed on the navigable waters of the United States. Also included are certain marine science activities.

Defense readiness.—The Coast Guard operates as a service in the Navy in time of war or national emergency at the direction of the President. During peacetime, an effective state of military preparedness is maintained through individual and unit training, by joint naval training exercises, and by Coast Guard single and multiship operations.

Headquarters administration.—Headquarters administration provides funding for administrative services at the headquarters location of the Coast Guard, including executive direction; budget, planning and policy; command, control, communication, and operations; financial management; legal; engineering; civil rights; and personnel and health services for the Coast Guard.

Capehart family housing indebtedness.—The following schedule shows the status of the indebtedness assumed from the Department of Defense for transfer of family housing units for assignment as public quarters. The payment for 1985 completed the indebtedness repayment and concluded the debt reduction program.

This appropriation provides for the major acquisition, construction, and improvement of vessels, aircraft, shore units, and aids to navigation, excluding minor acquisitions, additions, renewals, and replacements funded in the Operating Expenses appropriation where estimated costs of a program are $150 thousand or less, or where renewals and replacements involve less than 75 percent of the original facility. Most of the facilities financed by this appropriation are multi-mission in nature and are required by the Coast Guard in the performance of its operational and regulatory missions.

The budget request of $77,100,000, together with $190,000,000 appropriated to the Navy in 1986 for Coastal Defense Augmentation, will provide for Coast Guard requirements for vessels, aircraft, equipment, and shore facilities. The planned use of this combination of resources includes:

Vessels.—By the end of 1987, ten of the thirteen 270-foot Medium Endurance Class cutters (WMEC) will be operational or delivered. Construction will be well underway on the ninth vessel of the nine cutter 140-foot Icebreaking Tug (WTGB) program. In addition, construction and delivery of sixteen (16) new 110-foot Patrol Boats (WPB) will be completed. During Fiscal Year 1987, a multi-year program will be initiated to replace the Coast Guard's "CAPE" class and "POINT" class patrol boats; construction of a prototype vessel will begin. Major accomplishments will also be realized in the area of vessel renovation and modernization. By the end of 1987, the first seven of twelve 378-foot High Endurance Cutters (WHEC) and six of sixteen 210-foot Medium Endurance Cutters (WMEC) will have entered shipyards for major renovations. Cumulatively these accomplishments will enhance critical multi-mission capabilities of the Coast Guard's major vessel capital assets and improve the fleet's readiness and maintenance posture.

Aircraft.—The twelve HC-130 Long Range Surveillance fixed-wing aircraft funded in 1984 and 1985 will be delivered, bringing the C-130 fleet to twenty-six. Considerable progress will be made in acquiring aircraft sensors to enhance search and rescue and law enforcement missions. Twenty-three of thirty-six HC-130 Search Radars will be ordered and one Airborne Surveillance Systems (AIREYE) will be in operational use on HH-25A Medium Range Search aircraft. Seventy-eight of ninety-six HH-65A Short Range Recovery (SRR) helicopters will be delivered by the end of 1987. The HH-65A SRR helicopter promises enhanced mission performance for the Coast Guard helicopter fleet. These improvements will include faster response time, safer operations, and more capable detection systems.

Shore facilities.—Recent shore facility projects have emphasized both new construction and renovations, improvements, or replacements of existing facilities. Although considerable maintenance requirements remain, significant progress has been made in upgrading the Coast Guard's major shore facilities at Miami, FL; Kodiak, AK; and Petaluma, CA. Upgrades at Alameda, CA; Portsmouth, VA; Boston, MA; New Bedford, MA; and Long Beach, CA will insure adequate support of new and renovated WHECs and WMECs. Projects have also been initiated to provide advanced electronic data processing and communications to Coast Guard commands, to enhance productivity and management decisions.

This appropriation provides the Government's share of the costs for altering or removing bridges determined to be obstructions to navigation. Generally, bridges to be altered were built with what are now insufficient vertical and/or horizontal clearances for free navigation on navigable waters of the United States. No funds are requested in 1987.

The Coast Guard Reserve Forces provide qualified individuals and trained units for active duty in event of war, national emergency or domestic disaster. These forces keep ready through realistic, coordinated training in wartime skills, formal training in military skills, and performing peace time duties with the Regular Forces during normal and emergency operations. The 1987 program will be expanded to provide a Ready Reserve of 19,000 including a Selected Reserve of 13,000.

Initial training—Direct costs of initial training for non-prior service recruits are programmed under this activity.

Continuing training—Direct costs of officer and enlisted drills and annual active duty for training are programmed under this activity.

Operation and maintenance of training facilities—Reserve training facilities for operation and maintenance are programmed under this activity.

Administration—All administrative costs for the Reserve Forces program are programmed under this category.

Miscellaneous services for other accounts—Coast Guard mobilization-related activities for the Selected Service System are reimbursed under this activity.

The Coast Guard's Research and Development program seeks to maintain the technological base in areas crucial to the successful execution of the Coast Guard's operational and regulatory missions. The R&D program includes the development of techniques, methods, hardware, and systems which directly contribute to increasing the productivity and effectiveness of operating forces. Tests and evaluations are carried out in conjunction with research and development. The 1987 request will provide for: development of improved search and rescue capability; support for replacement of patrol boat (WPB) and buoy tender (WLB/WLM) capabilities; development of improved aid to navigation performance techniques; development of improved commercial vessel safety and recreational boating safety knowledge bases to support establishment, modification, or discontinuance of various regulations and standards; development of systems and procedures for control and cleanup of pollutant spills; development of techniques to support law enforcement efforts; and research, development, test, and evaluation in multi-mission project areas.

This fund insures immediate cleanup of oil or other hazardous polluting substances spilled into the navigable waters of the United States, adjoining shorelines or waters of the contiguous zone. The fund is used when a spill occurs and the responsible owners or operators of a vessel, onshore facility, or offshore facility do not accomplish immediate cleanup with their own resources. Expenditures from the fund are later reimbursed by the responsible owners or operators.

MARITIME ADMINISTRATION

The programs administered by the Maritime Administration (MarAd) are authorized by the Merchant Marine Act, 1936, and other related acts. The Agency promotes the development and maintenance of an American merchant marine for commercial and defense needs; grants subsidy aid for operation of vessels by American flag operators; conducts maritime research and development; insures construction loans and mortgages for construction or conversion of vessels; maintains in a standby condition Government-owned fleets; and trains cadets to become licensed merchant ship officers.

The following table shows the funding for the MarAd programs, including proposed supplementals, for which detail is furnished in the budget schedules:

The Merchant Marine Act of 1936, as amended, provides that operating subsidies shall be paid to qualified operators of U.S.-flag vessels in order to promote the maintenance of a U.S. Merchant Marine capable of providing essential ocean-shipping services. A strong U.S. Merchant Marine is important to national security and to the development of foreign commerce. Subsidies are designed to achieve a parity between certain U.S. and foreign ship operating costs. The 1987 request provides funds for existing operating-differential subsidy contracts. No new contracts are included. The administration will continue to seek elimination of the "double subsidy" associated with the carriage of military and premium rated cargo. Estimates will be adjusted upon enactment of required legislation.

None of the funds provided in this Act or any other Act shall be available to the Secretary of Transportation to issue any obligations to the Secretary of Treasury pursuant to Sections 901b, and 901d, Merchant Marine Act, 1936, as amended by Public Law 99–198.

Public Law 99–198 amends section 901 of the Merchant Marine Act to increase from 50 to 75 percent the amount of agricultural commodities under specified programs that must be carried on U.S.-flag vessels. The increased cost associated with this expanded U.S.-flag shipping requirement, which stems from the higher rates charged by U.S.-flag carriers compared with foreign-flag carriers, must be financed by the Secretary of Transportation through borrowings from the Treasury.

Administration policy has consistently opposed expanded requirements to ship commodities on U.S.-flag carriers. Therefore, the budget proposes language for

1986 and 1987 that prohibits the Secretary of Transportation from issuing obligations to finance the increased costs pursuant to Public Law 99-198. Separately, the Administration is proposing authorization legislation to repeal the expanded cargo preference requirement added to the Merchant Marine Act by Public Law 99-198. If Congress does not act on the administration's proposals, the Secretary of Transportation will be required to borrow an estimated $48 million in 1986 and $120 million in 1987.

The budget proposes 1987 as the final year of funding for maritime research and development activities, which the administration views as a private sector funding responsibility. In that regard, 1987 activities will emphasize movement toward greater private sector initiative in maritime research and development and efforts to "privatize" the Computer Aided Operations Research Facility.

The specific activities funded by the operations and training appropriation are as follows:

Maritime education and training—

Merchant Marine Academy.—This activity provides for operating the Merchant Marine Academy at Kings Point, NY. The objective of the Academy is to instruct and prepare selected personnel for service as officers in the merchant marine. Approximately 200 officers will graduate in 1987.

State marine schools.—Due to projections of a continuing oversupply of merchant marine officers, Federal support for this program will be limited in 1987 and subsequent years to providing student incentive payments to cadets currently receiving such payments. An estimated 650 merchant marine officers will graduate from the State marine schools in 1987.

Additional training.—This activity provides for costs of administration of the Merchant Marine Academy and State marine school programs at the bureau level, and for the conduct of supplementary training courses required for merchant marine personnel.

National security support capability.—This activity provides for maintaining U.S. merchant ships in the National Defense Reserve Fleet for service as naval and military transport auxiliaries in time of war and national emergency and for emergency preparedness activities. Additional funds are provided in 1987 for initiation of a multi-year program for capital investment needs including dredging, facility alterations and maintenance, and replacement of support craft.

Operating programs—

Development of waterborne transportation systems.—This activity provides for direct technical and administrative costs of programs for development and construction of cost-competitive U.S. merchant ships in sufficient quantity to meet national maritime objectives.

Use of waterborne transportation systems.—This activity provides for the direct technical and administrative costs of promoting the effective development and use of merchant ships and ship systems. Program objectives involve increasing U.S.-flag participation in U.S. foreign trade and reducing or eliminating operating subsidies when no longer required to sustain a viable shipping operation.

General administration.—This activity provides for overall executive direction and general administrative functions of the Maritime Administration.

[1] The 1986 guaranteed loan level is subject to sequestration pursuant to Public Law 99-177. The post-sequestration loan level constitutes a de facto limitation.

The Merchant Marine Act of 1936, as amended, established the Federal ship financing fund to assist in the development of the U.S. merchant marine by guaranteeing construction loans and mortgages on U.S.-flag vessels built in the United States.

The budget proposes that 1986 will be the last year in which new loan guarantee commitments are made. The necessary implementing legislation will be proposed.

The Maritime Administration is authorized to reactivate, operate, deactivate, and charter merchant vessels. These operations are financed by the Vessel operations revolving fund. In addition, the fund is available to finance the necessary expenses to protect, maintain, preserve, acquire, and use vessels involved in mortgage foreclosure or forfeiture proceedings instituted by the United States; and to process advances received from Federal agencies.

Budget program.—The 1987 program anticipates an increased level of maintenance and upgrading of the Ready Reserve Fleet and activation and operation of ships as directed by the Navy.

Financing.—Expenses are principally financed by reimbursements from Federal agencies.

The Maritime Administration is authorized to insure against loss or damage from marine war risks until commercial insurance can be obtained on reasonable terms and conditions. This insurance includes war risk hull and disbursements interim insurance, war risk protection and indemnity interim insurance, second seamen's war risk interim insurance, and war risk cargo insurance standby program. Authority to underwrite insurance was extended to June 30, 1990, under Public Law 99-59.

Budget program.—It is estimated that during 1987 insurance coverage will be provided for approximately 448 U.S.-flag ships and 55 foreign-flag ships owned by U.S. citizens. The program also includes provision for second seamen's war risk insurance covering the crews of 10 vessels under contract with the Military Sealift Command.

Financing.—The War risk insurance revolving fund was established under 46 U.S.C. 1288. It receives income from binder fees, insurance premiums, interest from investments and claim reimbursements from other Federal agencies. Underwriting agents' fees and expenses, appraisal contractors' fees, and insurance claims are paid from this income.

The Saint Lawrence Seaway Development Corporation is a wholly owned Government Corporation responsible for the operation, maintenance and development of the United States portion of the St. Lawrence Seaway between Montreal and Lake Erie. Major priorities are to control Seaway Corporation costs and to encourage increased use of the Seaway system. The Seaway Corporation is focusing on ways to promote and market the Seaway system. The Corporation's 1987 budget reflects the activities to accomplish these objectives as follows:

Administrative expenses (limitation).—This program provides for management and administration of the Corporation.

Operations.—The program provides for operation of all facilities and for planning, engineering and development activities. Operations are conducted on a 24-hour day, 7-day week with maintenance functions being performed throughout the year.

Replacements and improvements.—This program provides for necessary replacement of aging equipment, machinery, and tools in addition to continuing improvements toward a safer and more economical system.

On the basis of current traffic projections and no increase in toll levels, the Corporation estimates its revenues for 1987 to reach $10.6 million, which it proposes to apply as follows: (1) $10.5 million for operations consisting of $2.0 million for administrative expenses and $8.5 million for operations, maintenance and development, and (2) $0.1 million together with $1.4 million in reserve funds for replacements and improvements. There are no new programs budgeted for 1987.

The Research and Special Programs Administration serves as a research, analytical, and technical development arm of the Department for multimodal research and development, as well as special programs. Particular emphasis is given to pipeline safety and transportation of hazardous cargo by all modes of transportation. Responsibilities of the Administration are carried out under the following activities:

Operations.—Provides for salaries and expenses and for central supervisory and management functions, including a management information system necessary for overall planning and direction. Provides for management and execution of transportation programs involving aviation data management, national emergency plans/preparedness, and management of the Transportation Safety Institute. Provides for hazardous materials and pipeline safety regulatory and enforcement programs.

Research and development.—Provides for research to support the hazardous materials and pipeline safety regulatory programs, and to complement research programs of other operating administrations.

Grants.—Provides for grants-in-aid to State agencies that conduct a pipeline safety program.

The Working Capital Fund finances multidisciplinary research, evaluation, and analysis activities undertaken at the Transportation Systems Center (TSC) in Cambridge, MA. The fund is financed through negotiated agreements with the Office of the Secretary, Departmental operating administrations, and other governmental elements requiring the Center's capabilities. These agreements also define the activities undertaken at TSC. As part of an administration initiative to shift Federal activities to the private sector, it is proposed that activities of the TSC be carried out by contract with a non-Federal entity after April 1, 1987.

General administration.—This appropriation finances the costs of policy development and central supervisory and coordinating functions necessary for the overall planning and direction of the Department. It covers the immediate secretarial offices as well as those of the assistant secretaries (including staff formerly financed under Transportation Planning, Research and Development) and the general counsel. Also covered are staff assistance and supervision of general management and administration in the Department and execution of functions carried out by the Civil Aeronautics Board prior to January 1, 1985. In addition, the Office of the Secretary provides services on a reimbursable basis for technical assistance to transportation projects, and participation in intergovernmental planning groups. The 1987 budget proposes reductions associated with the termination of the Essential Air Service programs and various administrative reductions.

The Minority Business Resource Center.—This activity provides contractural support for the Center, which now operates in the Office of the Secretary to assist minority business firms, entrepreneurs, and venture groups in securing contracts and subcontracts arising out of projects that involve Federal funding.

Research and Development.—It is proposed that contract support for this activity be financed under this appropriation in 1987. It finances those research activities and studies concerned with planning, analysis, and information development needed to support the Secretary's responsibilities in the formulation of national transportation policies. Included are research, special programs, and university research and internships.

The working capital fund finances common administrative services that are centrally performed in the interest of economy and efficiency in the Department. Services rendered are charged at rates that return in full all operating expenses, including a normal reserve for accrued annual leave and depreciation of equipment. The fund is reimbursed by the operating administrations and offices being served.

The activities of the working capital fund have been consolidated as follows:

Publishing and graphics activities include publishing and graphic programs; still photographic services; and visuals services.

Support services activities include imprest fund; central employment information; warehouse management; parking management; chauffeur services; mail and messenger service; management information center; facilities and space management; and security service.

Library services include information retrieval.

Transportation computer activities include computer time-sharing services and the transportation computer center.

TITLE III—GENERAL PROVISIONS

SEC. 301. During the current fiscal year applicable appropriations to the Department of Transportation shall be available for maintenance and operation of aircraft; hire of passenger motor vehicles and aircraft; purchase of liability insurance for motor vehicles operating in foreign countries on official department business; and uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901-5902).

SEC. 302. Funds appropriated for the Panama Canal Commission may be apportioned notwithstanding section 3679 of the Revised Statutes, as amended (31 U.S.C. 1341), to the extent necessary to permit payment of such pay increases for officers or employees as may be authorized by administrative action pursuant to law which are not in excess of statutory increases granted for the same period in corresponding rates of compensation for other employees of the Government in comparable positions.

SEC. 303. Funds appropriated under this Act for expenditures by the Federal Aviation Administration shall be available (1) except as otherwise authorized by the Act of September 30, 1950 (20 U.S.C. 236-244), for expenses of primary and secondary schooling for dependents of Federal Aviation Administration personnel stationed outside the continental United States at costs for any given area not in excess of those of the Department of Defense for the same area, when it is determined by the Secretary that the schools, if any, available in the locality are unable to provide adequately for the education of such dependents and (2) for transportation of said dependents between schools serving the area which they attend and their places of residence when the Secretary, under such regulations as may be prescribed, determines that such schools are not accessible by public means of transportation on a regular basis.

SEC. 304. Appropriations contained in this Act for the Department of Transportation shall be available for services as authorized by 5 U.S.C. 3109, but at rates for individuals not to exceed the per diem rate equivalent to the rate for a GS-18.

SEC. 305. None of the funds appropriated in this Act for the Panama Canal Commission may be expended unless in conformance with the Panama Canal Treaties of 1977 and any law implementing those treaties.

[SEC. 306. None of the funds provided in this Act may be used for planning or construction of rail-highway crossings under section 322(a) of title 23, United States Code, or under section 701(a)(5) or section 703(1)(A) of the Railroad Revitalization and Regulatory Reform Act of 1976 at the—

(1) School Street crossing in Groton, Connecticut; and

(2) Broadway Extension crossing in Stonington, Connecticut.]

SEC. [307] *306.* None of the funds in this Act shall be used for the planning or execution of any program to pay the expenses of, or otherwise compensate, non-federal parties intervening in regulatory or adjudicatory proceedings funded in this Act.

[SEC. 308. None of the funds in this Act shall be used to assist, directly or indirectly, any State in imposing mandatory State inspection fees or sticker requirements on vehicles which are lawfully registered in another State, including vehicles engaged in interstate commercial transportation which are in compliance with Part 396—Inspection and Maintenance of the Federal Motor Carrier Safety Regulations of the United States Department of Transportation.]

SEC. [309] *307.* None of the funds contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

[SEC. 310. Notwithstanding any other provision of law, total amounts of contract authority authorized for fiscal year 1986 in section 21(a)(2)(B) of the Urban Mass Transportation Act of 1964, as amended, shall be available for obligation through fiscal year 1989.]

[SEC. 311. None of the funds in this or any other Act shall be available for the planning or implementation of any change in the current federal status of the Transportation Systems Center.]

SEC. [312] *308.* The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to section 3109 of title 5, United States Code, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive Order issued pursuant to existing law.

SEC. [313] *309.* (a) For fiscal year [1986] *1987* the Secretary of Transportation shall distribute the obligation limitation for Federal-aid highways by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned or allocated to each State for such fiscal year bear to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned or allocated to all the States for such fiscal year.

(b) During the period October 1 through December 31, [1985] *1986,* no State shall obligate more than 40 per centum of the amount distributed to such State under subsection (a), and the total of all State obligations during such period shall not exceed 25 per centum of the total amount distributed to all States under such subsection.

(c) Notwithstanding subsection (a) and (b), the Secretary shall—

(1) provide all States with authority sufficient to prevent lapses of sums authorized to be appropriated for Federal-aid highways and highway safety construction which have been apportioned to a State, except in those instances in which a State indicates its intention to lapse sums apportioned under section 104(b)(5)(A) of title 23, United States Code;

(2) after August 1, [1986] *1987,* revise a distribution of the funds made available under subsection (a) if a State will not obligate the amount distributed during that fiscal year and redistribute sufficient amounts to those States able to obligate amounts in addition to those previously distributed during that fiscal year giving priority to those States having large unobligated balances of funds apportioned under section 104 of title 23, United States Code, and giving priority to those States which, because of statutory changes made by the Surface Transportation Assistance Act of 1982 and the Federal-Aid Highway Act of 1981, have experienced substantial proportional reductions in their apportionments and allocations; and

(3) not distribute amounts authorized for administrative expenses, [and] the Federal Lands Highway [Programs.] *Program, the Block Grant Program, the Strategic Highway Research Program, and the Motor Carrier Safety Grants Program.*

[SEC. 314. None of the funds in this Act shall be available for salaries and expenses of more than one hundred thirty-eight political appointees in the Department of Transportation.]

[SEC. 315. Not to exceed $1,700,000 of the funds provided in this Act for the Department of Transportation shall be available for the necessary expenses of advisory committees.]

[SEC. 316. The limitation on obligations for Federal-aid highways and highway safety construction programs for fiscal year 1986 shall not apply to obligations for the remaining approach and bridge removal work necessary to complete the new bridge alignment for the Zilwaukee Bridge.]

[SEC. 317. (a) Section 5(b)(2) of the Urban Mass Transportation Act of 1964 is amended by inserting after the first sentence the following new sentence: "Any funds apportioned for fiscal year 1982 or 1983 under subsection (a) for expenditure in an urbanized area with a population of less than 200,000 may be expended in an urbanized area with a population of 200,000 or more.".]

[(b) Section 5(c)(4) of the Urban Mass Transportation Act of 1964 is amended by striking the period at the end of the first sentence, and inserting the following: "except that any fiscal year 1982 funds made available to a Governor under section 5(b)(2) of the Urban Mass Transportation Act of 1964, as amended, that are unobligated as of October 1, 1985, or become unobligated thereafter, shall remain available for expenditure under section 5 until October 1, 1986.".]

[SEC. 318. Notwithstanding any other provision of law, within 60 days of the effective date of this Act the Urban Mass Transportation Administration shall reapportion under section 9 of the Urban Mass Transportation Act of 1964, as amended, those funds available for reapportionment pursuant to subsection (c)(4) of section 5 of that Act.]

[SEC. 319. None of the funds in this or any other Act shall be made available for the proposed Woodward light rail line in the Detroit, Michigan, area until a source of operating funds has been approved in accordance with Michigan law: *Provided*, That this limitation shall not apply to alternatives analysis studies under section 21(a)(2)(B) of the Urban Mass Transportation Act of 1964, as amended.]

[SEC. 320. The Secretary of Transportation shall enter into negotiations for full funding contracts with the appropriate local governmental authorities to construct (1) the minimum operable segment, MOS-1, of the downtown Los Angeles to San Fernando Valley Metro Rail project; (2) the north and south legs of the downtown component of metrorail in Dade County, Florida; and (3) the downtown transit project (bus tunnel) in Seattle, Washington: *Provided*, That the Secretary shall commence negotiations with appropriate local authorities to enter into such contracts no later than 30 days after enactment and shall conclude such negotiations no later than 90 days after enactment: *Provided further*, That such contracts shall cover total project costs including federal financial participation consisting of fiscal year 1984 and fiscal year 1985 discretionary grants funding made available pursuant to section 331 of this Act, fiscal year 1986 discretionary grants funding in accordance with the accompanying Joint Explanatory Statement of the Managers, and future funding as made available by the Congress.]

[SEC. 321. The Urban Mass Transportation Administration shall enter into a contract with the Southern California Rapid Transit District to conduct a study of the potential methane gas risks relating to the proposed alignment of the Metro Rail project beyond the Minimum Operable Segment, MOS-1. None of the funds described in section 320 may be made available for any segment of the downtown Los Angeles to San Fernando Valley Metro Rail project unless and until the Southern California Rapid Transit District officially notifies and commits to the Urban Mass Transportation Administration that no part of the Metro Rail project will tunnel into or through any zone designated as a potential risk zone or high potential risk zone in the report of the City of Los Angeles dated June 10, 1985, entitled "Task Force Report on the March 24, 1985 Methane Gas Explosion and Fire in the Fairfax Area". Funds for this study, in an amount not to exceed $1,000,000, shall be made available from funds previously allocated to the MOS-1 project, commencing within 30 days of enactment.]

[SEC. 322. The limitation on obligations for the Discretionary Grants Program of the Urban Mass Transportation Administration shall not apply to any authority under section 21(a)(2)(B) of the Urban Mass Transportation Act of 1964, as amended, previously made available for obligation.]

[SEC. 323. (a) Notwithstanding any other provision of law, the Secretary of Transportation may use not to exceed one-half of 1 percent of—

(1) the funds made available for fiscal year 1986 by section 21(a)(2)(B) of the Urban Mass Transportation Act of 1964, as amended, to carry out section 3 of such Act to contract with any person to oversee the construction of any major project under such section;

(2) the funds appropriated for fiscal year 1986 pursuant to section 21(a)(1) of the Urban Mass Transportation Act of 1964, as amended, to carry out section 9 of such Act to contract with any person to oversee the construction of any major project under such section;

(3) the funds appropriated for fiscal year 1986 pursuant to section 21(a)(1) of the Urban Mass Transportation Act of 1964, as amended, to carry out section 18 of such Act to contract with any person to oversee the construction of any major project under such section;

(4) the funds appropriated for fiscal year 1986 pursuant to section 4(g) of the Urban Mass Transportation Act of 1964, as amended, to contract with any person to oversee the construction of any major public transportation project substituted for an Interstate segment withdrawn under section 103(e)(4) of title 23, United States Code; and

(5) the funds appropriated for fiscal year 1986 pursuant to the National Capital Transportation Act of 1969 to contract with any person to oversee the construction of any major project under such Act.]

[(b) Any contract entered into under subsection (a) shall provide for the payment by the Secretary of Transportation of 100 percent of the cost of carrying out the contract.]

[(c) This section shall take effect on October 1, 1985, and shall cease to be in effect at the close of September 30, 1986.]

[SEC. 324. (a) GENERAL RULE.—Tolls collected for motor vehicles on any bridge connecting the borough of Brooklyn, New York, and Staten Island, New York, shall only be collected for those vehicles exiting from such bridge in Staten Island.]

[(b) ENFORCEMENT.—The Secretary shall withhold 1 percent of the amount required to be apportioned to the State of New York under sections 104 and 144 of title 23, United States Code, on the first day of the fiscal year succeeding any fiscal year in which tolls collected for motor vehicles on the bridge referred to in subsection (a) are collected for those vehicles exiting from such bridge in the borough of Brooklyn.]

[(c) PERIOD OF APPLICABILITY.—This section shall apply on and after the 90th day following the date of enactment of this section, except that this section shall not apply after the date on which the Secretary publishes in the Federal Register a determination under subsection (d).]

[(d) REMOVAL OF LIMITATION.—

(1) DETERMINATION OF SECRETARY.—Subsections (a) and (b) shall cease to be in effect if, upon petition by the Governor of New York under paragraph (2), the Secretary determines that—

(A) a substantial loss of revenues has resulted from the limitation imposed by subsection (a), or

(B) such limitation has resulted in significant traffic problems,

and the Secretary publishes such determination in the Federal Register.

(2) PETITION.—The Governor of New York may petition the Secretary for a determination under paragraph (1) at any time after a period of six consecutive months in which tolls collected for motor vehicles on the bridge referred to in subsection (a) have been collected only for those vehicles exiting from such bridge in Staten Island.]

[SEC. 325. Notwithstanding section 127 of title 23, United States Code, the State of Wyoming may conduct a demonstration project for a period not to exceed two years in order to determine the effects on the National System of Interstate and Defense Highways located in Wyoming of the use of such highways by vehicles in excess of 80,000 pounds gross weight but meeting axle and bridge formula specifications in section 127 of title 23, United States Code.]

[SEC. 326. Section 18(e) of the Urban Mass Transportation Act of 1964 is amended by adding at the end thereof the following: "For the purpose of this subsection, the term 'Federal funds or revenues' does not include funds received by a recipient of funds under this section pursuant to a service agreement with a State or local social service agency or a private social service organization.".]

[SEC. 327. Section 119(d), 23 U.S.C. is amended by adding at the end of such section: "Notwithstanding any other provision of law, and for the purposes of this subsection, the phrase 'segments of the interstate system open to traffic' shall include a proposed four-lane, limited access highway, 6.4 miles in length, the construction of which will relocate to a southern alignment a portion of an existing interstate highway which was originally built without the aid of funds authorized by section 108(b) of the Federal-Aid Highway Act of 1956, as amended, and which connects the east with an interstate highway on which tolls are charged. The construction of the proposed highway shall include a bridge over the Monongahela River.".]

[SEC. 328. (a) Title XI of the Federal Aviation Act of 1958 (49 App. U.S.C. 1501 et seq.) is amended by adding at the end thereof the following:

"AERONAUTICAL CHARTS AND MAPS

"SEC. 1118. Notwithstanding the provisions of section 1341 of title 31, United States Code, or any other provision of law, the United States Government shall enter into agreements to indemnify any person who publishes a chart or map for use in aeronautics from any claim, or portion of a claim, which arises out of such person's depiction on such chart or map of any defective or deficient flight procedure or airway, if such flight procedure or airway was—

"(1) promulgated by the Federal Aviation Administration;

"(2) accurately depicted on such chart or map; and

"(3) not obviously defective or deficient.".

(b) The table of contents of the Federal Aviation Act of 1958 is amended by inserting immediately after the item relating to section 1117 the following:

"Sec. 1118. Aeronautical charts and maps.".]

[SEC. 329. Notwithstanding section 108(b) of the Federal-Aid Highway Act of 1956, sums appropriated to the State of New York under 23 U.S.C. 104(b)(5)(A) during the fiscal year ending September 30, 1986, may be obligated for Interstate construction projects under section 108(b) of the Federal-Aid Highway Act of 1956 or for Interstate substitute highway projects under 23 U.S.C. 103(e)(4): *Provided*, That the withdrawal value for New York under 23 U.S.C. 103(e)(4) shall be reduced by the amounts obligated hereunder for Interstate highway substitute projects. The federal share of the cost to complete any such Interstate substitute highway projects to which this provision applies shall be 85 per centum. In carrying out this provision the State of New York and the Secretary of Transportation shall assign highest priority to the completion of Interstate construction projects. This section shall expire on October 1, 1986.]

[SEC. 330. Notwithstanding any other provision of law, none of the funds in this Act shall be available for the construction of the Central Automated Transit System (Downtown People Mover) in Detroit, Michigan: *Provided*, That the immediately preceding provision shall not apply to $10,000,000 apportioned to the Detroit Department of Transportation.]

[SEC. 331. The Congress disapproves the proposed deferral D86-21, pertaining to the Urban Mass Transportation Administration, as set forth in the message of October 1, 1985, which was transmitted to the Congress by the President. This disapproval shall be effective upon enactment into law of this Act and the amount of the proposed deferral disapproved herein shall be made available for obligation.]

[SEC. 332. Section 201 of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 711) is amended—

(1) in the first sentence of paragraph (2) of subsection (d) by inserting "freight" before "railroad"; and

(2) in the first sentence of subsection (e) by striking out "1985" and inserting in lieu thereof "1987".]

[SEC. 333. The Act approved July 28, 1937 (50 Stat. 535), is amended by striking out in the first paragraph thereof, "and approaches thereto" and by inserting at the end thereof "The States of Maine and New Hampshire are authorized to assume all construction, maintenance, and operational authority over the approach roads and grade separation structures in their respective areas. As provided in Maine Private and Special Law, Chapter 38, 1985, and New Hampshire Statutes, Chapter 415, 1985, the respective States shall require the Authority to provide Authority funds for capital improvements.".]

[SEC. 334. Notwithstanding any other provision of law, the first sentence of section 125(b) of title 23, United States Code, is amended by inserting after "$30,000,000" the following: "($55,000,000 for projects in connection with disasters or failures occurring in calendar year 1985)".]

[SEC. 335. Notwithstanding any other provision of law or regulation, the Secretary of Transportation shall, within 30 days after enactment of this section, issue in the Federal Register a Notice of Intent to prepare an environmental impact statement for the construction of the north and south legs of the downtown component of metrorail in Dade County, Florida: *Provided*, That the absence of a federally-approved environmental impact statement for this project shall not preclude or delay the negotiations required under section 320 of this Act.]

SEC. 310. The National Visitor Center Facilities Act of 1968 (40 U.S.C. 801 et seq.), as amended by the Union Station Redevelopment Act of 1981 (Pub. L. 97-125), is amended by (1) deleting from section 115(d) the phrase "except any agreement or contract to sell property rights at the Union Station complex"; (2) deleting from section 118 (b) the following sentence: "Such project agreement shall provide that all right, title, and interest in such parking facility shall remain in the United States"; and (3) by adding the following subsection to section 112: "(e) the Secretary of Transportation is authorized, after acquiring title to the Union Station complex, to sell all rights, interests and title of the United States to the Union Station complex. Any receipts from the sale of the Union Station complex shall be deposited into the miscellaneous receipts of the Treasury. The sale documents shall contain appropriate protections for the public interest in the Union Station complex. Nothing in this subsection shall be construed to affect any existing lease, sublease, easement or other encumbrance on or right in the Union Station complex". The Departmental Offices function serves as the principal policy formulation and implementation arm of the Secretary of the Treasury.

Secretarial policy and program development.—The Secretary has primary responsibility for formulating and recommending domestic and international financial policy, economic policy, and tax policy; managing the public debt; and participating in the formulation of broad fiscal policies that have general significance for the economy.

Inspector General.—This activity is responsible for maintaining a comprehensive audit and internal investigation program. It is organizationally independent and reports directly to the Secretary and the Deputy Secretary.

International affairs.—The programs conducted within this activity are designed to analyze and implement international monetary and development financing policy. Additional staff support is provided in areas concerned with international investment, trade, and balance of payments issues.

Departmental management and administration.—This activity provides central administrative policies and guidance to the entire Department; the direct administrative support required for the Departmental Offices operations; oversight and management of departmental information technology development; and computer support and services. In 1987, the administration is seeking a direct appropriation to finance salaries and expenses for the Federal Financing Bank.

Buildings maintenance and operations.—This activity provides for maintenance and operation of the main Treasury Building and the Annex, including utilities, and custodial and craftsmen services. In addition, this activity provides for all telecommunications facilities

Matching funds in primaries.—Upon certification by the Federal Election Commission, every candidate entitled to receive payments is entitled to an amount equal to the contributions each has received on or after the beginning of the calendar year immediately preceding the election year.

Nominating conventions of parties.—Upon certification by the Commission, payments may be made to the national committee of a major party or a minor party which elects to receive its entitlement. The total of such payments will be limited to the amount in the account at the time of payment. The national committee of each party may receive payments beginning on July 1 of the year immediately preceding the calendar year in which a presidential nominating convention of the political party is held. The two major parties will receive $3 million each, plus a cost-of-living increase.

Candidates for general elections.—The eligible candidates of each major party in a presidential election will be entitled to equal payments in an amount which, in the aggregate, shall not exceed $20 million each, plus a cost-of-living increase.

Also, provision is made for new parties, minor parties and candidates, who may receive in excess of 5% of the popular vote and, therefore, be entitled to reimbursement of qualified campaign expenditures.

The Secretary of the Treasury is authorized to deal in gold and foreign exchange and other instruments of credit and securities as deemed necessary, consistent with U.S. obligations in the International Monetary Fund (IMF), regarding orderly exchange arrangements. An Exchange Stabilization Fund, with a capital of $200 million, is authorized by law for this purpose (31 U.S.C. 5302). All earnings and interest accruing to this fund are available for the purposes thereof. Transactions in special drawing rights (SDR's) and U.S. holdings of SDR's are administered by the fund. U.S. drawings from the IMF are also advanced to the fund.

The principal sources of the fund's income have been profits on foreign exchange transactions and interest on foreign exchange swap transactions and on investments held by the fund, including interest earned on fund holdings of U.S. Government securities.

Due to the impracticability of forecasting fund transactions in foreign currency and foreign investment, projections are not provided for those items. However, as an offset to actual data and projections made in the budget for interest paid on U.S. Government securities, data for the interest income on fund holdings of U.S. Government securities is provided for 1985 and projected for 1986 and 1987. Holdings of U.S. Government securities amounted to $2,073 million on September 30, 1985. The interest earnings on these securities is estimated to increase these holdings to $2,227 million in 1986 and $2,383 million in 1987. As required by Public Law 95-612, the fund no longer is used to meet administrative expenses.

[1] Pursuant to the Special Drawing Rights Act of 1968, Special Drawing Rights (SDR) allocated to or otherwise acquired by the United States are resources of the Exchange Stabilization Fund (ESF). SDR, once allocated, are permanent resources unless cancelled (which requires an 85 percent majority decision of the total voting power of the Board of Governors of the International Monetary Fund), the Special Drawing Account is liquidated, the International Monetary Fund is liquidated, or the United States chooses to withdraw from the Fund or terminate its participation in the Special Drawing Account. Except for payment of interest and charges on SDR allocations to the United States, the payment of the Exchange Stabilization Fund liability related to SDR allocations is conditional on events listed above, in which the United States has a substantial or controlling voice. The Special Drawing Rights Act also authorizes the Secretary of the Treasury to issue Special Drawing Rights certificates to the Federal Reserve Banks in return for dollar deposits in amounts equal to the value of the SDR held. The certificates may be issued to finance the acquisition of SDR from other countries or to provide resources for financing ESF operations.

The Office of Revenue Sharing was established to implement the State and Local Fiscal Assistance Act of 1972, as amended. It is responsible for correctly computing and distributing revenue sharing payments and maintaining adequate controls to insure integrity of the trust funds; supplying adequate information, data, and technical assistance to all recipients to assure compliance with the Act; improving the quality of State and local audits to eliminate noncompliance with audit requirements; insuring compliance with the nondiscrimination and public participation provisions of the Act; and at regular intervals, reporting to Congress, recipient governments, and the general public.

The administration is not seeking to reauthorize the Revenue Sharing Act upon its expiration at the end of 1986. This budget request will phase out the salaries and expenses appropriation at the end of 1987.

The Federal Law Enforcement Training Center provides the necessary facilities, equipment, and support services for conducting recruit, advanced, specialized, and refresher training for Federal law enforcement personnel. Center personnel conduct the instructional programs for the basic recruit and some of the advanced training. This appropriation is for operating expenses of the Center, for research in law enforcement training methods, and curriculum content. The 1987 estimate provides for law enforcement training; maintenance, repair, alteration and minor construction of facilities; planning and curricula development for the Center. In addition, the Center has a reimbursable program to accommodate the training requirements of various Federal agencies and for certain State and local law enforcement personnel.

Financial Operations.—Field Operations.—Payments are made through 7 regional offices for Federal civilian agencies, except the U.S. Postal Service, the U.S. Marshals Service, and certain Government corporations. These disbursing services are provided through the timely issuance of checks, letters of credit, and electronic funds transfer (EFT) payments. Field Operations is also responsible for prescribing Federal Government payment policy, for processing EFT claims, and for providing full field representation for other functional areas of the Service.

The total checks, savings bonds, and electronic funds transfer payments, and productivity relating to this function carried out by Field Operations follow:

WORKLOAD AND PRODUCTIVITY

[In thou[illegible]]

	1985 actual	1986 estimate	1987 estimate
Payments	725,580	725,525	726,355
Payments per employee	879	886	945

Also under this activity, the Treasury Financial Communications System (TFCS) provides for the management and regulation of Federal funds movement resulting in savings to the Government as a whole as follows:

GOVERNMENT-WIDE USE AND SAVINGS

[In millions of dollars]

	1985 actual	1986 estimate	1987 estimate

Interest saved by using TFCS	290	302	324

Headquarters Operations.—This activity is responsible for the control and financial integrity of the Federal payments and collections processes, which includes conducting reconciliation, accounting and claims activities. It adjudicates and settles claims against the United States resulting from instances in which Government checks have been forged, lost, stolen, destroyed, or mutilated, and collects monies from those parties having liability to the United States through fraudulent or otherwise improper negotiation of Government checks.

Claims inquiries and related productivity are as follows:

General Financial Services.—This activity provides financial services for numerous accounts, including the two Social Security Trust Funds, the two Medicare Trust Funds, the Unemployment Trust Fund, the D.C. Government loan account and the Airport and Airway Trust Fund. In addition, this activity provides for payment of domestic and international claims.

Federal Finance.—This activity is involved in the efficient and effective management of the Government's cash resources. Its responsibilities include implementation and enhancements to a number of collection mechanisms and improvements in the Government's forecast of receipts, outlays, and balances. It proposes legislation and develops regulations for the implementation of cash management initiatives and provides assistance to agencies.

Reimbursement for Banking Services.—This activity provides for reimbursements to the Federal Reserve banks for maintenance of Treasury tax and loan accounts, Treasury general account processing, Automated Clearing House Services, and the U.S./Iran Claims Tribunal. Fee payments are made to commercial depositories for Federal Tax Deposits processed under the Tax and Loan Investment program, and the Treasury in turn earns interest on funds held on deposit.

Information Systems.—This activity is responsible for overseeing the development, implementation, improvement, and operation of information and financial management systems which support and promote sound money management in the Federal Government. It is responsible for automated data processing (ADP) operations and the associated computer support and services necessary to process the Service's internal administrative and Government-wide systems. Specific functions include operating and maintaining all central computer systems and data communications mechanisms, scheduling and processing the development and production workloads, installing software, planning and coordinating hardware installations, and acquiring ADP and telecommunications equipment, software, services and supplies. It also supports a large number of developmental efforts which will enhance the collections, payments, accounting, reporting, and resources management functions of the Service.

This activity includes the check payment and reconciliation operation with volume and related productivity as follows:

During the Federal debt limitation ceiling situation of late 1984 and late 1985, several Federal accounts, including the Federal old age and survivors insurance trust fund and the Federal disability insurance trust fund, did not earn interest which they would normally have earned had it not been for the debt limitation ceiling. This appropriation will restore the interest income to the affected accounts for interest lost during this time.

The Energy Security Reserve was created principally to finance the activities of the U.S. Synthetic Fuels Corporation. Public Law 99-190, making continuing appropriations for 1986, rescinded the balance of unobligated funds available to the Corporation. The Act left $10 million in the Reserve for the Corporation's liquidation and $400 million for a Clean Coal Technology Demonstration program, which is being transferred to a new account in the Department of Energy. The Act also transferred responsibility for ongoing projects of the Corporation to the Secretary of the Treasury; these projects' activities and financing will continue to be displayed in this account.

This fund is for use by the U.S. Treasury in making settlement with the payees or special endorsees in case of checks drawn on the U.S. Treasury which have been paid on forged endorsements.

To reduce hardships sustained by payees of Government checks that have been stolen and forged, settlement is made in advance of the receipt of funds from the endorsers of the checks through reclamation procedure by this office. Benefits from these early settlements are shared by claimants and the Government in that the claimants are more quickly restored financially to their proper position and the Government is spared the necessity of much unproductive correspondence. If the U.S. Treasury is unable to recover funds, the revolving account sustains the loss.

The Federal Financing Bank (FFB) was created to assure the coordination of Federal and federally assisted borrowing from the public and to assure that such borrowings are financed in a manner least disruptive of private financial markets and institutions. In 1987, all Federal Financing Bank transactions and activities are attributed to specific client agencies and programs.

The Bank is the vehicle through which most Federal agencies finance their programs involving the sale or placement of credit market instruments, including agency securities, guaranteed obligations, participation agreements, and loan assets. The major exceptions are Title XI ship mortgage bonds and Government National Mortgage Association asset sales.

During 1985 the Federal Financing Bank made guaranteed loan originations and loan asset purchases of $18.3 billion, as well as $1.2 billion in investments in Federal agency debt.

The FFB in certain cases capitalizes the interest on loans outstanding. This capitalized interest is not reflected in the Bank's budget authority or outlays since it does not require FFB borrowing from the Treasury.

FFB purchases of Federal agencies' debt is not reflected in the budget totals because borrowing and the repayment of borrowings between Federal agencies and the Treasury are not budgetary transactions. These transactions are reflected as borrowing in the accounts of the particular agencies. The use of the FFB permits these agencies to borrow at lower rates than would occur if the agencies went to the market. This was a major reason for the creation of the Bank. They are financed by an equal amount of FFB borrowings from Treasury, which are an addition to the borrowings recorded in the statement of financial conditions. The extent of these FFB investments is reflected below:

In 1987, the Administration will propose legislation to charge borrowers from the Federal Financing Bank an additional fee of ⅜ of one percent per annum on all new borrowings after September 30, 1986. The fee is based on the additional costs that borrowers would have otherwise been charged had they issued obligations of a type ordinarily financed in investment securities markets and held by the public. The legislation will provide that all additional fees to be paid to the Bank will be returned to the General Fund of the Treasury. In addition, the Administration will seek to fund the administrative expenses of the Federal Financing Bank through a direct appropriation to the Departmental Offices salaries and expenses account.

The Bureau of Engraving and Printing designs, manufactures, and supplies most of the major evidences of a financial character issued by the United States. It is the sole source of Federal Reserve notes, various public debt instruments, as well as most of the minor evidences of a financial character issued by the United States, such as postage and internal revenue stamps. The Bureau executes certain printings for various territories administered by the United States, particularly postage and revenue stamps.

The anticipated work volume is based on estimates of requirements submitted by agencies served. The program comprises the following activities:

Engraving and printing—

Intragovernmental funds—Continued

BUREAU OF ENGRAVING AND PRINTING FUND—Continued

Currency.—Total deliveries of currency for 1986 and 1987 are estimated to be 6.4 and 6.7 billion notes. During 1985 the Bureau delivered 6.4 billion Federal Reserve notes.

Stamps.—This category of work is comprised mainly of postal and internal revenue stamps. The projected requirements for 1986 and 1987 are 34.2 and 30.0 billion stamps, respectively. In 1985, the Bureau delivered 33.1 billion stamps.

Securities.—This program encompasses the production of a wide variety of bonds, notes, and debentures for the Bureau of Public Debt and certain other agencies of the Government.

Commissions, certificates, etc.—This program is comprised primarily of Presidential and Department of Defense commissions and certificates, White House invitations, and identification cards for various Government agencies. It represents a small portion of the Bureau's total workload.

Space utilized by other agencies.—Other agencies are charged for services provided in the space occupied in the Bureau's buildings.

Other miscellaneous services.—A wide variety of miscellaneous services are performed by Bureau personnel for other agencies, which are charged on an actual cost basis.

Purchase of operating equipment.—This category consists of new purchases and replacement of printing equipment and other related printing items.

Plant alterations and experimental equipment.—This category encompasses alterations made on the Bureau's buildings and purchases of experimental equipment.

The operations of the Bureau are currently financed by means of a revolving fund established in accordance with the provisions of Public Law 656, August 4, 1950 (31 U.S.C. 181), which requires the Bureau to be reimbursed by customer agencies for all costs of manufacturing products and services performed. The Bureau is also authorized to assess amounts to acquire capital equipment and provide for working capital needs. Bureau operations during 1985 resulted in an accumulated retained earnings of $38.9 million.

Processing deposits and issues of monetary metals and coins.—This activity includes disbursements of coins: moving, shipping, storing, and verifying bullion and coin, receipt of gold and silver bullion for exchange and settlement of international balances; and counting and classifying uncurrent coins returned to the Mint for recoinage. Total coins shipped in 1985 were 14.45 billion; estimates for 1986 and 1987 are 17.11 billion and 18.56 billion respectively. In 1987 this activity is combined with the coinage activity to reflect more accurately the cost of providing domestic coin.

Protection of monetary metals and coins.—Protection of the Government's holdings of gold and silver bullion and coin is maintained by armed guards and modern protective devices.

Research and Development.—Funds to explore the application of technological improvements to the coining process.

This appropriation provides funds for the conduct of all public debt operations and the promotion of the sale of U.S. savings-type securities.

Processing and accounting for:

Savings securities.—This activity is concerned with the issuance, servicing, and retirement of savings bonds and notes and retirement-type securities, including: (1) The maintenance and servicing of individual accounts of owners of series H and HH bonds and the authorization of interest payments, and (2) the maintenance of accounting control over financial transactions, securities transactions and accountability, and interest cost. These functions are performed directly by the Bureau of the Public Debt, by the Federal Reserve Banks as fiscal agents of the United States, and by the 44,000 qualified agents which issue and redeem savings bonds and notes.

Total	79,200	82,200	85,400

Marketable and special securities.—This activity is concerned with all securities of the United States, other than savings and retirement securities, including securities of Government corporations for which the Bureau of the Public Debt provides services. Functions performed relate to the issuance, servicing, and retirement of these securities, both directly by the Bureau and through the Federal Reserve Banks, as fiscal agents, including: (1) The maintenance and servicing of individual accounts of owners of registered securities and book-entry Treasury bills; (2) the authorization of interest and principal payments; and (3) the maintenance of accounting control over financial transactions, securities transactions and accountability, and interest cost. Beginning in July 1986, the Bureau expects to eliminate all new issues of definitive securities by offering notes and bonds in full book-entry form only. The Bureau has developed, in conjunction with the Federal Reserve, a new Treasury Direct Access System for new issues of notes and bonds in book-entry form and will phase out the in-house Treasury Bill System to provide for a single direct access system for all Treasury marketable securities.

Promoting the sale of savings bonds.—This activity consists of sales promotion efforts, using press, radio, other advertising media, and organized groups, augmented by concentrated sales campaigns emphasizing payroll savings plans. These functions are performed by the U.S. Savings Bonds Division, a separate organization within the Department of the Treasury.

In 1987, the Administration will propose legislation that will end the current policy of reimbursing Federal Reserve Banks for most fiscal agent services in processing marketable and special securities for the Department of the Treasury. This change would end the indirect Treasury subsidization of debt issues and would allow the Federal Reserve Banks to price all costs associated with its fiscal agent services competitively.

This appropriation provides for the examination of tax returns and the administrative settlement of taxpayer appeals of examination findings. Funds are requested to continue the Service's ability to assure evenhanded application and adequate enforcement of the tax laws and to maintain a satisfactory rate of voluntary compliance with the internal revenue laws. It also provides for monitoring employee pension plans, determining qualifications of organizations seeking tax-exempt status, and examining tax returns of exempt organizations.

Examinations.—This activity encourages voluntary compliance with the internal revenue laws through the determination of correct tax liability by the selective examination of tax returns, the correction of errors, and explanation of these corrections to taxpayers.

Appeals and tax litigation.—The appeals portion of this authority provides for an independent administrative review of contested tax assessments and adjustments with the objective of settling tax controversies without litigation. When settlement is not possible, the tax litigation portion of the activity provides for the handling of Tax Court litigation and for the coordination of the Service's legal position in order to assure consistency.

Employee plans and exempt organizations.—This activity monitors private pension plans to insure compliance with the Employee Retirement Income Security Act of 1974, as amended, determines whether organizations seeking tax-exempt status meet certain tests to qualify, and examines tax returns of those organizations to insure compliance with such an exemption and to insure payment of unrelated business income taxes. It also examines the returns of private foundations to insure payment of proper excise taxes.

This appropriation provides for enforcing statutes relating to detection and investigation of criminal violations of the Internal Revenue laws, collecting unpaid accounts, securing unfiled tax returns and payments, providing assistance to taxpayers and preparing technical rulings.

Tax fraud investigations.—This activity provides for enforcement of the criminal statutes relating to violations of Internal Revenue laws. It investigates cases of suspected intent to defraud, recommends prosecution as warranted, and assists in the preparation and trial of criminal tax cases.

Collection.—This activity has the responsibility for collecting unpaid accounts and securing delinquent returns; developing and implementing programs to prevent accounts from becoming delinquent and preventing nonfiling; and determining and analyzing the reasons for and the types of nonfiling.

Taxpayer service.—This activity aids voluntary compliance with Federal tax laws by informing taxpayers of their responsibilities and by providing services and information through various media which assist them in meeting their obligations. Inquiries concerning tax laws, IRS notices and procedures, and tax account problems are resolved.

Enforcement, litigation, and rulings.—This activity provides legal advice and assistance to field enforcement activities, furnishes non-tax legal services and issues rulings and opinions as to the application of tax laws.

This revolving fund was established pursuant to section 112(a) of the Federal Tax Lien Act of 1966, to serve as the source of financing the redemption of real property by the United States. In collecting delinquent taxes, situations arise where it is to the Government's advantage to buy property on which it has a lien when the property is sold at a foreclosure sale brought by the holder of a lien which is superior to the Government's. The advantage arises when the property is worth substantially more than the first lienholder's equity but is being sold for an amount that barely covers that equity, thereby leaving no proceeds to apply against delinquent taxes. Under these circumstances, if the Government buys the property and subsequently puts it up for sale under more advantageous conditions, it is possible to realize sufficient profit on the transaction to fully or partially collect the amount of taxes due. The revolving fund is reimbursed from the proceeds of the sale in an amount equal to the amount expended from the fund for the redemption. The balance of the proceeds are applied against the amount of the tax, interest, penalties, and additions thereto, and for the costs of sale. The remainder, if any, would revert to the parties legally entitled to it.

ADMINISTRATIVE PROVISION—INTERNAL REVENUE SERVICE

SEC. 1. Not to exceed [1] *5* per centum of any appropriation made available to the Internal Revenue Service for the current fiscal year by this Act may be transferred to any other Internal Revenue Service appropriation.

SEC. 2. Not to exceed 15 per centum, or $15,000,000, whichever is greater, of any appropriation made available to the Internal Revenue Service for document matching for the current fiscal year by this Act may be transferred to any other Internal Revenue Service appropriation for document matching.

SEC. 3. Funds appropriated for the IRS may be used to pay travel to the United States for the immediate family of employees serving abroad in cases of death or life threatening illness of said employee.

Note.—A regular 1986 appropriation for this account had not been enacted at the time this budget was prepared. A continuing resolution (Public Law 99-190) provides funds to the extent and in the manner provided for in the conference version of H.R. 3036, Treasury, Postal Service and General Government Appropriations Act, 1986 as amended in Public Law 99-190.

The Secret Service is responsible for protection of the President and other officials, investigating counterfeiting of currency and check forgeries, protection of the White House and various other buildings within Washington, DC.

Investigations, protection, and uniformed activities.—The Service must provide for the protection of the President of the United States, members of his immediate family, the President-elect, the Vice President, or other officer next in the order of succession to the Office of the President, and the Vice President-elect, and the members of their immediate families unless the members decline such protection; protection of the person of a visiting head of a foreign state or foreign government and, at the direction of the President, other distinguished foreign visitors to the United States and official representatives of the United States performing special missions abroad; the protection of persons who are determined to be major Presidential or Vice Presidential candidates unless such protection is declined; upon request of a Presidential or Vice Presidential candidate of a major political party, as determined by the Secretary after consultation with the advisory committee, the Secretary may authorize the U.S. Secret Service to furnish protection to the spouse of such major Presidential or Vice Presidential candidate, except that such protection shall not commence more than 120 days prior to the general Presidential election; the protection of the person of a former President and his wife during his lifetime, the protection of the person of the widow of a former President until her death or remarriage, and minor children of a former President until they reach 16 years of age, unless such protection is declined. The Service is also responsible for investigation of counterfeiting of currency, specie, and securities; forgery and altering of Government checks and bonds; thefts and frauds relating to Treasury electronic funds transfers; and other criminal and noncriminal cases.

The Secret Service Uniformed Division protects the Executive Residence and grounds in the District of Columbia; any building in which White House offices are located; the President and members of his immediate family; the official residence and grounds of the Vice-President in the District of Columbia; the Vice President and members of his immediate family; foreign diplomatic missions located in the Washington metropolitan area and such other areas as the President may direct on a case-by-case basis.

The Treasury Police Force is responsible for safeguarding paper currency and other Government securities and obligations that are contained in the Main Treasury Building and its Annex in Washington, DC.

The Office of the Comptroller of the Currency was created for the purpose of establishing and regulating a national banking system. The National Currency Act of 1863 (12 U.S.C. 1 et seq., 12 Stat. 665) provided for the chartering and supervising functions in this connection. The income of the bureau is derived principally from assessments paid by national banks and interest on investments in U.S. Government obligations.

The Administrator of National Banks charters new banking institutions only after investigation and due consideration of charter applications. Supervision of existing national banks is aided by the required submission of periodic reports and detailed onsite examinations, which are conducted by a staff of approximately

2,300 national bank examiners. At present, there are approximately 5,000 national banks with more than 24,700 operating branches and total assets of $1,570 billion.

In addition, the Comptroller considers applications for mergers in which the resulting bank will be a national bank and applications from banks to establish branches. The Comptroller of the Currency also promulgates rules and regulations for the guidance of national banks and bank directors.

DEPARTMENT OF THE TREASURY—GENERAL PROVISIONS

Note.—A regular 1986 appropriations bill has not been enacted. The following general provisions were enacted by reference in a continuing resolution (Public Law 99-190).

Sec. 101. Appropriations to the Treasury Department in this Act shall be available for uniforms or allowances therefore, as authorized by law (5 U.S.C. 5901), including maintenance, repairs, and cleaning; purchase of insurance for official motor vehicles operated in foreign countries; entering into contracts with the Department of State for the furnishings of health and medical services to employees and their dependents serving in foreign countries; and services as authorized by 5 U.S.C. 3109.

Sec. 102. None of the funds appropriated by this title shall be used in connection with the collection of any underpayment of any tax imposed by the Internal Revenue Code of 1954 unless the conduct of officers and employees of the Internal Revenue Service in connection with such collection complies with subsection (a) of section 805 (relating to communication in connection with debt collection), and section 806 (relating to harassment or abuse), of the Fair Debt Collection Practices Act (15 U.S.C. 1692).

Sec. 103. (a) None of the funds appropriated by this Act may be used to disqualify, pursuant to section 411(d)(1)(B) of the Internal Revenue Code of 1954, any plan which has vesting requirements or provides for nonforfeitable rights to benefits, equal to or more stringent than 4/40.

(b) None of the funds appropriated by this Act may be used to issue an unfavorable advance determination letter, pursuant to section 411(d)(1)(B) of the Internal Revenue Code of 1954, with respect to any plan which has vesting requirements or provides for nonforfeitable rights to benefits, equal to or more stringent than 4/40.

Sec. 104. Not to exceed [1] *5* per centum of any appropriations in this Act for the Department of the Treasury may be transferred between such appropriations. However, no such appropriation shall be increased or decreased by more than [1] *5* per centum and *notice of* any such proposed transfers shall be [approved] *given* in advance [by] *to* the Committees on Appropriations of the House and Senate.

Sec. 105. None of the funds made available by this Act may be used to place the United States Secret Service, the United States Customs Service, or the Bureau of Alcohol, Tobacco and Firearms under the operation, oversight, or jurisdiction of the Inspector General of the Department of the Treasury.

TITLE V—GENERAL PROVISIONS

This Act

Sec. 501. Where appropriations in this Act are expendable for travel expenses of employees and no specific limitation has been placed thereon, the expenditures for such travel expenses may not exceed the amount set forth therefor in the budget estimates submitted for the appropriations: *Provided*, That this section shall not apply to travel performed by uncompensated officials of local boards and appeal boards of the Selective Service System; to travel performed directly in connection with care and treatment of medical beneficiaries of the Veterans' Administration; to travel of the Office of Personnel Management in carrying out its observation responsibilities of the Voting Rights Act; or to payments to interagency motor pools where separately set forth in the budget schedules.

Sec. 502. No part of any appropriation contained in this Act shall be available to pay the salary of any person filing a position, other than a temporary position, formerly held by an employee who has left to enter the Armed Forces of the United States and has satisfactorily completed his period of active military or naval service and has within ninety days after his release from such service or from hospitalization continuing after discharge for a period of not more than one year made application for restoration to his former position and has been certified by the Office of Personnel Management as still qualified to perform the duties of his former position and has not been restored thereto.

Sec. 503. No part of any appropriation made available in this Act shall be used for the purchase or sale of real estate or for the purpose of establishing new offices inside or outside the District of Columbia: *Provided*, That this limitation shall not apply to programs which have been approved by the Congress and appropriations made therefor.

Sec. 504. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

Sec. 505. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

[Sec. 506. No part of any appropriation contained in this Act shall be available for the procurement of or for the payment of the salary of any person engaged in the procurement of any hand or measuring tool(s) not produced in the United States or its possessions except to the extent that the Administrator of General Services or his designee shall determine that a satisfactory quality and sufficient quantity of hand or measuring tools produced in the United States or its possessions cannot be procured as and when needed from sources in the United States and its possessions, or except in accordance with procedures prescribed by section 6-104.4(b) of Armed Services Procurement Regulation dated January 1, 1969, as such regulation existed on June 15, 1970: *Provided*, That a factor of 75 per centum in lieu of 50 per centum shall be used for evaluating foreign source end products against a domestic source end product. This section shall be applicable to all solicitations for bids opened after its enactment.]

[Sec. 507. None of the funds made available to the General Services Administration pursuant to section 210(f) of the Federal Property and Adminsitrative Services Act of 1949 shall be obligated or expended after the date of enactment of this act for the procurement by contract of any service which, before such date, was performed by individuals in their capacity as employees of the General Services Administration in any position of guards, elevator operators, messengers, and custodians, except that such funds may be obligated or expended for the procurement by contract of the covered services with sheltered workshops employing the severely handicapped under Public Law 92-28.]

[Sec. 508. No funds appropriated in this Act shall be available for administrative expenses in connection with implementing or enforcing any provisions of the rule TD ATF-66 issued June 13, 1980, by the Department of the Treasury, Bureau of Alcohol, Tobacco and Firearms on labeling and advertising of wine, distilled spirits and malt beverages, except if the expenditure of such funds is necessary to comply with a final order of the Federal court system.]

[Sec. 509. None of the funds appropriated by this Act may be obligated or expended in any way for the purpose of the sale, lease, rental, excessing, surplusing or disposal of any portion of land identified on the date of enactment of this Act as Fort DeRussy in Honolulu, Hawaii.]

[Sec. 510. None of the funds appropriated in this Act may be used for administrative expenses to close the Information Resources Management Office of the General Services Administration located in Sacramento, California.]

[Sec. 511. None of the funds made available by this Act for the Department of the Treasury may be used for the purpose of eliminating any existing requirement for sureties on customs bonds.]

[Sec. 512. None of the funds made available by this Act shall be available for any activity or for paying the salary of any government employee where funding an activity or paying a salary to a government employee would result in a decision determination, rule, regulation, or policy that would prohibit or otherwise prevent the Customs Service from enforcing section 307 of the 1930 Tariff Act.]

[Sec. 513. None of the funds appropriated under the Act shall be obligated or expended to implement, promulgate, administer, enforce, or reissue the proposed Office of Personnel Management regulations and the proposed Federal Personnel Manual issuances published in the Federal Register on March 30, 1983, on pages 13341 through 13381, as superseded by proposed regulations and Federal Personnel Manual issuances published in the Federal Register on July 14, 1983, on pages 32275 through 32312, and as further superseded by proposed regulations and the Federal Personnel Manual issuances published in the Federal Register on October 25, 1983, on pages 49462 through 49498: *Provide*. That this section shall expire on May 15, 1986.]

Sec. [514] *506*. None of the funds made available by this Act shall be available for the purpose of transferring control over the Federal Law Enforcement Training Center located at Glynco, Georgia, out of the Treasury Department.

[Sec. 515. Of the total amount of budget authority provided for fiscal year 1986 by this or any other Act that would otherwise be available for consulting services, management and professional services, and special studies and analyses, 10 per centum of the amount intended for such purposes in the President's budget for 1986, as amended, for any agency, department, or entity subject to apportionment by the Executive shall be placed in reserve and not made available for obligation or expenditure: *Provided*, That this section shall not apply to any agency, department, or entity whose budget request for 1986 for the purposes stated above did not amount to $5,000,000.]

[Sec. 516. No part of any appropriation contained in this Act shall be available for the procurement of, or for the payment of, the salary of any person engaged in the procurement of stainless steel flatware not produced in the United States or its possessions, except to the extent that the Administrator of General Services or his designee shall determine that a satisfactory quality and sufficient quantity of stainless steel flatware produced in the United States or its possessions, cannot be procured as and when needed from sources in the United States or its possessions or except in accordance with procedures provided by section 6-104.4(b) of Armed Services Procurement Regulations, dated January 1, 1969. This section shall be applicable to all solicitations for bids issued after its enactment.]

Sec. [517] *507*. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes within the United States not heretofore authorized by the Congress.

Sec. [518] *508*. No part of any appropriation contained in this Act shall be available for the payment of the salary of any officer or employee of the United States Postal Service, who—

(1) prohibits or prevents, or attempts or threatens to prohibit or prevent, any officer or employee of the United States Postal Service from having any direct oral or written communication or contact with any member or committee of Congress in connection with any matter pertaining to the employment of such officer or employee or pertaining to the United States Postal Service in any way, irrespective of whether such communication or contact is at the initiative of such officer or employee or in response to the request or inquiry of such member or committee; or

(2) removes, suspends from duty without pay, demotes, reduces in rank, seniority, status, pay, or performance of efficiency rating, denies promotion to, relocates, reassigns, transfers, disciplines, or discriminates in regard to any employment right, entitlement, or benefit, or any term or condition of employment of, any officer or employee of the United States Postal Service, or attempts or threatens to commit any of the foregoing actions with respect to such officer or employee, by reason of any communication or contact of such officer or employee with any member or committee of Congress as described in paragraph (1) of this subsection.

Sec. [519] *509*. Except for vehicles provided to the President, Vice President and their families, or to the United States Secret Service, none of the funds provided in this Act to any Department or Agency shall be obligated or expended to procure passenger automobiles as defined in 15 U.S.C. 2001 with an EPA estimated miles per gallon average of less than twenty-two miles per gallon. The requirements of this section may be waived by the Administrator of the General Services Administration for special purpose or special mission automobiles.

Sec. [520] *510*. No funds appropriated by this Act shall be available to pay for an abortion, or the administrative expenses in connection with any health plan under the Federal employees health benefit program which provides any benefits or coverages for abortions.

Sec. [521] *511*. The provision of section 520 shall not apply where the life of the mother would be endangered if the fetus were carried to term.

Note.—A regular 1986 appropriation for this account had not been enacted at the time this budget was prepared. A continuing resolution (Public Law 99-190) provides funds to the extent and in the manner provided for in the conference version of H.R. 3036, Treasury, Postal Service, and General Government Appropriations Act, 1986, as amended in Public Law 99-190.

This appropriation finances research and development through contracts, grants, and intergovernmental agreements. These activities provide the scientific basis for EPA's regulatory actions.

Air.—Research will provide the data base needed to review the national ambient air quality standards, and establish new source performance standards and emission standards for hazardous air and mobile source pollutants.

Water quality.—Research in water quality includes gathering scientific data pertaining to toxic pollutants, developing guidelines for establishing site-specific water quality standards, support to the National Pollution Discharge Elimination System, and assessing the impact of various wastes when dumped into the ocean. Research is also performed in the municipal wastewater area.

Drinking water.—Includes research to evaluate the health effects of drinking water contaminants, methods to treat these contaminants in a cost-effective manner, and research to support the Agency's ground water protection activities.

Hazardous waste.—Research activities include providing hazardous waste measurement methods and protocols, assessing the risk from exposure to hazardous wastes, and developing the necessary data to revise and implement treatment, storage and disposal standards and regulations pursuant to recently enacted legislation.

Pesticides.—Activities provide scientific data to support the pesticides program by means of health and environmental exposure studies, the development of exposure protocols, and the quality assurance program. Emphasis will be placed on biotechnology research.

Radiation.—Activities include radiological monitoring and surveillance services for the Department of Energy nuclear testing program at the Nevada Test Site.

Interdisciplinary.—Activities provide support for the long term research program, risk assessment guidelines, technology transfer, and quality assurance.

Toxic substances.—Activities support the development of scientific and technological methods to understand, predict and manage the entry and movement of chemicals into the environment and to determine the effects of these chemicals on both human health and the environment.

Energy.—Activities support the development of a sound technical energy resource data base. Particular emphasis is placed on understanding and assessing the causes and effects of acid rain.

This appropriation includes funds for contracts, grants, and cooperative agreements for pollution abatement, control, and compliance activities.

Air.—The air program performs activities related to the achievement of air quality standards. These objec-

General and special funds—Continued

Abatement, Control, and Compliance—Continued

tives are met by providing: (1) financial and technical assistance to State and local governments; and (2) direct Federal action where State or local governments are unable to meet the requirements of Federal law. Emphasis in 1987 will be directed primarily at the implementation of the air toxics strategy through National Emission Standards for Hazardous Air Pollutants, the attainment and maintenance of National Ambient Air Quality Standards (NAAQS), and increased State participation as a way of achieving air quality objectives.

Water quality.—The water quality regulatory program has as its goal the protection and restoration of the Nation's waters. The program relies on a partnership between EPA and the States to meet the goals of the Act. The program encompasses the following major activities: (1) managing the municipal wastewater facilities construction grants program; (2) issuing and enforcing requirements of National Pollutant Discharge Elimination System (NPDES) permits for industrial and municipal sources; (3) developing guidelines for issuance of dredge and fill permits; (4) assuring compliance with regulations; (5) monitoring of water quality; (6) developing water quality standards; (7) establishing technology-based and water quality-based effluent limits for point-source discharges; and (8) developing criteria for ocean disposal of industrial waste, municipal sludges and other dredged materials, and incineration at sea.

Drinking water.—The safe drinking water program protects the Nation's drinking water supplies from contaminants. This involves: (1) setting national drinking water standards that protect human health; (2) initiating enforcement actions for compliance with drinking water and underground injection control regulations; and (3) assisting States in implementing or directly implementing these regulatory programs.

Hazardous waste.—The hazardous waste program is designed to insure that hazardous wastes are managed in a manner that will protect public health and the environment. Continued emphasis will be placed on the development of regulations and standards to support new areas such as leaking underground storage tanks, small quantity generators, and corrective action for prior releases at solid and hazardous waste facilities. Similarly, the program will emphasize delegation of authority to the States and accelerate permitting and enforcement of hazardous waste regulations. State assumption of hazardous waste authorities will be encouraged through Federal financial assistance, regulations, and guidance.

Pesticides.—EPA is responsible for protecting the public health and the environment from unreasonable pesticide risks, taking into account the economic, social, and environmental costs and benefits from pesticide use. Major activities include: (1) review and registration of pesticide products; (2) developing and processing registration standards; and (3) enforcement of pesticide use rules, with emphasis on Federal/State cooperation.

Radiation.—The radiation program endeavors to eliminate adverse health and environmental effects by limiting exposure to radiation. Major activities include development and promulgation of standards, regulations and guidelines to reduce exposure from radiation sources. Also, the EPA will assist the Department of Energy in assessing risks associated with high levels of naturally occurring radon found in selective areas of the country.

Interdisciplinary.—The interdisciplinary program is composed of several activities which cut across media programs. This involves: (1) review of environmental impact statements (EIS) to insure that actions undertaken by Federal agencies do not adversely affect the environment, (2) Federal agencies compliance with statutes and regulations for pollution control, and (3) all legal aspects of the Agency's enforcement efforts.

Toxic substances.—The toxic substances program is responsible for protecting human health and the environment from unreasonable risks posed by chemicals. The program places a balanced emphasis on evaluation and control of new and existing chemicals. Nonregulatory approaches to obtain compliance will be used where appropriate. It also disburses funding appropriated in 1986 for grants and loans under the Asbestos School Hazard Abatement Act of 1984.

The Comprehensive Environmental Response, Compensation, and Liability Act of 1980 authorized an appropriation from the general fund to finance a portion of the activities conducted through the Hazardous Substance Response Trust Fund for 1981 to 1985. Continued authorization for a payment from general revenues has not been requested. However, due to delays in reauthorizing the taxes to support the Hazardous Substance Response Trust Fund, repayable advances from the Treasury are needed in the short-term to finance the President's proposed program.

This appropriation provides funds for the implementation of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980. This Act provides authority for responding to and cleaning up hazardous substance emergencies and uncontrolled waste sites.

There are four basic components to the Superfund program: Hazardous Substance Response Actions; Enforcement; Research and Development; and Management and Support. These components will be integrated and coordinated to insure the wisest use of Fund money in order to achieve the greatest possible cleanup.

Financial responsibility for the program will be shared by the Federal and State governments as well as industry. EPA will allocate funds from its appropriation to other Federal agencies to carry out the Act. Pending Congressional action to reauthorize the program, this request is based on the President's legislative proposal submitted to Congress last year. A revised request will be developed and submitted to Congress once the program is reauthorized.

The Federal Buildings Fund finances the activities of the Public Buildings Service which provides space and services for Federal agencies in a relationship similar to that of landlord and tenant.

The Fund, established in 1975, replaces direct appropriations by using income derived from rent assessments (standard level user charges—SLUC) which approximate commercial rates for comparable space and services. SLUC and other income to the fund is as follows:

The Federal Buildings Fund program consists of the following activities financed from standard level user charges:

Construction and acquisition of facilities.—Space is acquired through direct federally financed construction of facilities, extensions to existing buildings costing over $500,000 and direct purchase of facilities. All costs directly attributable to Federal Buildings Fund construction projects for site acquisition and construction are also financed under this activity. The total cost of new commitments for direct federally financed construction and acquisition of facilities is estimated at $243.4 million in 1986 and $100 million in 1987.

Repairs and alterations.—Repairs and alterations of public buildings are funded under this activity. Protection of the Government's investment, health and safety of building occupants, transfer of agencies from leased space, and cost effectiveness are the principal criteria used in establishing priorities. Primary consideration is given to repairs to prevent deterioration and damage to buildings, their support systems, and operating equipment. This activity also provides for conversion of existing facilities and extensions estimated to cost less than $500,000.

Design and construction services.—This activity consolidates funding for the full range of design and construction services including preparation of drawings and specifications, management and inspection of construction and repairs and alterations projects, other construction related costs and non-project related technical services. In the case of new construction projects and repairs and alterations projects over $500,000, design work will be restricted to those projects reflected in the budget justifications for this activity or projects which have been specifically approved in appropriation acts.

Purchase contract payments.—Payments are made for liabilities incurred under purchase contract authority. Purchase contract authority, which provided for private investment capital financing of public buildings, ex-

pired at the end of 1975. The periodic payments cover principal, interest, taxes, and other requirements.

Rental of space.—Space is acquired through the leasing of buildings including space occupied by Federal agencies in U.S. Postal Service facilities. This program will provide an estimated 87.3 million square feet in 1986 and 86.2 million square feet in 1987.

Real property operations.—Services are provided for Government-owned and leased facilities, including cleaning, utilities and fuel, protection, maintenance, and miscellaneous services (such as moving, evaluation of new materials and equipment, and field supervision). The 1987 direct program compares with the 1986 program as follows (estimated square feet and expenses in thousands):

	1986		*1987*	
	Square feet	*Expenses*	*Square feet*	*Expenses*

Total		709,678		734,319

Program direction.—Overall general management, including office automation, systems development, financial management, policy development, planning, program evaluation and administration, is funded under this activity.

Other programs.—When requested by Federal agencies, the Public Buildings Service provides building services such as tenant alterations, cleaning and other operations, and protection services which are in excess of those services provided under the standard level user charge.

This appropriation provides for Government-wide direction and coordination of a worldwide supply distribution system, management of supplies and personal property; transportation and travel management; transportation audits; vehicle fleet management; and property management activities for utilization, rehabilitation, donation and sale of Federal property. The major objectives of these programs are to provide excellent supply support and services to customers while maximizing operational efficiency and continuing to reduce the cost of Government.

Supply.—The purpose of this activity is to provide and support a worldwide logistics supply system to contract for and distribute supplies and property to authorized users of the Federal supply system. This budget proposes $136,278,000 in 1987 to support the following programs:

(a) A national distribution system of wholesale and retail facilities through which commercial-type commodities are received, stored and issued on a worldwide basis to customer agencies. The major objective of this program is to maintain the scope of supply support rendered to Federal agencies through increased productivity and efficiency. In 1985, the national supply system maintained priority effectiveness on all items at 93 percent and increased sales from $4.8 billion to $5.1 billion resulting in additional savings of $60 million to the Government. Operational efficiency was improved by closing the self-service stores in favor of the more economical customer supply centers and by closing a supply depot located in Norfolk, VA. In 1986, further streamlining plans include closing depots in Denver, CO, Auburn, WA, and Kansas City, MO, generating annual savings estimated to be $3.2 million and initiating studies in accordance with OMB Circular No. A–76 on the depots and customer supply centers. The Federal Supply Service expects to save $2.6 million annually from the study process either by contracting out or by streamlining in-house operations. The wholesale distribution operation consists of sales shipped to customer agencies from 6 depots; a fuel yard located in Washington, DC and items issued to agencies through the customer supply centers. Sales volumes in 1987 are estimated to be as follows: stores' regular, $1,184.0 million; stores direct delivery, $107.0 million; and special orders at $883.0 million. Inventory levels available for issue to customer agencies are estimated at $276 million at the end of 1987 with a stock turn of 3.4.

(b) Contracting for commercial-type items required by Federal agencies and other authorized users. These functions include requisition processing, inventory management, technical and local procurement support, the civilian agency catalog activity, and the selection of commodities for inclusion in the stores, special order, and the Federal supply schedules. In 1986, FSS will expand the commodity management concept by establishing three additional commodity management centers to consolidate fragmented procurement functions located within the regional offices. Complete implementation of this program will generate an estimated annual savings of $2.4 million. Procurement volumes in 1987 are estimated as follows:

(c) Contract management to assure that vendors fully meet all terms and conditions of contracts, and that the quality of materials purchased complies with the requirements of those contracts. Testing capability is maintained through commercial and Government laboratories. The Quality Approved Manufacturer's Program allows manufacturers with approved quality control systems to ship material to agencies without Government inspection.

Transportation.—The purpose of this activity is to provide a comprehensive and effective Government-wide program for transportation and travel management, transportation audits, operation and maintenance of motor equipment to meet agency requirements, and development and execution of the automotive procurement functions of the Government. This budget proposes $16,985,000 to support the transportation programs.

The GSA/FSS transportation and travel management programs continue to provide support and dollar savings for Government agencies through negotiated airline city-pair contracts, Travel Management Centers (TMC), hotel/motel discounts, Charge card/travelers check program, automated rate and routing processes, the small package express delivery program, audits of transportation claims by and against the U.S. Government, and the long-term vehicle lease contracts program.

Property management.—This activity manages and operates a Government-wide excess personal property program including the utilization, donation, and sale of property. It encompasses all Government agencies, and provides for utilization of excess property; donation of surplus personal property for public benefit purposes; sale of surplus and exchange/sale of personal property (except DOD property); and rehabilitation and reclamation of Government personal property to extend its useful life. The Personal Property Centers centralize operations for handling Federal agencies excess and surplus personal property pending disposition eliminating duplicative handling of such property and reducing storage space requirements of Government. The budget proposes $17,576,000 in 1987 to support surplus property processed at an estimated value of $1.0 billion.

Reimbursable operations.—This activity provides supply support services to other Government agencies on a reimbursable basis, principally involving (1) the special handling of items to be shipped to overseas destinations, (2) the provision of technical support services to the Government of Saudi Arabia for a joint U.S./Saudi Arabian project, (3) the provision of rehabilitated furniture to agencies at a reduced cost, (4) the printing of the Federal Travel Directory through a reimbursable agreement with the Military Traffic Management Command, (5) the provision of administrative support associated with the Foreign Military Sales Program, (6) the operation of Seized and Forfeited Personal Property Centers and (7) the Department of Energy Methanol Fuel Testing Program. The budget proposes a level of reimbursable services of $25,333,000 in 1987.

Legislation will be proposed to provide permanent authority and to establish a limitation on transportation audit contractor payments and contract administration expenses at 40 percent of carrier overcharges collected. It is further proposed that, after making provision for audit contracts and contract administration expenses, the balance of the overpayments collected shall be transferred to miscellaneous receipts of Treasury. For 1987, audit contract and contract administration expenses are estimated at $7.6 million and collections are estimated at $50.0 million. This is an increase in expenses of $2.4 million above the current authority.

This fund finances, on a reimbursable basis, a national supply distribution system, a system of ordering supplies for direct delivery to agencies, and a system of interagency Federal Fleet Management Centers. This estimate provides for supplies and services to both military and civilian agencies.

Supply operations.—

Stores, regular.—Stock of common-use commodities are purchased in volume, stocked, and issued through supply facilities to Government agencies. Sales were $995.5 million in 1985, and are estimated to be $1,118.0 million in 1986, and $1,184.0 million in 1987.

Stores, direct delivery.—Orders for store-type items, if sufficiently large and delivery time is not a factor, are placed with the commercial source of supply for delivery directly to the customer. Sales were $86.8 million in 1985, and are estimated to be $100.0 million in 1986 and $107.0 million in 1987.

Special order.—Definite quantity requirements of commodities which are not susceptible to economical stocking in supply facilities are purchased for direct shipment to using agencies. Sales were $918.7 million in 1985, and are estimated to be $833.0 million in 1986 and $883.0 million in 1987.

Export operations.—Stores and special order items are shipped to overseas customers. Receipts to the fund cover packing, transportation costs, and other reimbursable services. Sales were $30.6 million in 1985, and are estimated to be $38.0 million in 1986, and $40.0 million in 1987.

Federal Fleet Management Centers.—Services are provided through a system of Fleet Management Centers. Sales were $264.5 million in 1985, and are estimated to be $298.3 million in 1986, and $323.4 million in 1987. Vehicle mileage in the system was 1,000 million in 1985 and is estimated to be 1,085 million in 1986 and 1,115 million in 1987.

Administrative equipment.—Administrative equipment is currently purchased and charged to primarily GSA using activities. Beginning in 1987, equipment will no longer be purchased through the General Supply Fund. Users will expense all equipment purchases directly through the various appropriations and revolving fund user accounts. Receipts from user charges were $3.3 million in 1985, and are estimated to be $4.2 million in 1986 and 1987.

Other revenue and expense.—Gains or losses on equipment disposals, adjustments between fiscal years, inventory writeoffs, and discounts are applied against operating costs.

This appropriation provides for the overall direction and coordination of comprehensive Government-wide programs for the management, procurement, and utilization of automatic data processing, telecommunications, and office information equipment and services. It provides for the development and coordination of Government-wide policies, procedures and regulations pertaining to ADP, telecommunications, and office information systems acquisition, management and utilization; provides for establishment of Government-wide automated data processing standards; provides information services to the public; and provides for the overall management of operations financed through the Automatic Data Processing (ADP) Fund and the Federal Telecommunications (FT) Fund.

Federal information resources management.—This activity develops, plans, and directs Government-wide programs for the management and acquisition of Federal information resources and for improving Federal records and information management programs including policies and regulations relative to these programs.

Central information services.—This activity manages and directs data and information systems; provides data and information services; operates programs for the improvement of Government-wide software; and provides near-term planning, applied research and development, engineering, operation, and management of the Federal Telecommunications System (FTS).

Information resources procurement.—This activity provides for the overall management, control, and coordination of Government-wide programs and activities relating to the procurement of ADP and telecommunications equipment, software, maintenance, and related supplies and services; the implementation of Government-wide ADP resources sharing programs; and the management of reimbursable ADP and telecommunications procurement programs financed through the Automatic Data Processing Fund and the Federal Telecommunications Fund.

Regional information services.—This activity is the focal point for regional activities; provides for the overall management, control, and coordination of Government-wide programs and activities relating to the operation, maintenance, and utilization of local telecommunications equipment and services; provides for the management of reimbursable programs financed through the Federal Telecommunications Fund; and provides assistance to the public through the Federal Information Centers.

GSA information systems.—This activity develops and oversees GSA policy concerning the acquisition, development, and use of automated information systems, equipment, and facilities within the guidelines established by the Executive Steering Committee for Information Resources Management; ensures that the GSA ADP Strategic Plan is kept current and that initiatives undertaken are consistent with the plan; and develops and enforces standards and procedures to be used by GSA organizations in the acquisition, development, and use of automated information systems, equipment and facilities. In addition, this activity provides, on a reimbursable basis, internal common use ADP and data communications support and services.

Information security oversight office. This activity provides oversight for the information security program established by Executive Order 12356. This involves monitoring the information security programs of approximately 80 executive branch agencies. Major responsibilities include the conduct of on-site reviews and the development and promulgation of directives necessary for the implementation of the order. The Oversight Office establishes requirements for reports from agencies, analyzes data received together with data collected from on-site reviews, and advises agencies about any deficiencies or violations.

This fund finances, on a reimbursable basis, a telecommunications system for the Federal Government which is a major operating component of the national communications system.

Expenses payable from the fund include personal services, procurement by lease or purchase of equipment and operating facilities (including cryptographic devices), and other costs necessary to operate the system. These expenses are reimbursed from appropriations and funds of any agency or organization for telecommunications services and facilities made available to them.

The estimate for 1987 provides for a continued increase in the volume and quality of communications services provided to executive agencies of the Government. Total sales for 1985 were $665.6 million and are estimated at $741.2 million in 1986, and $752.0 million in 1987.

Local service program.—This program provides local telephone service to executive agencies. GSA, through this program, provides effective and economical local telephone service by operating consolidated telephone systems and utilizing the competitive procurement process to procure telephone equipment and services. These actions and the economies of scale inherent in large telecommunications systems enable GSA to realize cost reductions; and, therefore, to provide cost-effective local telephone service to the executive agencies.

Intercity service program.—Provides for a telephonic system which enables personnel in each Federal agency to communicate directly with any other agency in the Nation. The system provides day-to-day services and incorporates features which would be necessary in emergency situations. In addition, this program finances reimbursable services in support of other agencies' dedicated requirements. Intercity Federal Telecommunications System calls were 314 million in 1985 and are estimated at 315 million in 1986 and 1987.

Data program.—Provides a common unified communications system to satisfy record communications requirements of the Federal civil agencies by providing machine-to-machine service for transmission of data by teletypewriter, facsimile, and other transmission media, while at the same time providing message processing capability required for peak-period traffic loads, time zone differences, machine code and language translation, and processing of multiple address messages.

Special programs.—Provides for an effective communications security program for civil agencies in keeping with the objectives of the U.S. communications security plan, and a consolidated program of procurement and maintenance of equipment to implement such security plans. This program provides assurances for the continuity of the Federal telecommunications system in the event that portions of the system are disabled or destroyed. In addition, this program provides telecommunications support to the Federal Emergency Management Agency in the emergency and major disaster programs.

Other telecommunications programs.—These programs provide for: commercial toll calls billed by the telephone companies which are reimbursed by the user agencies; call detail reporting which provides for reporting on long distance calls placed by all Federal agencies located in the Washington, D.C. metropolitan area; the Circuit Procurement Program which allows Federal, State, and local Government agencies to buy capacity excess to GSA needs acquired through bulk procurement of Intrastate Telecommunications Package (TELPAK) channels; the Telecommunications Technical Services Contracts Program which makes available to Federal agencies Telecommunications systems and design services through contracts with private sector vendors; and other miscellaneous services such as teleconferencing and radio services.

Capital outlays.—Provides for the purchase of telecommunications equipment where an initial capital outlay will result in the most efficient and cost effective operation of the Federal Telecommunications System and the least cost provision of services and facilities to Federal user agencies. Capital outlays were $12.6 million in 1985 and are estimated to be $14.4 million for 1986 and $14.8 million for 1987.

Operating results and financial condition.—At the end of 1985, the net investment in the fund was $35.0 million, composed of $36.5 million appropriated, $0.3 million donated assets capitalized less $1.8 million in retained earnings. Following the close of each year any surplus earnings, after making provision for any prior year losses, are deposited in miscellaneous receipts of the Treasury.

The Automatic Data Processing Fund was authorized by Public Law 89-306, to coordinate and provide for the economic and efficient purchase, lease and maintenance of automatic data processing equipment by Federal agencies.

The fund finances on a reimbursable basis a Government-wide automatic data processing operation, including the procurement by lease, purchase, transfer, or otherwise of ADP equipment, maintenance of equipment, procurement and/or development of software programs with Government-wide application, procurement of a wide range of ADP services through national and regional contracts with private sector vendors and operation of service centers, and related functions.

The estimate provides for an increase in revenue during 1986 and 1987. Sales are estimated to increase from $217.1 million in 1985 to $296.0 million in 1986 and $330.5 million in 1987.

Multiple award schedules program.—This program provides the contractual vehicle for Federal agencies to acquire services and equipment from private sector vendors participating in certain GSA multiple award schedule contracts. This program is designed to simplify and expedite the procurement process for services by allowing agencies to purchase against already existing GSA multiple award schedule contracts.

Federal Data Processing Centers (FDPC).—FDPC's are operated by either GSA or by another agency under a delegation of authority from the Administrator of GSA.

Intergovernmental funds—Continued

[OFFICE OF] INFORMATION RESOURCES MANAGEMENT *SERVICE*—Continued

AUTOMATIC DATA PROCESSING FUND—Continued

The centers provide a full range of services to all Federal agencies including consulting assistance in the formulation of strategic Federal Information Resources Management (IRM) plans, interactive ADP conversion support, language and software validation requirements, and a system for data collection. GSA is continuing its evaluation of existing and potential Federal data processing centers and whenever economic feasibility and agency requirements justify it, additional FDPC's will be established.

Contract services program (CSP).—CSP provides ADP services to Federal agencies through regional contracts with private sector vendors. Services provided include systems analysis and programing; systems design and definition of equipment and systems requirements; computer output microfiche production; data conversion services; and office automation systems analysis and microcomputer support. Contracts are tailored to local market conditions and needs of specific Federal agencies. Overall contract administration, central guidance, and policy direction are provided by GSA.

Equipment lease program.—This program finances the multiyear lease of ADP equipment by the ADP Fund for subsequent leaseback to Federal agencies and administers the leaseback of ADP equipment purchased by the Fund as a result of the Opportunity Buy Program.

Excess ADP equipment program.—This program finances the screening of excess Government-owned ADP equipment and, where there is a known user or high potential for reutilization, the activities involved with acquiring, reassigning and relocating the equipment with a new user.

Opportunity buy program.—This program finances ADP equipment purchases when special discounts with time limitations and other arrangements become available and agencies are unable to take advantage of these cost reduction opportunities due to budget cycle limitations. When such offers yield a high rate of return, achieve a significant cost avoidance, and the agency cannot reprogram funds to make the purchase, the offer is considered by the Opportunity Buy Program for purchases through the ADP Fund.

Operating results and financial condition.—At the end of 1985, the net investment of the fund was $43.2 million, composed of $30.0 million appropriated, $12.9 million donated assets capitalized, $0.4 million reserve for unanticipated discontinuance of equipment, less $0.1 million in retained earnings. Following the close of each year any surplus earnings after making provision for prior year losses are deposited in miscellaneous receipts of the Treasury.

This appropriation funds the staff for the acquisition, administration and disposal of National Defense Stockpile inventories; administration and disposal of the Defense Production Act inventory; and utilization and disposal of excess and surplus real property in 1987.

The estimate for 1987 provides for storage, maintenance and inspection of stockpile materials, disposal of those stockpile materials excess to objectives and the acquisition of materials needed to meet objectives, the appraisal of real property, and continuing emphasis on reuse of existing real property to extend its useful life.

National Defense Stockpile.—This activity manages the national defense stockpile of strategic and critical materials required to keep the Nation's mobilization base viable. It includes costs of receiving, storing, inspecting, and maintaining the material in storage locations. Furthermore, this activity develops and implements plans and programs to acquire and dispose of stockpiled materials in accordance with statutory provisions. It includes the collection of technical, economic, and marketing data and an analysis of factors such as supply, demand, consumption, prices, specifications, and quality. This activity supports the development of marketing and acquisition plans and programs, which are then implemented by the conduct of transactions in the commodities market.

Real property.—This activity promotes maximum utilization of real property by Federal agencies and the transfer among agencies of excess real property. It provides for the disposal of surplus real property by sale, exchange, lease, permit, assignment, or transfer, as well as the protection and maintenance of excess and surplus property pending its disposition. It also provides for the appraisal of excess and surplus property, necessary environmental and cultural analyses, disposition and predisposition reuse planning, and real property utilization surveys.

This appropriation provides for policy direction and coordination of all GSA programs by the Administrator, his Deputy, 11 Regional Administrators and Congressional and Public Affairs; agency-wide acquisition policy, planning and coordination; and agency-wide administrative, financial, and management support services on a centralized and integrated basis.

Executive direction.—Directs the execution of all functions assigned GSA by the Federal Property and Administrative Services Act of 1949 as amended, and the reorganization plans of the President. Maintains close coordination with Small Business Administration on national minority business proposals and contracts, assuring they receive a fair share of the agency's business. Formulates agency policy regarding management improvement initiatives. Responsible for GSA customer relations and public information activities, directing and coordinating interaction between agency officials and members of Congress, and for program initiatives within the agency.

Comptroller.—Centralized budgeting, financial management, and accounting are provided to the GSA services and staff offices. In addition, provides accounting services to Department of Justice in defense of Indian tribal claims against the U.S. Government. The Transportation Audit functions included in this activity in 1985 are included in the Operating Expenses, Federal Supply Service account for 1986 and 1987.

Administration.—This activity is responsible for the planning, implementation, and direction of all activities of GSA related to personnel management, including labor management relations, training, equal employment opportunity, position management and personnel documents. Directs the GSA mobilization, emergency relocation and national civil defense planning program, including coordination of support services and assistance to other agencies. Ensures implementation of audit reports from the Office of Inspector General and the GAO, and physical security surveys to prevent misuse and theft of GSA assets. Coordinates all activities of GSA related to administrative management, and the management of the GSA printing and distribution program.

Board of Contract Appeals.—In accordance with the Contract Disputes Act of 1978, the Board has jurisdiction over any dispute relating to a contract for the provision of goods and services to the Government, inclusive of, but not limited to, disputes clause cases concerning contract performance; appeals of disappointed bidders; and proposed debarment or suspension actions.

Legal services.—This activity provides legal services for real property, personal property, automated data and telecommunications, transportation and public utilities, stockpile acquisition and disposal, and finance and administration.

Acquisition policy.—Oversees the implementation of GSA-wide acquisition, supply, and storage management policies, and insures implementation through surveillance and performance of acquisition management reviews. This office is the primary point of contact with the Office of Federal Procurement Policy; administers the Federal Procurement Regulations; and prepares legislation for the agency acquisition program. This activity also includes the Regulatory Information Service Center (transferred to the General Services Administration from the Environmental Protection Agency) which compiles and analyzes data on both government-wide and agency-specific regulatory activities.

Field administration.—Major responsibilities of this activity are contract review and clearance; contract assurance and compliance; small and disadvantaged business counseling; and processing EEO complaints. It is also responsible for overall management of field offices.

This appropriation provides agency wide audit and investigative functions to identify and correct management and administrative deficiencies within GSA which create conditions for existing or potential instances of fraud, waste and mismanagement. The audits function provides internal audit, contract audit, and inspections services. Contract audits provide professional advice to GSA contracting officials on accounting and financial matters relative to the negotiation, award, administration, repricing, and settlement of contracts. Internal audits review and evaluate all facets of GSA operations. Inspections services provide detailed technical evaluations of GSA operations. The investigative function provides for the detection and investigation of improper and illegal activities involving GSA programs, personnel, and operations.

The Consumer Information Center Fund, a revolving fund established by Public Law 98-63 on July 30, 1983, provides for an efficient operation of the Consumer Information Center's activities. Previously, these activities were funded from a direct appropriation with the cost of distributing agency publications funded by reimbursements from the participating agencies. The revolving fund assumed all of the liabilities, obligations and commitments of the Consumer Information Center account. Under the revolving fund, the Consumer Information Center's activities are financed from monies deposited to the fund, consisting of annual appropriations from the general funds of the Treasury, reimbursements from agencies, user fees collected from the public and other income incident to Consumer Information Center activities.

Administrative Expenses.—The Consumer Information Center helps Federal departments and agencies release consumer information collected as a by-product of the Government's program activities. The Consumer Information Center maintains close working relationships with more than 30 Federal agencies in order to identify, develop, promote and make accessible to the public Federal consumer information. In addition, the Consumer Information Center promotes public awareness of this information through publication of the quarterly *Consumer Information Catalog*, and through various media services.

Publications Distribution.—The Consumer Information Center bills agencies and in turn reimburses the Government Printing Office for the costs of distributing free publications to the public.

Special Programs.—The Consumer Information Center carries out special projects supporting the program's mission. The projects are funded by fees collected from the public and by other revenue and income in the Fund.

Central blueprinting, duplicating, and distribution services are financed by a working capital fund (40 U.S.C. 293). As authorized by the Joint Committee on Printing, U.S. Congress, GSA has established and operates 11 printing plants to meet the needs of GSA and other Government agencies. These activities are under continuous review to assure that the method of printing is the least costly alternative to the Government.

GENERAL SERVICES ADMINISTRATION—GENERAL PROVISIONS

SEC. 1. The appropriate appropriation or fund available to the General Services Administration shall be credited with (1) cost of operation, protection, maintenance, upkeep, repair, and improvement, included as part of rentals received from Government corporations pursuant to law (40 U.S.C. 129); and (2) appropriations or funds available to other agencies, and transferred to the General Services Administration, in connection with property transferred to the General Services Administration pursuant to the Act of July 2, 1948 (50 U.S.C. 451ff) and such appropriations or funds may be so transferred, with the approval of the Office of Management and Budget.

SEC. 2. Funds available to the General Services Administration shall be available for the hire of passenger motor vehicles.

SEC. 3. Appropriations available to any department or agency during the current fiscal year for necessary expenses, including maintenance or operating expenses, shall also be available for payment to the General Services Administration for charges for space and services and those expenses of renovation and alteration of buildings and facilities which constitute public improvements, performed in accordance with the Public Buildings Act of 1959 (73 Stat. 749), the Public Buildings Amendments of 1972 (86 Stat. 216), or other applicable law.

SEC. 4. Not to exceed [1] *3* per centum of funds made available in appropriations for operating expenses and salaries and expenses, during the current fiscal year, may be transferred between such appropriations for mandatory program requirements. [Any] *Notice of any* transfers proposed shall be submitted promptly to the Committee on Appropriations of the House and Senate [for approval].

SEC. 5. Funds in the Federal Buildings Fund made available for fiscal year [1986] *1987* for Federal Buildings Fund activities may be transferred between such activities only to the extent necessary for mandatory program requirements. [Any] *Notice of any* transfers proposed shall be submitted promptly to the Committees on Appropriations of the House and Senate [for approval].

SEC. 6. Funds hereafter made available to the General Services Administration for the payment of rent shall be available for the purpose of leasing, for periods not to exceed thirty years, space in buildings erected on land owned by the United States.

NOTE.—A regular 1986 appropriation for this account had not been enacted at the time this budget was prepared. A continuing resolution (Public Law 99-190) provides funds to the extent and in the manner provided for in the conference version of H.R. 3036, Treasury, Postal Service, and General Government Appropriations Act, 1986, as amended by Public Law 99-190.

This appropriation provides for research and development activities of the National Aeronautics and Space Administration. The elements of the program and the work to be performed during 1987 are described below:

Space Transportation Systems.—

Capability Development.—The principal activities include efforts related to the Spacelab, the upper stages that will place satellites in high altitude orbits not attainable by the Shuttle, the engineering and technical base support at NASA centers, payload operations and support equipment, development of the joint U.S./Italy Tethered Satellite System, building of the orbital maneuvering vehicle, and advanced programs study and evaluation efforts.

The European Space Agency (ESA) developed Spacelab successfully completed its first mission in December 1983. Dedicated missions for 1987 involve use of the Spacelab module, pallets and other minor structures for science and applications missions.

Efforts on Space Transportation System (STS) upper stages will be pursued further. Development of a common Centaur for the STS will continue. In 1986, two Centaur STS upper stage launches are planned for the Galileo mission to Jupiter and Ulysses solar polar mission. Additional upper stage vehicles are being procured for the Magellan mission (formerly Venus Radar Mapper), Tracking and Data Relay Satellite Missions, and other NASA scientific missions.

The Tethered Satellite System, scheduled for initial flight in 1988, will provide a unique capability for conducting space experiments in regions remote from the Space Shuttle orbiter, especially in the upper atmosphere.

The development of the reusable orbital maneuvering vehicle (OMV) will continue in 1987 with the first flight planned for 1991. The OMV will retrieve spacecraft, provide remote satellite servicing and other operations beyond the capability of the Shuttle.

RESEARCH AND DEVELOPMENT—Continued

Space Station.—The United States will continue with the definition and design and initiate development of a space station. The space station will provide permanently manned, space-based facilities for the Nation's science and applications programs, and for commercial exploitation of space, while exploring advanced technologies potentially useful to the economy.

In 1987, definition studies, advanced technology developments and initial development efforts will be pursued.

One of the main objectives of the definition and design period will be clarification of future costs and capabilities of various station configurations. In particular, emphasis will be placed on insuring that the selected station configuration provides a balance between manned and unmanned elements that can be readily adapted to changing national requirements and future technologies.

Scientific Investigations in Space.—The Space Science and Applications programs perform basic research to expand our knowledge of the Earth and its space environment, the solar system, the galaxy and the universe, and conduct research and selected technology developments to encourage the application of space technologies to needs on Earth.

Physics and Astronomy.—Research is being conducted to investigate the Earth's environment, the Sun and the interplanetary medium, the galaxy and distant space, as well as the interrelationships among these areas and the processes that control them.

The major activities in 1987 include: planned operations and data analysis related to the Hubble Space Telescope (HST) planned for launch in 1986; development of the Gamma Ray Observatory; and the continuation of Shuttle/Spacelab instrument development and mission management activities including development of sounding rocket-type payloads to be flown on the Shuttle. Two Spacelab missions have been flown on the Shuttle. In 1987, two dedicated Spacelab flights are scheduled, as well as use of the Spacelab pallets and other minor structures, for science and applications experiments. Work is also continuing on several Explorer projects to continue research thrusts started in prior years.

Planetary Exploration.—This program encompasses the scientific exploration of the planets and their satellites, comets and asteroids, and the interplanetary medium to increase knowledge of the origin and evolution of the solar system.

The 1987 budget provides for planned operations and data analysis related to the Galileo mission to Jupiter planned for launch in 1986. The Ulysses (previously the International Solar Polar Mission) spacecraft built by the European Space Agency (ESA) will be launched in 1986 and will also be operating in 1987. The Magellan spacecraft design and development activities will continue during 1987 with fabrication and testing of the spacecraft and synthetic aperture radar. In addition, the Mars observer mission design and development activities will be continued. This mission, scheduled for launch in 1990, will perform geochemical and climatological mapping of Mars. Voyager 2 (launched in 1977) will perform encounters with Uranus in 1986 and Neptune in 1989.

Studies will also be conducted during 1987 on future candidate missions. Analysis of data from past planetary missions will also continue, including data from the continuing Voyager and Pioneer Missions.

Life Sciences.—This program provides for the research and technology required to meet the goals of ensuring human health, safety, well-being, and performance in space; using the space environment to advance knowledge in Earth medicine and biology, and understanding the origin and distribution of life in the universe.

During 1987, the life sciences flight experiments development activities will continue, leading to a series of reflyable dedicated life sciences Shuttle/Spacelab missions, the first of which is scheduled for launch in 1987.

Space and Terrestrial Applications.—

Space Applications.—The major programs in space applications are observations of the Earth and its environment, materials processing, space communications and information systems. Major solid Earth observation activities in 1987 include evaluation of Shuttle Imaging Radar data for geological mapping in the land and ocean environment, imaging spectrometer technological activities and geodynamics studies of global tectonic plate deformation.

Environmental observation activities focus on using space technology to understand the Earth's atmosphere, oceans, ionosphere and magnetosphere. In 1987, Shuttle/Spacelab payload development efforts will continue along with definition activities on advanced instruments.

Development will continue in 1987 on the Upper Atmospheric Research Satellite (UARS) mission to conduct research on the Earth's upper atmosphere with the goal of understanding it well enough to assess its susceptibility to chemical change. The UARS mission will provide a unique data set of the influence of the composition and dynamics of the upper atmosphere on tropospheric weather and climate.

Development activities will be continued in 1987 on a Scatterometer, planned to be flown in 1990 on the Navy's Remote Ocean Sensing System, to measure wind velocity on the surface of the ocean. NASA, the National Oceanic and Atmospheric Administration (NOAA) and the Navy will use data obtained by the Scatterometer to calculate ocean currents and other measurements that will improve understanding of the momentum coupling of the atmosphere and ocean.

Development will be initiated on the Ocean Topography Experiment (TOPEX), a cooperative effort with France to develop a new ocean observing satellite to measure ocean surface topography. The data obtained will improve the understanding of the circulation of the oceans and its influence on the global environment. In addition, activities will be initiated for the design and definition of International Solar Terrestrial Physics spacecraft. These instruments will conduct research on plasma dynamics between the Sun and Earth.

Materials processing activities in space (also known as microgravity science) in 1987 will involve the investigation of the processes and phenomena which would be most enhanced by the absence of gravity.

These activities are conducted through a combination of ground-based research, aircraft and drop tube towers and with Shuttle experiments.

In space communications, research and analysis will continue to support development of advanced component and device technology for communications satellite systems. Development work will be terminated on the advanced communications technology satellite demonstration flight.

Information systems activities in 1987 will provide analysis and technology to address concerns of the science community for improved access to and efficient manipulation of the massive amounts of data derived from space science and applications missions.

Commercial Programs.—These programs include technology utilization and commercial use of space.

The technology utilization program is designed to transfer aerospace technology from NASA's research and development base to nonaerospace sectors of the U.S. economy. During 1987, NASA will continue its efforts to help foster the dissemination of new technology developed by the Agency's programs.

The commercial use of space is designed to increase private sector awareness of the opportunities in space. Private industry will be encouraged to invest and participate in high technology research and development using the unique characteristics of space.

Space Research and Technology.—In 1987, work directed toward providing the broad base of technology underlying the conduct of future space missions will continue, as well as an enhanced effort in automation and robotics.

Transatmospheric Research and Technology.—A joint NASA/DOD program will explore new approaches for cost-effective hypersonic flight in the atmosphere with the capability to accelerate to orbit. The program will pursue research and advanced technology development in the area of hypersonic flight, cooperatively with DOD, and is expected to lead to a transatmospheric flight research vehicle in the early 1990's.

Aeronautical Research and Technology.—This program conducts research and develops technology for future military and civil aircraft through support for the staff, major facilities and other activities of the three major aeronautical centers.

Major thrusts of 1987 activities include: continuing advancement in both basic aeronautical disciplines and systems research; maintaining and operating specialized facilities essential to aeronautical research; and pursuing technological advances in critical areas of high risk and potentially high payoff to the Nation. These activities will continue to provide a strong research and technology base in the aeronautical disciplines of fluid and thermal physics, applied aerodynamics, materials and structures, controls and guidance, human factors, information sciences, propulsion and power, flight systems, and systems analysis and studies. Systems technology efforts will continue in a variety of areas including rotorcraft, high-performance aircraft, supersonic aircraft, advanced propulsion systems, and numerical aerodynamic simulation.

Supporting Activity: Tracking and Data Advanced Systems.—This program provides advanced studies to ensure capability for tracking, data acquisition, communications, and data processing support required by all NASA flight projects in accomplishing their mission objectives. Research and development activities will provide tracking and data acquisition support systems for future flight programs.

This appropriation provides for production and operational activities for the Space Transportation System; and for tracking, telemetry, command, and data acquisition support of all NASA flight projects. The elements of the program and the work to be performed during 1987 are described below.

Space Transportation Systems.—

Shuttle production and capability development.—The Space Shuttle is the key element of a versatile Space Transportation System that is available to a wide variety of national and international users.

This program provides for the national fleet of Space Shuttle orbiters and provides the launch site capabilities, spare components, production tooling, and investments in mission preparation to meet the needs of NASA, the Department of Defense, and other domestic and international users of space. All four orbiters are operational with the Cape Canaveral, Florida site already operational and the second site at Vandenberg, California becoming available in 1986. Flight rate capability continues to improve toward a projected operational capability of 24 flights per year by 1989.

In 1987, the principal activities are: continued improvement and testing of the Space Shuttle's main engines to increase their durability and reliability. Fabrication of engines and spare components to support the orbiter fleet planned flight rate, completion of the various major orbiter structural spares such as the wings, vertical stabilizer, crew modules, payload bay doors and aft thrust structure, and improvements in Space Shuttle on-board computers, auxiliary power units and completion of orbiter brake modifications. For the external tank and solid rocket booster emphasis continues on cost-reduction/producibility/production readiness efforts.

Another principal activity involves enhancement of launch and mission support capability. The first line of facilities at the Kennedy Space Center developed earlier to support launch processing and checkout of the Shuttle vehicle is being enhanced. A second line of facilities is being procured to service the increased number of orbiters and to achieve and sustain a level of up to 20 East Coast launches per year.

Operations.—This activity provides the standard operational services for the Space Shuttle and the expendable launch vehicles. The Space Shuttle operations program provides launch services for NASA missions, Department of Defense, other U.S. Government, domestic commercial and international missions on a reimbursable basis.

In 1987, the planned flight rate will continue to build consistent with the increased demands for launch and operational services by users. The spectrum of users will continue to expand in both number and variety as the Space Shuttle system demonstrates its reliability and man-aided capabilities. In 1987, the Shuttle operations program will provide for the procurement of hardware spares, mission integration and training, ground processing and flight operations.

The NASA expendable launch vehicle programs (Scout, Delta, Atlas Centaur, and Atlas F) will be completely funded on a reimbursable basis in 1987.

Supporting Activity: Tracking and Data Advanced Systems.—This program, using ground-based and satellite (tracking and data relay satellite system) components, provides vital tracking, telemetry, command, and data acquisition support to meet the requirements of all NASA flight projects. In addition to NASA flight projects, support is provided on a reimbursable basis for projects of the Department of Defense and other Government agencies, commercial firms, and other countries and international organizations engaged in space research endeavors.

CONSTRUCTION OF FACILITIES

For construction, repair, rehabilitation and modification of facilities, minor construction of new facilities and additions to existing facilities, and for facility planning and design not otherwise provided, for the National Aeronautics and Space Administration, and for the acquisition or condemnation of real property, as authorized by law, [$139,300,000] *$181,300,000*, to remain available until September 30, [1988] *1989*: *Provided*, That, notwithstanding the limitation on the availability of funds appropriated under this heading by this appropriation Act, when any activity has been initiated by the incurrence of obligations therefor, the amount available for such activity shall remain available until expended, except that this provision shall not apply to the amounts appropriated pursuant to the authorization for repair, rehabilitation and modification of facilities, minor construction of new facilities and additions to existing facilities, and facility planning and design: *Provided further*, That no amount appropriated pursuant to this or any other Act may be used for the lease or construction of a new contractor-funded facility for exclusive use in support of a contract or contracts with the National Aeronautics and Space Administration under which the Administration would be required to substantially amortize through payment or reimbursement such contractor investment, unless an appropriation Act specifies the lease or contract pursuant to which such facilities are to be constructed or leased or such facility is otherwise identified in such Act: *Provided further*, That the Administrator may authorize such facility lease or construction, if he determines, [in consultation] with *notice to* the Committees on Appropriations, that deferral of such action until the enactment of the next appropriation Act would be inconsistent with the interest of the Nation in aeronautical and space activities. *(Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1986; additional authorizing legislation to be proposed.)*

This appropriation provides for contractual services for the design, repair, major rehabilitation, and modification of facilities; the construction of new facilities; minor construction; the purchase of land and equipment related to construction and modification; and advanced design related to facilities planned for future authorization. The principal projects in the 1987 program are described below:

Space transportation systems.—This activity includes funds for space flight facilities at various locations.

Scientific investigations in space.—This activity includes the construction of a spacecraft systems development and integration facility at the Goddard Space Flight Center, Greenbelt, MD.

Space research and technology.—This activity includes the construction of the human performance research laboratory at Ames Research Center, Moffett Field, CA; and the construction of a power systems facility at the Lewis Research Center, Cleveland, OH.

Aeronautical research and technology.—This activity includes modifications to the 8-foot high temperature tunnel, and construction of an addition for a non-destructive evaluation research laboratory at Langley Research Center, Hampton, VA; and construction of integrated test facility at Dryden Flight Research Facility.

Supporting activity.—The estimates for this activity include the construction of a central computing facility at the Lyndon B. Johnson Space Center, Houston, TX; an engineering support building, and modification of the uninterruptible power system at the Jet Propulsion Laboratory, Pasadena, CA; construction of the second tracking and data relay satellite system ground terminal facility at White Sands Test Facility, Las Cruces, New Mexico; repair, rehabilitation and modification of facilities, not in excess of $750 thousand per project, minor construction of new facilities and additions to existing facilities, not in excess of $500 thousand per project at various NASA installations and at Government-owned plants operated by contractors; and for facility planning and design.

This appropriation provides for research in Government laboratories, management of programs, and other expenses for the operation of eight NASA field installations.

Programwide support and management are provided by NASA headquarters, Washington, DC.

The budget levels proposed in this account for 1987 and later years reflect management reform efforts now underway or planned.

International cooperation.—Foreign governments advance funds to allow the National Aeronautics and Space Administration to procure, in the United States, nonmilitary space-oriented materials and services on their behalf. Authority for this action is granted by the National Aeronautics and Space Act of 1958 (42 U.S.C. 2451 et seq.).

OFFICE OF PERSONNEL MANAGEMENT

Federal Funds

General and special funds:

SALARIES AND EXPENSES

(INCLUDING TRANSFER OF TRUST FUNDS)

For necessary expenses to carry out functions of the Office of Personnel Management pursuant to Reorganization Plan No. 2 of 1978 and the Civil Service Reform Act of 1978, including services as authorized by 5 U.S.C. 3109, medical examinations performed for veterans by private physicians on a fee basis, rental of conference rooms in the District of Columbia and elsewhere, hire of passenger motor vehicles, *not to exceed $2,500 for official reception and representation expenses*, and advances for reimbursements to applicable funds of the Office of Personnel Management and the Federal Bureau of Investigation for expenses incurred under Executive Order 10422 of January 9, 1953, as amended; $99,846,000 in addition to [$54,202,000] *$55,400,000* for administrative expenses for the retirement and insurance programs to be transferred from the appropriate trust funds of the Office of Personnel Management in the amounts determined by the Office of Personnel Management without regard to other statutes: *Provided*, That the provisions of this appropriation shall not affect the authority to use applicable trust funds as provided by section 8348(a)(1)(B) of title 5, U.S.C.: *Provided further, That funds made available by this appropriation may be used, at the discretion of the Director of the Office of Personnel Management, to provide salaries, administrative support and for other expenses of the Commission on Executive, Legislative, and Judicial Salaries.* No part of this appropriation shall be available for salaries and expenses of the Legal Examining Unit of the Office of Personnel Management established pursuant to Executive Order 9358 of July 1, 1943, or any successor unit of like purpose[: *Provided further*, That none of the funds appropriated by this or any other Act shall be used for preparing, promulgating, or implementing new regulations for the 1985 Combined Federal Campaign other than repromulgating and implementing the 1984 regulations for the 1985 campaign. Nothing in this provision shall be construed to apply to the regulations for the 1986 Combined Federal Campaign: *Provided further*, That pursuant to section 4109(d)(1) of title 5, United States Code, costs for entertainment expenses of the President's Commission on Executive Exchange shall not exceed $12,000].

Note.—A regular 1986 appropriation for this account had not been enacted at the time this budget was prepared. A continuing resolution (Public Law 99-190) provides funds to the extent and in the manner provided for in the conference version of H.R. 3036, Treasury, Postal Service, and General Government Appropriations Act, 1986, as amended by P.L. 99-190.

To meet the administration's goals in specific management initiative areas, the Office of Personnel Management will be conducting studies for contracting out business-like functions to effect more efficient operations wherever possible.

The Office of Personnel Management is responsible for personnel management functions which include the following activities:

Staffing services.—This activity consists of: (a) recruiting; (b) examining; and (c) developing classification standards.

Workloads are reflected in the following table:

Production count:	1985 actual	1986 estimate	1987 estimate
Applications processed for Federal employment	786,500	968,500	1,026,500
Employment inquiries answered	3,060,493	3,767,500	3,993,000

Compensation.—The OPM administers compensation and benefits programs for the Federal employees and retired Federal employees. These include the Civil service retirement and disability fund, the Employees life insurance fund, the Employees health benefits fund, and the Retired employees health benefits fund.

Workloads are reflected in the following table:

Outlays	16,091,033	16,344,406	16,419,419

Payment of annuities under special acts.—These annuities are paid to persons who were employed on the construction of the Panama Canal or their widows and widows of former employees of the Lighthouse Service. Numbers of recipients are as follows:

	Sept 30 1985	Sept 30 1986	Sept 30 1987
Panama Canal annuitants	47	35	26
Lighthouse Service widows	222	209	196

Payment of Government share of retirement costs.—The Civil Service Retirement Amendments of 1969 provide for financing of the current year's costs of the unfunded liability created since its enactment on October 20, 1969. Any statute which authorizes (1) new or liberalized benefits, (2) extension of retirement coverage, or (3) pay increases, is deemed to authorize appropriations to the fund to finance the unfunded liability created.

Transfers for interest on unfunded liability and payment of military service annuities.—The Secretary of the Treasury is required to make annual payments from general revenues into the Retirement fund of an amount equivalent to: (1) interest on the unfunded liability ($9,186 million), and (2) annuity disbursements attributable to military service ($2,034 million). The Office of Personnel Management, at the end of each year, notifies the Secretary of the Treasury of the amount of payment to be made to the Retirement fund and reports such sums to the President and Congress. The unfunded liability on which the interest payment is computed is based on static economic assumptions, i.e. no inflation, which cause the liability to be understated. A more realistic estimate of the unfunded liability is made under Public Law 95-595 which requires dynamic assumptions which include future inflation. For 1984, the static unfunded liability on which interest was paid in 1985 was $190.6 billion as opposed to the more realistic estimate under Public Law 95-595 of $542.1 billion.

Payments for contribution deficiency.—The Social Security Amendments of 1983 make employees hired after December 31, 1983 subject to Social Security taxes. The Federal Employees' Retirement Contribution Temporary Adjustment Act of 1983, Public Law 98-168, provides that such employees will contribute only 1.3 percent of their basic pay to the various Federal retirement systems for interim coverage and that the appropriate agencies shall determine the amount of the contribution deficiency at the end of 1984, 1985, and 1986. The Office of Personnel Management will notify the Secretary of the Treasury of the deficiency for each fiscal year with respect to the Civil Service Retirement and Disability Fund, and an amount equal to the deficiency will be credited to the fund before the close of the fiscal year.

Payments for spouse equity.—The Civil Service Retirement Spouse Equity Act of 1985, Public Law 98-615, provides for the payment of survivor annuities to eligible former spouses of annuitants who died between September 1978 and May 1986 and who did not elect survivor coverage. The law authorizes the Office of Personnel Management to notify the Secretary of the Treasury of the amount of such annuities paid each fiscal year and directs the Secretary to credit this amount to the Civil Service Retirement and Disability Fund.

The Office of Personnel Management tests inductee candidates for the Department of Defense (DOD), performs training activities and miscellaneous services for Federal agencies, and conducts full field security investigations for other departments and agencies on a reimbursable basis.

Fees collected by the President's Commission on Executive Exchange are also credited to the revolving fund and are available for the Commission's use.

Budget program.—1987 training activities will emphasize greater use of private sector training sources by Federal agencies to strengthen their training programs.

This schedule reflects the effect of a legislative proposal to: (1) eliminate the 1987 COLA increase and define future COLA's at the Consumer Price Index less 2 percent; (2) phase-in a penalty for early retirement before age 62; (3) change survivor and student benefits to more closely conform with Social Security benefits; (4) revise the annuity calculation formula to include the high five average salary; (5) require employees and employing agencies to begin contributing more toward retirement costs; and (6) phase-in increased Postal Service and D.C. Government contributions to cover the dynamic normal cost of retirement benefits. These changes will align CSR benefits with those benefits afforded by the majority of private sector retirement plans.

Budget authority			
Outlays	−260,306	−230,553	−454,948

The fund provides for the cost of health benefits for: (1) active employees; (2) employees who retired after June 1960, or their survivors; (3) those annuitants transferred from the Retired Federal employees health benefits program as authorized by Public Law 93-246; and (4) the related expenses of the Office of Personnel Management in administering the program.

Budget program.—The balance of the fund is available for payments without fiscal year limitation. Numbers of participants at the end of each fiscal year are as follows:

	1985 actual	1986 estimate	1987 estimate
Active employees	2,322,000	2,350,000	2,350,000
Annuitants	1,446,000	1,486,000	1,526,000
Total	3,768,000	3,836,000	3,876,000

In determining a biweekly subscription rate to cover program costs, one percent is added for administrative expense, and three percent is added for a contingency reserve held by the Office of Personnel Management (OPM) for each carrier. The OPM is authorized to transfer unused administrative reserve funds to the contingency reserve.

For Postal Service employees, the Government's contribution to the health benefits premiums is 75 percent of the current unweighted average of the high option premiums of six large plans. For general schedule and wage-board employees, the Government's contribution is 60 percent.

This schedule assumes the enactment of timely legislation enabling refunds to FEHB enrollees.

Financing.—The fund is financed by: (1) withholdings from active employees and annuitants; (2) agency contributions for active employees, appropriated to agencies; and (3) Government contributions for annuitants appropriated to the Office of Personnel Management.

Operating results.—Funds advanced to carriers but not used to pay claims in the current period are carried forward as special reserves for use in subsequent periods.

The Office of Personnel Management maintains a contingency reserve, funded by employee and Government contributions, that may be used to defray future cost increases or provide increased benefits. OPM makes payments to carriers from this reserve whenever carrier-held reserves fall below levels prescribed by OPM regulations.

This fund finances insurance premiums paid to private insurance companies for Federal employees group life insurance and expenses of the Office of Personnel Management in administering the program. Separate cost data is maintained for employees regular group life insurance and insurance for members of former beneficial associations. The Federal Employees' Group Life Insurance Act of 1980 increases basic coverage for participants under age 45 and offers additional option coverages.

Budget program.—The status of the basic (regular and optional) life insurance program on September 30 is as follows:

	1985 actual	*1986 estimate*	*1987 estimate*
Life insurance in force (in billions of dollars):			
On active employees [1]	176	191	195
On retired employees	23	24	27
Total	199	215	222
Number of participants (in thousands):			
Active employees	2,497	2,497	2,497
Annuitants	1,348	1,378	1,408
Total	3,845	3,875	3,905

[1] Excludes amount of accidental death and dismemberment insurance

Financing.—For non-Postal Service employees, premium costs for the regular program are met by withholding 20 cents biweekly from the salaries of employees for each $1 thousand of life insurance and a 50 percent matching contribution by employer-agencies. The optional program is financed by withholding from employees' salaries or retirees' annuities. The beneficial association program is financed by direct collection from members. Most of the difference between receipt and benefit payments under the policy is held in reserve for paying future life insurance claims. The status of reserves at the end of the year is as follows (in millions of dollars):

Held in reserve:	*1985 actual*	*1986 estimate*	*1987 estimate*
Contingency reserve	50	50	50
Beneficial association program reserve	1	1	1
U.S. Treasury reserve	6,641	7,373	8,161
Total reserves	6,692	7,424	8,212

The contingency reserve for the basic program was reduced to $50 million as of June 30, 1976, and it is expected to remain at this level. Excess income from the program over benefit payments and other expenses is deposited in the U.S. Treasury to the credit of the Employees life insurance fund. The operations of the insurer for the regular and optional life insurance program is as follows: (in millions of dollars):

The Budget proposes to establish the Small Business Administration (SBA) as a new unit within the Department of Commerce, where it will continue to coordinate Federal small business programs and represent the interests of small business within the Executive Branch and to the Congress. SBA's Minority Small Business (Section 8(a) procurement assistance) program is proposed to be transferred to the Minority Business Development Agency in the Department of Commerce. The Treasury Department would assume, service, and liquidate the existing SBA loan portfolios.

The following activities will be conducted by SBA from its new location in the Department of Commerce: Procurement assistance, including the coordination and implementation of Federal small business procurement policy and the Certificate of Competency, Break-out procurement, and Small Business Innovation and Research programs; the Small Business Advocacy Office and the National Small Business Advisory Council, which provide information and conduct research on issues affecting small business; and the Service Corps of Retired Executives, which provides management counseling and training.

All Small Business Administration (SBA) direct and guaranteed loan programs are proposed for termination in 1987. The Business Loan and Investment Fund (BLIF) would be transferred to the Treasury where the existing direct and guaranteed loan portfolio would be liquidated. This proposal includes the Small Business Investment Company (SBIC) and Section 503 Development Company debentures and loans guaranteed by SBA and disbursed through the Federal Financing Bank (FFB). Except for direct loans to purchase defaulted guaranteed loans, no new loan commitments would be made by this account. The outstanding FFB portfolios for the SBIC and Section 503 programs would be repurchased by the BLIF in order to be sold to the public. The BLIF portfolio loan assets would be sold in 1987-1990.

This appropriation provides for the payment of compensation benefits to veterans and survivors. Previously, funds for this program were appropriated under the title "Compensation and Pensions."

Compensation is paid to veterans for disabilities incurred in or aggravated during active military service. Death and Indemnity Compensation (DIC) is paid to survivors of service persons or veterans whose death occurred while on active duty or as a result of service-connected disabilities.

The Administrator may pay a clothing allowance to each veteran who wears or uses a prosthetic or orthopedic appliance (including a wheelchair) which, in the judgment of the Administrator, tends to wear out or tear the clothing of such veteran.

"The Veterans' Compensation Rate Increase and Job Training Amendments of 1985" increased compensation rates for veterans, DIC rates for spouses and children, and the veterans' clothing allowance by 3.1 percent effective December 1, 1985.

Caseload and cost tables are shown below and reflect the 3.1 percent rate increase:

This appropriation provides for the payment of pension benefits to veterans and survivors. Previously, funds for this program were appropriated under the title "Compensation and Pensions."

Pension benefits may be paid to veterans or their survivors. Veteran's entitlement is based on active duty service of a specific length (normally 90 days or more) during a designated war period; disabilities considered permanent and total; and countable income below established levels. There is no disability requirement for survivor cases. Income support is provided at established benefit levels.

Veterans who are under the age 55 and who begin receiving pension during the test period, February 1, 1985 to January 31, 1989, will be evaluated to determine whether a vocational goal is reasonably feasible. Those for whom a vocational goal is feasible are eligible, during the test period, for a temporary program of vocational training.

Due to the "Veterans and Survivors' Pension Improvement Act of 1978," effective January 1, 1979, automatic annual cost-of-living increases comparable to annual social security increases are provided for those pensioners in the improved program and to parents receiving dependency and indemnity compensation. These increases, effective with payments made on January 1, are based on the same percentage as social security benefits are increased. The January 1, 1987 increase is expected to be 3.7 percent.

This appropriation finances the education and training of veterans and servicepersons whose service was, at least in part, between February 1, 1955 and December 31, 1976 (post-Korean conflict veterans and Vietnam era veterans). It also finances educational assistance allowances for certain peacetime veterans and for eligible dependents of those veterans: (a) who died from service-connected causes or have a total and permanent rated service-connected disability; and (b) servicepersons who were captured or missing in action. In addition, certain disabled veterans are provided with vocational rehabilitation, specially adapted housing grants, and automobile grants with the associated approved adaptive equipment. With the supplemental appropriation in 1986, the funding level in 1987 will be $176 million less than in 1986. This is due primarily to the decline in the number of Vietnam era veterans eligible for benefits.

Education and training.—The 1987 decrease in Vietnam era veteran and serviceperson trainees is attributable to veterans having used their entitlement or reaching their delimiting date.

The following table provides a comparison of trainees and costs for the three types of trainees included in education and training, and reflects the enactment of the 1986 supplemental appropriation.

Special assistance to disabled veterans.—Service disabled veterans requiring vocational rehabilitation receive assistance to cover the costs of subsistence, tuition, books, supplies, and equipment.

Specially adapted housing grants, up to a maximum of $35,500, are provided to certain severely disabled veterans. Veterans who suffer service-connected blindness or who have lost the use of both upper extremities can receive up to $6,000.

READJUSTMENT BENEFITS—Continued

An allowance, up to a maximum of $5,000, is provided to certain service-disabled veterans and servicepersons toward the purchase price of an automobile. Adaptive equipment and the maintenance and replacement of such equipment is also provided.

All-Volunteer Force educational assistance (New GI Bill). Public Law 98–525, enacted October 19, 1984, established two new peacetime educational programs: An assistance program for veterans who enter active duty during the period beginning July 1, 1985, and ending on June 30, 1988, and an assistance program for certain members of the Selected Reserve. Under current law, the Readjustment benefits appropriation pays the basic allowance for the peacetime veterans. A small number of veterans are expected to begin training in 1987. Supplementary educational assistance for peacetime veterans and the basic allowance for reservists are financed by payments from the Department of Defense and the Department of Transportation. Only payments for reservists are expected in 1985 and 1986.

The following table shows a caseload and cost comparison for these beneficiaries under existing legislation:

Military and naval insurance.—Payments are made to the U.S. Government life insurance fund for certain World War I veterans for extra hazards of military service and for claims on war risk insurance issued to servicemen and veterans of World War I.

National service life insurance.—Payments are made to the national service life insurance fund for certain World War II veterans for: (a) the extra hazards of service; (b) gratuitous insurance granted to certain persons unable to apply for national service life insurance; (c) death claims on policies under waiver of premiums while the insured was on active duty.

Payments are also made to policyholders and beneficiaries on nonparticipating national service life insurance policies issued to World War II veterans with service-connected disabilities and on worthy exceptional cases that would not have been covered under the law in effect at the time of death.

The general decline in the number of policies and the amount of insurance in force is expected to continue in 1987 as indicated in the following table (dollars in thousands).

In 1987 increased costs are associated with: (1) operational requirements of new facilities; (2) uncontrollable payroll increases; (3) increased cost of drugs, utilities, communications, provisions, prosthetics, medical and dental supplies and operating supplies; and (4) enhancements for the decentralized hospital computer program (DHCP). These increased costs are offset by: (1) a one percent reduction in employment due to productivity increases; (2) the reduction of available funds for treatment of veterans with the lowest priority for care; and (3) the reduction of funds for beneficiary travel.

Maintenance and operation of VA facilities—

VA hospital care.—Costs for 1987 are estimated to decrease by $205,271 thousand for operating the medical, surgical, and psychiatric bed sections in 172 VA hospitals.

Estimated operating levels are:

	1985 actual	1986 estimate	1987 estimate
Patients treated	1,305,702	1,305,702	1,247,667
Average daily census	59,310	57,662	55,004
Average employment (including education and training)	140,742	140,024	132,908
Ratio average employment to census	2.37	2.42	2.42

Nursing home care.—An increase of $34,962 thousand in 1987 is estimated for operation of nursing care beds in 119 facilities.

Estimated operating levels are:

	1985 actual	1986 estimate	1987 estimate
Patients treated	20,442	21,523	22,296
Average daily nursing patient census	9,556	10,592	10,972
Average employment (including education and training)	12,137	13,452	14,000

Domiciliary care.—In 1987, an increase of $2,165 thousand is estimated for the care of domiciliary members in 16 facilities.

Estimated operating levels are:

	1985 actual	1986 estimate	1987 estimate
Patients treated	13,126	13,307	13,364
Average daily member census	5,979	6,218	6,245
Average employment (including education and training)	2,414	2,488	2,487

Outpatient care.—A decrease of $57,581 thousand is estimated in 1987 for the cost of outpatient medical and dental care provided by staff and by physicians and dentists participating under a fee basis arrangement for certain eligible veterans.

Miscellaneous benefits and services.—This covers such items of nondirect medical care and treatment as beneficiary travel, care of the dead, operation of personnel quarters at medical facilities, and the cost of furnishing supply, engineering, housekeeping, and other administrative support services to other departments on a nonreimbursable basis. It also includes the cost of the readjustment counseling program. The decrease in the estimated cost in 1987 from 1986 of $78,158 thousand reflects the reduction of funds for beneficiary travel, offset by increases for staff training (associated with the postgraduate and inservice training appropriation transfer) and for uncontrollables.

	1985 actual	1986 estimate	1987 estimate
Average employment	5,042	5,042	4,991

Medical research.—This program is comprised of institutional and special research. In addition to the broad spectrum of biomedical research projects, priority is given to research on agent orange and conditions that frequently occur among veterans such as aging, alcoholism, schizophrenia, delayed stress disorders, and spinal cord injury and tissue regeneration. Cooperative studies include surgical treatment of angina pectoris, adjunct treatment of diabetes, and relative potency and side-effect liability of new and marketed sedatives. This budget request includes $3,450 thousand for continuation of an Agent Orange Epidemiological Study being conducted by the Centers for Disease Control, Department of Health and Human Services.

Rehabilitation research.—This program is dedicated to the development and application of science and technology to improve the care of the physically disabled veteran through prostheses for the amputee, improved wheelchairs for the paralyzed, and better joint functions for the arthritic. It also includes care for those with visual, hearing and speech disorders.

Health services research.—This program provides support for health services projects at VA medical centers for improving the effectiveness and economy of delivery of health services and improving the accessibility of services to veterans. The 1987 request provides resources for the evaluation of the VA's adult day health care program, as required by Public Law 98-160.

Medical, hospital, nursing home, and domiciliary administration.—Central office staff elements will continue to provide executive direction of all agency medical programs through program development, implementation, and administration of policies, plans, and objectives. In 1987, funding for the Facility Engineering, Planning, and Construction Office will be transferred from this activity to the Construction, minor projects appropriation.

Postgraduate and inservice training.—Program assists Department of Medicine and Surgery and certain other VA personnel in maintaining and upgrading their knowledge and skills. In 1987, funding for this program is transferred to the Medical care appropriation and to the Medical, hospital, nursing home, and domiciliary administration program within this appropriation to support the continuing education needs of employees whose salaries are paid by each of the two appropriations.

Health professional scholarship.—Program provided grants for tuition, stipend, and other educational expenses for eligible students in programs leading to a degree in nursing.

This appropriation provides for the administration of nonmedical veterans benefits through the Department of Veterans Benefits (DVB); operation and maintenance of 109 national cemeteries by the Department of Memorial Affairs; and top management direction and administrative support, including data processing, fiscal, personnel, and legal services through agency-level staff offices.

Veterans benefits.—Determines eligibility and adjudicates all claims for compensation, pensions, educational assistance, housing loan assistance, and insurance awards. Beginning in 1987, greater efficiencies will be achieved as a result of an initiative to modernize the data processing and telecommunications capabilities of DVB. A summary of program objectives and anticipated workload is included in the following paragraphs:

Veterans services.—Provides information, advice, and assistance concerning the availability and procurement of benefits under the law to all veterans, their dependents, and survivors.

The major construction request emphasizes correction of deficiencies in existing facilities. Funding is provided for the construction of two replacement medical centers at Augusta, GA, and Baltimore, MD, the design of a modernization project at North Chicago, IL, and a replacement medical center at Dayton, OH. Additional funds are included to remove asbestos when it is encountered during construction.

The request contains projects which will address fire and safety improvements and electrical deficiencies. In addition, construction funding is provided for two clinical improvement projects, a research and education project and a general project.

The Construction, minor projects appropriation, which funds construction projects costing less than $2 million, is used to modernize patient wards, correct code deficiencies, and update indirect patient care functions. The request includes personnel and administrative costs for the Office of Facilities, which carries out the major and minor construction programs. In 1987, funding for the Facility Engineering, Planning, and Construction Office will be transferred to this activity from the Medical administration and miscellaneous operating expenses appropriation.

[1] The 1986 loan level is subject to sequestration under Public Law 99-177. The post-sequestration loan level constitutes a de facto limitation.

The purpose of the VA home loan guaranty program is to facilitate the extension of mortgage credit on favorable terms by private lenders to eligible veterans. In the event of foreclosure, the Federal guaranty protects lenders against losses up to a maximum of the lesser of 60 percent of the mortgage amount or $27,500.

Budget program.—

Acquisition of homes.—The number of acquisitions is expected to decline while the average cost is expected to increase for 1987.

	1985 actual	1986 estimate	1987 estimate
Number of property acquisitions processed	23,360	23,440	21,300
Average amount per acquisition	$43,093	$45,957	$49,502
Total obligations (in thousands)	$1,006,652	$1,077,229	$1,054,393

Property improvements.—During 1987 fewer properties will be acquired and lower total expenditures for capital improvements will be necessary to place or maintain properties in the inventory in salable condition.

	1985 actual	1986 estimate	1987 estimate
Number of properties improved	25,375	25,240	23,100
Average amount per property	$1,302	$1,498	$1,630
Total obligations (in thousands)	$33,018	$37,820	$37,653

Repurchase of loans sold, net.—The repurchase estimate for loans is estimated to increase in 1987 due to higher average loan amounts.

[1] The 1986 loan level is subject to sequestration under Public Law 99-177. The post-sequestration loan level constitutes a de facto limitation.

This fund finances the payment of claims on nonparticipating life insurance policies issued and currently is open for new issues to veterans having service-connected disabilities. The program provides insurance coverage for service-disabled veterans at standard rates. Administrative expenses are paid from the General operating expenses appropriation.

Operating costs—

Death claims.—Represents payments to designated beneficiaries.

All other.—Represents payments to policyholders who surrender their policies for their cash value and hold endowment policies which have matured.

Capital investment.—A policyholder may borrow up to 94 percent of the value of his policy.

The trend in the number and amount of policies in force is indicated in the following table (dollars in thousands):

	1985 actual	*1986 estimate*	*1987 estimate*
Number of policies	186,585	184,065	181,565
Insurance in force	$1,691,985	$1,663,862	$1,639,878

Financing.—Operations are financed from premiums and other receipts. Additional funds are received by transfer from the Veterans insurance and indemnities appropriation, instead of direct appropriations to this fund.

Operating results and financial condition.—Since premium and other receipts are insufficient to cover operations, the fund continues to project liabilities in excess of assets. The deficit is expected to reach an estimated $224 million by September 30, 1987.

[1] The 1986 loan level is subject to sequestration under Public Law 99-177. The post-sequestration loan level constitutes a de facto limitation.

This fund pays claims and administrative costs on participating life insurance policies issued during the period May 1, 1965, through May 2, 1966, under three life insurance programs: (1) service-disabled standard insurance, (2) service-disabled rated insurance, and (3) nonservice disabled insurance availing disabled World War II and Korean conflict veterans an opportunity to acquire life insurance coverage who were no longer eligible for other Government insurance.

Budget program—

Death claims.—Represents payments to designated beneficiaries.

Dividends.—Policyholders participate in the distribution of annual dividends.

All other.—This represents payments to the General operating expenses appropriation for the administrative costs of processing claims and maintaining the accounts, and to those policyholders who: (a) surrender their policies for cash value; (b) hold endowment policies which have matured; and (c) have purchased total disability income coverage and subsequently become disabled.

Policy loans made.—A policyholder may borrow up to 94 percent of the cash value of his policy at an interest rate adjusted to reflect private sector borrowing costs.

The following table reflects the decrease in the number of policies and the amount of insurance in force (dollars in thousands):

	1985 actual	1986 estimate	1987 estimate
Number of policies	144,053	132,213	128,983
Insurance in force	$986,671	$923,234	$899,309

Financing.—Operations are financed from premiums collected from policyholders and interest on investments. Excess earnings of the fund are now distributed to the policyholders in the form of an annual dividend.

Legislation will be requested to repeal the authority permitting the Veterans Administration to make education loans, effective October 1, 1986. The VA Education Loan Program has experienced excessively high default rates. Congress has previously acted to repeal loans available to most veterans. Full repeal of this program would reduce a source of continuing overpayments.

VOCATIONAL REHABILITATION REVOLVING FUND

During 1987, within the resources available, gross obligations for direct loans are authorized in such amounts as may be necessary to carry out the purposes of the "Vocational rehabilitation revolving fund" (38 U.S.C. chapter 31).

This fund provides loans up to $620 to veterans enrolled in a program of vocational rehabilitation who are temporarily in need of additional funds to meet expenses.

Budget program.—Interest-free direct loans are granted to veterans in vocational rehabilitation training. The loans are repaid over a period of 10 months by offset from benefit payments.

Financing.—With initial capitalization through an appropriation, the fund is financed solely by repayments. Administrative expenses are borne by the general operating expenses appropriation.

Operating results.—The following table presents operating results:

This revolving fund, established pursuant to the Veterans Omnibus Health Care Act of 1976, Public Law 94-581, provides a mechanism for the furnishing of rehabilitative services to certain veteran beneficiaries who are receiving medical care and treatment from the Veterans Administration.

Funds to operate the various rehabilitative activities and provide for the therapeutic work for remuneration for patients and members in Veterans Administration health care facilities are derived from contractual arrangements with private industry or nonprofit entities. This is a self-sustaining fund, and therefore no appropriation is required to support these activities.

Under the provisions of 38 U.S.C. 5021, the Supply fund finances, on a reimbursable basis, the cost of warehouse inventories at depots and field stations and selected items of equipment procured centrally. It also finances, on the same basis, items and services to other Federal agencies who either request or are assigned to the Veterans Administration for support by the Office of Federal Procurement Policy.

Budget program.—The fund provides financial support for: (1) maintenance of depot and field station inventories; (2) maintenance and operation of three supply depots; (3) operation of a service and reclamation program operating out of the supply depots; (4) centralized periodical procurement and library cataloging; (5) a marketing center or central buying office; and (6) a publications depot that provides forms for VA installations on a centralized basis.

The Supply fund does not finance costs for the operation and administration of supply activities at VA field stations. These costs are charged directly to applicable appropriations.

Intragovernmental funds—Continued

SUPPLY FUND—Continued

Financing.—Costs of supplies, equipment, and services acquired through the Supply fund and Supply fund operating costs are recovered through reimbursements from the VA appropriations and other Government agencies receiving goods and services. For 1987 Supply fund sales are estimated to reach $775 million. Average inventory needed to support those sales will be $120 million.

Operating results.—The fund operated at a profit of $654 thousand in 1985. The new total of retained earnings is $45.7 million, which has been used to finance inventory growth. Operating expense as related to sales was 4.9 percent.

This account consists of voluntary contributions by eligible servicepersons and matching contributions provided by the Department of Defense. The fund provides educational assistance payments to participants who entered the service after December 31, 1976, and are pursuing training under chapter 32, title 38, U.S.C. Public Law 96-342, the Department of Defense Authorization Act, 1981, added two educational assistance programs for certain individuals who enlisted or reenlisted in the Army, Navy, Air Force or Marine Corps after September 30, 1980 and before October 1, 1981. Section 901 of that act is a non-contributory program with educational assistance provided by the Department of Defense. Section 903 authorizes the Department of Defense to make monthly contributions for certain post-Vietnam era participants. Public Law 98-525, enacted October 19, 1984, precludes new enrollments into this program during the period July 1, 1985 to June 30, 1988, while enrollment for the All-Volunteer Force Education Program is open. The estimated activity in the fund follows:

Legislation will be proposed that will close the All-Volunteer Force GI bill to new enrollments effective October 1, 1986. This proposal will reopen the Post-Vietnam Era program for new enrollments at that time. This would result in an additional $59.2 million in servicepersons' contributions in 1987.

This fund consists of gifts, bequests, and proceeds of sale of property left in the care of the facilities by former beneficiaries, patient's fund balances and proceeds of sale of effects of beneficiaries who die leaving no heirs or without having otherwise disposed of their estate. Such funds are used to promote the comfort and welfare of veterans at hospitals, nursing homes, and domiciliaries where no general appropriation is available. (38 U.S.C. chs. 83 and 85.)

This fund was established in 1940 for the World War II servicemen's and veterans' insurance program. Over 22 million policies have been issued under this program. Activity of the fund reflects a rising claim and loan workload. The trend in the number and amount of policies in force is shown as follows (dollars in thousands):

	1985 actual	1986 estimate	1987 estimate
Number of policies	3,105,575	3,004,945	2,906,155

This fund is operated on a commercial basis to the extent possible except that administrative expenses are charged to the General operating expenses account.

The income of the fund is derived from premium receipts, interest on investments, and payments which are made to the fund from the Veterans insurance and indemnities appropriation.

Assets of the fund, which are largely invested in special Treasury interest-bearing securities and in policy loans, are expected to increase from $11,026 million as of September 30, 1986 to $11,225 million as of September 30, 1987. The actuarial estimate of policy obligations as of September 30, 1986, totals $10,961 million, leaving a balance of $65 million for contingency reserves.

The 1986 data presented in the preceding tables and narrative do not reflect the impact of Public Law 99-177, the Balanced Budget and Emergency Deficit Control Act of 1985.

This fund was established in 1919 to receive premiums and pay claims on insurance issued under the provisions of the War Risk Insurance Act. The general decline in the activity of the fund is indicated in the following table (dollars in thousands):

The fund is operated on a commercial basis to the extent possible except that administrative expenses are charged to the General operating expenses account.

The income of the fund is derived from interest on investments, premiums, and payments from the Veterans insurance and indemnities appropriation. Effective January 1, 1983, premiums were discontinued since reserves held in the fund were adequate to meet future liabilities of the program.

Assets of the fund, which are largely invested in interest-bearing securities and policy loans, are estimated to decrease from $275 million as of September 30, 1986, to $248 million as of September 30, 1987, as an increasing number of policies mature through death or disability. The actuarial evaluation of policy obligations as of

This fund finances the payment of claims on life insurance policies issued before January 3, 1957, to veterans who served in the Armed Forces subsequent to April 1, 1951. No new policies can be issued. Policyholders may elect to purchase total disability income coverage with the payment of additional premiums.

Budget program—

Death claims.—Represents payments to designated beneficiaries.

Cash surrenders.—A policyholder may terminate his or her insurance by cashing in the policy for its cash value.

Dividends.—Policyholders participate in the distribution of annual dividends.

All other.—Classified in this category are payments to policyholders who: (a) hold endowment policies which have matured; (b) have purchased total disability income coverage and subsequently become disabled; and (c) are paid interest on dividend credits and deposits.

The following table reflects the decrease in the number of policies and the amounts of insurance in force (dollars in thousands):

	1985 actual	*1986 estimate*	*1987 estimate*
Number of policies	366,543	355,513	340,013
Insurance in force	$3,218,759	$3,042,343	$2,928,765

Financing.—Payments from this fund are financed primarily from premium receipts and interest on investments.

Operating results and financial condition.—Favorable mortality experience on insurance written against this fund has kept death claim payments well below the amount of premium and interest receipts, thereby producing an annual increase in the total revenue of the fund. Excess earnings of the fund are now distributed to the policyholders in the form of an annual dividend.

ADMINISTRATIVE PROVISIONS

(INCLUDING TRANSFER OF FUNDS)

Not to exceed 5 per centum of any appropriation for [1986] *1987* for "Compensation [and pensions]", *"Pensions", "Burial benefits and miscellaneous assistance",* "Readjustment benefits", and "Veterans insurance and indemnities" may be transferred to any other of the mentioned appropriations, but not to exceed 10 per centum of the appropriations so augmented.

Appropriations available to the Veterans Administration for [1986] *1987* for salaries and expenses shall be available for services as authorized by 5 U.S.C. 3109.

No part of the appropriations in this Act for the Veterans Administration (except the appropriations for "Construction, major projects" and "Construction, minor projects") shall be available for the purchase of any site for or toward the construction of any new hospital or home.

No part of the foregoing appropriations shall be available for hospitalization or examination of any persons except beneficiaries entitled under the laws bestowing such benefits to veterans, unless reimbursement of cost is made to the appropriation at such rates as may be fixed by the Administrator of Veterans Affairs.

One or more pilot programs shall be conducted to determine the effectiveness of utilizing private contractual services to assist in the administrative collection of various types of delinquent debts or other funds due the Government. *(Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1986.)*

[Notwithstanding any other provision of this joint resolution, up to $8,000,000 of the funds appropriated for the Veterans Administration under the heading "Medical care" in Public Law 99-160 may be transferred to and merged with the funds provided under the heading "General operating expenses".]

[Notwithstanding any other provision of law or this joint resolution, the Administrator of Veterans Affairs shall delegate to hospital directors the authority to administer not less than 15 of the new fiscal year 1985 major construction projects and not less than 10 of the new fiscal year 1986 major construction projects in the manner and under the conditions established for the delegation of the nursing home care construction projects at Ann Arbor, Tampa, and Fresno. The Administrator shall submit to the Committees on Appropriations of the House of Representatives and the Senate a list of the proposed delegations not later than 15 days after enactment of this joint resolution. The Administrator shall, within available resources, provide additional funds and personnel ceilings to each hospital director with a delegated project for necessary and adequate engineering, contracting, and other technical support. The delegation of authority for actual construction of said facilities shall be at the discretion of the selected hospital directors.] *(Public Law 99-190, making further continuing appropriations for the fiscal year 1986.)*

Volunteers in Service to America.—The service learning programs will assist secondary and post-secondary educational institutions to establish and maintain service learning activities for both students and their communities. The Young Volunteers in ACTION program expands the use of student volunteers in poverty-related problem areas. The VISTA program provides full-time volunteers to assist communities working to resolve local problems in the areas of literacy, drug abuse prevention, youth (child abuse, runaways, etc.), refugees, food banks, and other agency emphasis areas.

Citizen participation and volunteer demonstration programs.—These programs stimulate and encourage volunteer services and provide community groups with small grants for project impetus and assistance. In 1987, these grants will aid the expansion of private volunteer activities and programs addressing drug abuse, illiteracy, and the problems of runaway youth.

Older American volunteer programs.—These programs provide opportunities for people aged 60 and over to volunteer their services to the community by working with the emotionally disturbed, the mentally retarded and physically handicapped, the infirm, and the isolated elderly. In 1987, approximately 18,775 Foster Grandparent volunteers will serve about 66,000 children. Emphasis will be on preventing institutionalization of children and on returning children to communities. The Retired Senior Volunteer program will support 378,500 part-time volunteers providing service in the areas of health, nutrition, education, the problems of troubled youth, refugee assistance, crime prevention, and other community services. Approximately 6,200 volunteers in the Senior Companion program will provide long-term care services to about 22,000 frail and elderly Americans.

Program support.—Costs of program direction and administration are financed by this activity.

The Conference assists the President, the Congress, and the Federal departments and agencies in improving administrative procedure. It conducts studies of the efficiency, adequacy, and fairness of the procedures that the agencies and departments use to determine the rights, privileges, and obligations of private persons. The Conference issues formal recommendations for improvements and then encourages their implementation.

In addition to its research activities, the Conference also arranges for the interchange among administrative agencies of information useful in improving administrative procedure and, on an ongoing basis, furnishes assistance and advice on matters of administrative procedure to the agencies, Congress, and others.

The Conference receives funds from other Federal agencies for special projects carried out by the Conference pursuant to agreements with these agencies.

The Advisory Committee on Federal Pay was appointed in accordance with the Federal Pay Comparability Act of 1970. The Committee assists the President in carrying out the policy of comparability in pay between major Federal statutory pay systems and private enterprise. The Committee reviews the annual report of the President's pay agent and considers the recommendations of representatives of Federal employees and other officials of the Federal Government. The Committee then prepares for the President an independent report with its findings and recommendations.

The Committee meets jointly throughout the year with the President's pay agent and the Federal Employees Pay Council in an attempt to reach early resolution of issues between them. It provides advisory opinions on unresolved issues.

The Architectural and Transportation Barriers Compliance Board was established by Section 502 of the Rehabilitation Act of 1973 to ensure compliance with the Architectural Barriers Act of 1968. Its primary role is to carry out a compliance program to ensure accessibility and usability of most Federal and Federally-funded buildings by physically handicapped persons. In 1987, the Board will continue to process, investigate, and resolve complaints of noncompliance. In 1985, 249 complaints were received. Emphasis is on voluntary, amicable resolution of access issues.

The Board also develops Federal minimum accessibility guidelines and requirements for the standards under the Architectural Barriers Act, and provides technical assistance to public and private organizations affected by Federal accessibility regulations.

On January 1, 1985, the Civil Aeronautics Board ceased to exist and a number of its remaining functions transferred to the Department of Transportation (DOT), consistent with the requirements of the Airline Deregulation Act of 1978 and the Civil Aeronautics Board Sunset Act of 1984. Most of the activities financed under the Board's Salaries and Expenses appropriation have been transferred to the Department's Office of the Secretary where it is included under the Salaries and Expenses and Working Capital Fund appropriations. The balance of the activities have been transferred to the Federal Aviation Administration, Office of the Inspector General, and the Research and Special Programs Administration in the DOT.

The Commission engages in studies concerning areas in which there may be denials of civil rights and reports on these matters to the President and the Congress. Hearings by the Commissioners are held to investigate and obtain information about denials of civil rights. Conferences and open meetings are held by staff and State Advisory Committees to gather data and issue reports providing information about civil rights problems. In addition, appraisals of Federal agencies' civil rights programs are made and complaints alleging discrimination are referred to the proper Federal agencies.

The Commission provides liaison with private groups, public groups, and the media to provide civil rights information to Government officials, organizations, and the public. This is sometimes accomplished through the issuance of Commission publications. It also provides a library resource to support civil rights research, studies, hearings, and other Commission activities, and makes this information available to the general public.

the blind and other severely handicapped and, whenever possible, to prepare them to engage in normal competitive employment. In 1987, 17,395 blind and handicapped individuals are projected to be employed in 355 producing workshops. The committee determines which commodities and services are suitable for Government procurement from qualified nonprofit agencies serving the blind and other severely handicapped; publishes a procurement list of such commodities and services; determines the fair market price for commodities and services on the procurement list; and makes rules and regulations necessary to carry out the purposes of the Act. The committee proposes to have 2,060 items on its procurement list, and estimated workshop sales of $330 million.

The committee staff supervises the selection and assignment of new commodities and services, assists in establishing prices, reviews and adjusts these prices, verifies the qualifications of workshops, and monitors their performance.

The Commodity Futures Trading Commission (CFTC) administers the Commodity Exchange Act of 1936, as amended. The purpose of the CFTC is to further the economic utility of the futures markets by encouraging their efficiency, assuring their integrity, and protecting participants against abusive trade practices, fraud, and deceit. The object of commodity futures trading regulation is to enable the markets to better serve their designated functions of providing a price discovery mechanism and a means of offsetting price risk. By properly serving these functions, the futures markets serve the public interest by contributing toward better planning, more efficient distribution and consumption, and more economical marketing.

Market surveillance, analysis and research.—Responsibilities under this program include daily surveillance of the market activity of large individual traders and fundamental economic market factors to insure orderly markets. Contract terms and conditions are reviewed to insure conformity with current cash marketing conditions and adequate deliverable supplies. This program also systematically investigates the functioning of markets and market users and develops better tools to assist in detecting and preventing price distortions.

Enforcement.—The enforcement program is responsible for detecting, investigating, and litigating violations of the Act or regulations. These violations may include actual and attempted market manipulations, cheating and defrauding customers, and abusive trading practices such as fictitious trading, wash trading, and prearranged trading. This program may seek redress through the administrative process or by injunctive actions in the Federal Courts.

Product safety and enforcement.—The Commission addresses a number of product safety areas. These include fire and thermal burn hazards, electrical hazards, acute and chronic chemical hazards, children's and recreational product hazards, power equipment hazards, and household structural products hazards. In each program area, the Commission undertakes a wide spectrum of activities, including data collection, voluntary and mandatory standard development, enforcement, and information dissemination. The appropriation also contains special, one-time funds for the interagency Cigarette Fire Safety Study, scheduled for completion in 1987.

The appropriation for the Corporation for Public Broadcasting is enacted two years in advance. For 1988, an appropriation of $214 million was enacted in 1986. Although public broadcasting is an important national resource, a funding level of $214 million is incompatible with the urgent need to reduce Federal spending. The Administration is, therefore, requesting a $44 million rescission for a $170 million appropriation in 1988. For 1989, the Administration is requesting $130 million.

Under current authorizing legislation, the Corporation for Public Broadcasting has two major activities: (1) direct payments to public television and radio stations to be used at their discretion for purposes related primarily to program production or acquisition; and (2) support for the production and acquisition of radio and television programs for national distribution. In addition, the Corporation assists in the financing of several system-wide activities, including national satellite interconnection services and the payment of music royalty fees, and provides limited technical assistance, research, and planning services to improve system-wide capacity and performance.

DISTRICT OF COLUMBIA

Federal Funds

General and special funds:

FEDERAL PAYMENT TO THE DISTRICT OF COLUMBIA

For payment to the District of Columbia for the fiscal year ending September 30, 1987, $444,500,000, as authorized by the District of Columbia Self-Government and Governmental Reorganization Act, Public Law 93–198, as amended (D.C. Code 47–3406).

For payment to the District of Columbia for the fiscal year ending September 30, 1987, in lieu of reimbursements for charges for water and water services and sanitary sewer services furnished to facilities of the United States Government, $28,810,000, as authorized by the Act of May 18, 1954, as amended (D.C. Code, secs. 43–1552 and 43–1612).

For the Federal contribution to the Police Officers and Fire Fighters', Teachers' and Judges' Retirement Funds, as authorized by the District of Columbia Retirement Reform Act, approved November 17, 1979, (93 Stat. 866; Public Law 96–122), $52,070,000.

[SAINT ELIZABETHS HOSPITAL]

TRANSITIONAL PAYMENT FOR SAINT ELIZABETHS HOSPITAL

For a Federal contribution to the District of Columbia, as authorized by the Saint Elizabeths Hospital and District of Columbia Mental Health Services Act, approved November 8, 1984 (98 Stat. 3369; Public Law 98–621), $35,000,000.

The Federal payment of $444.5 million is intended to defray expenses of the government of the District of Columbia. Discussions are occurring between the administration and the District of Columbia government designed to produce a formula Federal payment. This appropriation also includes a payment of $28.8 million for water, water services, and sanitary sewer services rendered to Federal facilities by the District of Columbia during 1987 (act of May 18, 1954, as amended). This appropriation also includes a contribution of $52.1 million which represents the Federal share of payments to District of Columbia retirement funds for police officers, fire fighters, teachers and judges (act of November 17, 1979). Finally, this appropriation includes a payment of $35.0 million to assist in financing St. Elizabeths Hospital as part of a six-year plan to transfer administrative and financial responsibility from the Federal Government to the District (Public Law 98-621).

The Equal Employment Opportunity Commission (EEOC) is the Federal agency responsible for enforcement of: the Age Discrimination in Employment Act of 1967; title VII of the Civil Rights Act of 1964; the Equal Pay Act of 1963; and, in the Federal sector only, section 501 of the Rehabilitation Act of 1963. These acts prohibit employment discrimination based on race, sex, religion, national origin, age, or handicap status. The Equal Employment Opportunity Commission is also responsible for carrying out Executive Order 12067 which promotes coordination and minimizes conflict and duplication among Federal agencies which administer statutes or regulations involving employment discrimination.

WORKFLOW ANALYSIS

Complaints resolved	16,053	17,075	18,336

The budget for the agency supports three activities:

Executive direction and program support.—This activity provides for the direction and coordination of the Commission's programs. It also provides administrative and management support services for the agency.

Enforcement.—This activity resolves charges of employment discrimination filed with the Commission; litigates cases against respondents unwilling to comply with title VII, the Equal Pay Act, or the Age Discrimination Employment Act; carries out systemic enforcement; and promotes the participation of handicapped individuals in the Federal work force.

State and local grants.—This activity provides funds to State and local fair employment practice (FEP) agencies to assist in the resolution of employment discrimination complaints.

The purpose of the Export-Import Bank is to aid in financing and promoting U.S. exports.

To accomplish its objectives, the Bank's authority and resources are used to: assume commercial and political risks that exporters or private institutions are unwilling or unable to undertake; overcome maturity and other limitations in private sector export financing; assist U.S. exporters to meet foreign officially sponsored export credit competition; and provide leadership and guidance in export financing to the U.S. exporting and banking communities and to foreign borrowers. The bank is also actively assisting small- and medium-sized businesses to increase their exports by publicizing the Bank's programs.

A limitation of $12.0 billion for loan guarantees is proposed for 1987.

Public enterprise funds:

LIMITATION ON REVOLVING FUND FOR ADMINISTRATIVE EXPENSES

Not to exceed $39,420,000 (from assessments collected from farm credit system banks) shall be obligated during the current fiscal year for administrative expenses, as authorized under 12 U.S.C. 2249.

Note.—A regular 1986 limitation for this account had not been enacted at the time this budget was prepared. A continuing resolution (Public Law 99-190) limits funds to the extent and in the manner provided for in the conference version of H.R. 3037, making appropriations for Agriculture, Rural Development, and Related Agencies, 1986.

The Farm Credit Administration examines and regulates a coordinated agricultural credit system of farm credit banks and associations which lend to farmers, ranchers and their cooperatives.

The System is comprised of 12 Federal land banks, 12 Federal intermediate credit banks, 13 Banks for cooperatives and approximately 700 Federal land bank associations and production credit associations.

Assessments based upon estimated administrative expenses are collected from institutions in the Farm Credit System and are available for administrative expenses. Obligations are incurred within fiscal year budgets approved by the Farm Credit Administration Board.

FEDERAL DEPOSIT INSURANCE CORPORATION

The Federal Deposit Insurance Corporation was created by the Banking Act of 1933 to provide protection for bank depositors and to foster sound banking practices. The deposit insurance ceiling protection has been $100,000 since March 31, 1980. In order to accomplish its varied functions in the protection of bank depositors, the Corporation is authorized to promulgate and enforce rules and regulations relating to the supervision of insured banks and to perform other regulatory and supervisory duties consistent with its responsibilities as insurer. The major portion of the Corporation's operations consists of the examination of State banks that are not members of the Federal Reserve System and liquidation activities attendant to insured banks that have closed.

The insurance fund is supported by an authorization to borrow up to $3 billion from the Treasury of the United States. No borrowing under this authorization has been made to date and none is anticipated in 1986 and 1987.

In order to facilitate deposit assumptions and mergers, or to assist operating banks, the Corporation is authorized to purchase notes issued by the assuming or acquiring bank, or in the case of direct assistance, notes issued by the operating bank. The above schedule reflects the outstanding principal amounts of these notes, projected repayments based on the notes agreements, and estimated additional disbursements and repayments during 1986 and 1987.

Income of the Corporation is derived principally from insurance assessments paid by insured banks and interest on investment in U.S. Government securities. As of September 30, 1985, the deposit insurance fund amounted to $16.7 billion. The entire fund represents the accumulated net income of the Corporation and is reserved for the protection of depositors in insured banks and for payment of administrative and insurance expenses. No funds derived from taxes or Federal appropriation are allocated to or used by the Corporation in any of its operations.

The estimates for 1986 and 1987 in these statements make provision for losses and expenses which might occur by reason of the closing of any bank after September 30, 1985.

Civil defense.—The civil defense programs feature an Integrated Emergency Management System approach. The programs are designed to develop generic evacuation and in-place protection plans and functional emergency capabilities to mitigate, prepare for, respond to, and recover from emergencies caused by natural, technological, and attack-related hazards.

Comprehensive emergency preparedness planning.—This program provides for the enhancement of State and local governments' capability to prepare for, respond to, and mitigate disasters and emergencies. Program activities include analyses, needs assessments, technical guidance and financial support designed to assist State and local governments in developing a comprehensive approach to preparedness planning. A primary instrument for implementing CEPP is the disaster preparedness improvement grant program. These annual grants provide up to $25,000 to States on a 50/50 match basis for improving or maintaining disaster assistance plans. All but a few States are participants in this program.

Radiological emergency preparedness.—This program provides assistance to State and local governments through the issuance of guidance, review and approval of plans, and evaluation of exercises. The program is focused on improvement of State and local capabilities to cope with radiological accidents at commercial nuclear power plants, other fixed nuclear facilities, nuclear materials license holders and transportation of radioactive materials.

Federal preparedness.—The goals of the Federal preparedness activity are to achieve Government readiness to ensure that the Nation will be able to respond to, manage, and recover from peacetime or wartime national security emergencies and to enable Government, at all levels, to cope with the consequences of accidental, natural, and man-caused occurrences.

Training and fire programs.—This activity prepares Federal, State and local officials, their supporting staff, and the public to meet the responsibilities and challenges of domestic emergencies through planning, mitigation, preparedness, response, and long-term recovery. Educational programs are provided through the Emergency Management Institute and the National Fire Academy. In addition, the U.S. Fire Administration concentrates on providing a Federal focus on identifying problems with which the Nation's fire and rescue services must deal, finding solutions to these problems, and supporting State and local fire protection and emergency rescue efforts. The activities of the U.S. Fire Administration are being eliminated in 1987.

Flood plain management.—This activity involves the operation of a program that combines mapping, regulatory, and technical-assistance efforts for the purposes of responding to known flood hazards and mitigating their effects through a comprehensive approach to the management of flood plains. This activity will be funded through the National Flood Insurance Fund in 1987.

[EMERGENCY FOOD AND SHELTER PROGRAM]

[There is hereby appropriated $70,000,000 to the Federal Emergency Management Agency, to remain available until September 30, 1986, to carry out an emergency food and shelter program. Notwithstanding any other provision of this or any other Act, such amount shall be made available under the terms and conditions of the following paragraphs:

The Director of the Federal Emergency Management Agency shall, as soon as practicable after enactment of this Act, constitute a national board for the purpose of determining how the program funds are to be distributed to individual localities. The national board shall consist of seven members. The United Way of America, the Salvation Army, the National Council of Churches of Christ in the U.S.A., the National Conference of Catholic Charities, the Council of Jewish Federations, Inc., the American Red Cross, and the Federal Emergency Management Agency shall each designate a representative to sit on the national board. The representative of the Federal Emergency Management Agency shall chair the national board.

Each locality designated by the national board to receive funds shall constitute a local board for the purpose of determining how its funds will be distributed. The local board shall consist, to the extent practicable, of representatives of the same organizations as the national board except that the mayor or appropriate head of government will replace the Federal Emergency Management Agency member.

The Director of the Federal Emergency Management Agency shall award a grant for $70,000,000 to the national board within thirty days after enactment of this Act for the purpose of providing emergency food and shelter to needy individuals through private voluntary organizations and through units of local government.

Eligible private voluntary organizations should be nonprofit, have a voluntary board, have an accounting system, and practice nondiscrimination.

Participation in the program should be based upon a private voluntary organization's or unit of local government's ability to deliver emergency food and shelter to needy individuals and such other factors as are determined by the local boards.

Total administrative costs shall not exceed 2 per centum of the total appropriation.

As authorized by the Charter of the Commodity Credit Corporation, the Corporation shall process and distribute surplus food owned or to be purchased by the Corporation under the food distribution and emergency shelter program in cooperation with the Federal Emergency Management Agency.] (*Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1986.*)

The National Insurance Development Fund provided the funding source for two programs authorized by the Urban Property Protection and Reinsurance Act of 1968, as amended: (1) The FAIR (Fair Access to Insurance Requirements) Plan/Riot Reinsurance Program, and (2) the Federal Crime Insurance Program. The Supplemental Appropriations Act, 1985 (Public Law 98-181) did not extend authority for the Riot Reinsurance Program beyond November 30, 1983. The Federal Crime Insurance Program has been extended until March 17, 1986. The budget estimates assume there will be no new policies issued subsequent to those dates. However, there will be operating expenses associated with unexpired policies and the close-out of contractor activities.

Budget program.—Riot reinsurance claims.—No claims payments are anticipated in 1987.

Crime insurance.—

Insurance claims.—Claims reflect insurance payments in the program. An accounting adjustment of $6 million in 1985 reduced insurance claims from $8 million to $2 million.

Operating expenses.—Expenses are incurred by fiscal agents in issuing policies, settling claims, and maintaining accounting and statistical records.

Administrative expenses.—This represents the administrative cost of operating the programs.

Interest expense.—This represents interest on Treasury borrowings needed to defray underwriting and loss expenses of the crime insurance program.

Financing.—Claims and expenses are estimated to be paid from premium income and Treasury borrowings.

Operating results.—Claims and expenses are expected to exceed premium income resulting in a decrease in the reserves of the fund. The deficits have been reduced by major rate increases and rating changes.

measures. Communities must participate in the program within 1 year of the time they are identified as flood prone in order to be eligible for flood insurance and some forms of Federal financial assistance for acquisition or construction purposes.

Under the emergency program, structures in identified flood-prone areas are eligibie for limited amounts of coverage at subsidized insurance rates. Under the regular program, studies must be made of different flood risks in flood-prone areas to establish actuarial premium rates. These rates are charged for insurance on new construction. Coverage is available on virtually all types of buildings and their contents in amounts up to $245 thousand for residential and $550 thousand for other types.

Significant indicators of program size are as follows:

	1985 actual	*1986 estimate*	*1987 estimate*
Policies in force	1,955,028	2,121,000	2,312,000
Insurance in force (billions of dollars)	134	150	168

Budget program—Insurance underwriting expense.—Cost of initiating and maintaining flood insurance policies is estimated at $160,738 thousand in 1987.

Loss and adjustment expense.—Insured flood losses and associated loss adjustment expense is estimated at $324,208 thousand in 1987.

Interest expense.—Interest on Treasury borrowings needed to defray underwriting and loss expenses is estimated at $5,362 thousand in 1987.

The following activities are proposed for transfer to the National Flood Insurance Fund from other appropriations in FEMA's budget:

Flood studies and surveys.—These studies are estimated at $36,460 thousand in 1987.

Flood hazard reduction.—This activity, which includes the state assistance program, is estimated at $4,020 thousand in 1987.

Purchase of property.—This activity provides for the acquisition of property that has received severe or repeated flood damage and is estimated at $4,720 thousand in 1987.

Salaries and expenses.—This activity provides for salaries and related expenses of all Federal staff administering the National Flood Insurance Program and is estimated at $9,300 thousand in 1987.

Financing.—The Administrator is authorized to borrow up to $1 billion to carry out the program. Borrowings are estimated to total $261,872 thousand by the end of 1987. The program is financed through premium income and appropriations to repay borrowing. Efforts to make the program self-supporting, combined with a relatively low loss year in 1985, precluded the need for an appropriation in 1987.

Operating results.—Cumulative loss for this program is projected to be $1.5 billion at the end of 1987. This deficit is financed through appropriations of $1.2 billion and Treasury borrowings of $0.3 billion.

The Director of FEMA is authorized to accept, hold, administer, and utilize gifts and bequests of property, both real and personal, for the purpose of aiding or facilitating the work of the Federal Emergency Management Agency. Property and the proceeds thereof are used as nearly as possible in accordance with the terms of the gift or bequest.

FEDERAL HOME LOAN BANK BOARD

The Federal Home Loan Bank Board formulates policies for and supervises the operation of the 12 Federal home loan banks, the system of Federal savings and loan associations, the Federal Savings and Loan Insurance Corporation, and the Federal Home Loan Mortgage Corporation. It is also responsible for the examination of Federal savings and loan associations and for the examination and supervision of State-chartered institutions insured by the Federal Savings and Loan Insurance Corporation.

The expenditure programs of the Federal Home Loan Bank Board and the Federal Savings and Loan Insurance Corporation are presented as business-type budgets. The administrative expenses of the Federal Home Loan Bank Board, are paid from assessments against the 12 Federal home loan banks and the Federal Savings and Loan Insurance Corporation.

Budget program.—The Board's budget program consists of several activities:

Supervision of Federal home loan banks and applications processing.—The Board supervises the operations of the 12 Federal home loan banks. Federal savings and loan associations are chartered and regulated. Applications of State-chartered associations for conversion to Federal savings and loan associations and applications of Federal savings and loan associations for establishment of branch offices are also examined. In addition, an analysis and evaluation is made of insurance risk in connection with applications submitted by savings and loan associations for insurance of share accounts.

Examination and supervision of Federal and State-chartered thrift institutions.—Supervisory examinations are made of Federal savings and loan associations, State-chartered associations insured by the Federal Savings and Loan Insurance Corporation, and all uninsured member institutions of the Federal home loan bank system which are not examined by the State examiners. Examinations are also made of institutions applying for insurance of accounts and for conversion from a State to a Federal charter, when required by the Board. The financial condition and operations of each insured institution are analyzed and corrective action is instituted when warranted. Supervision of insured institutions operating under State charter is carried on cooperatively, with the respective State authorities.

Executive direction and staff services.—This includes formulation of basic policy and the furnishing of staff services common to the Board and the Insurance Corporation.

Analysis of operations.—Analyses are made of the financial condition of member institutions, the flow of savings, and the character and volume of mortgage lending. Selective reviews are made of geographical areas and trends in the field of thrift and home mortgage finance, including the volume of activity and interest rates for all major types of mortgage lenders.

Administrative services.—These consist of accounting, budgeting, and financial reporting; internal budget control; and fiscal organization and management. Also included are general housekeeping, data processing, and operating services.

The 12 Federal home loan banks seek to improve the financial condition of member institutions. The banks, which are owned by the member institutions, obtain funds primarily from public issuances of consolidated obligations. Section 11(i) of the Federal Home Loan Bank Act authorizes the banks to borrow from the Treasury up to $4 billion outstanding at any one time.

The amounts shown in the schedules for the activities discussed above for 1987 include administrative expenses under an annual limitation, and certain additional expenses not under a limitation. Administrative expenses are estimated to increase from $26.9 million in 1986 to $32.2 million in 1987.

Effective July 7, 1985, responsibility for examining FSLIC-insured thrift institutions was delegated by the Bank Board to the Principal Supervisory Agents of each of the twelve Federal Home Loan Banks. The Bank Board delegated this function under the following authority of the Federal Home Loan Bank Act, as amended, 12 U.S.C. 1437(a), 1424(c), and 1442. To accomplish this change, the Federal employees assigned to the 897 authorized field examination positions were offered parallel positions of employment at their respective district banks. The actual expenses and consumption of employment ceiling for 1985 as shown in the following schedules reflect budget savings in most object class expense categories consistent with the transfer of this function to the Federal Home Loan Banks in July of 1985.

The Federal Savings and Loan Insurance Corporation is authorized under title IV of the National Housing Act to insure savings in all Federal savings and loan associations, Federal mutual savings banks, and in State-chartered institutions of the savings and loan type which apply and qualify for insurance. The protection, which insures each saver in a member association against financial loss up to a statutory limit of $100 thousand, may be provided either through the prevention of default or the payment of insurance to savings accounts holders in the event of liquidation. Preventing default, which protects each investor regardless of the amount in his account, is accomplished by making contributions or by purchasing all or a part of an association's assets. Also, the Corporation is authorized to make loans to institutions in financial difficulty. Preventive measures are preferred by the Corporation. However, in the event liquidation is necessary, the Corporation acts as a receiver, or co-receiver upon the request of a State authority in cases involving State-chartered institutions. In addition, the Corporation, upon determination by the Board, is empowered to act, even retroactively, as sole receiver in cases involving State-chartered institutions.

The Corporation functions under the direction of the Federal Home Loan Bank Board, which provides administrative services. The expenses of the Board and its staff offices are paid from assessments made on the Corporation and the Federal home loan banks.

In carrying out its responsibility for protecting savings in insured savings and loans associations, the Corporation has settled 317 cases since its creation in 1934. Actual losses sustained and provision for losses to September 30, 1985, have amounted to $4,306.2 million representing approximately 26.8 percent of cumulative gross income. Detailed information on these cases is summarized in the following table:

Budget program.—The Insurance Corporation's budget program consists of the following activities:

Administrative expenses subject to limitation.—This category includes the estimated costs of executive direction and policy formulation.

Payments to Federal Home Loan Bank Board for services and facilities.—The Corporation will pay 75% of the total administrative expenses of the Federal Home Loan Bank Board in 1987 in return for services and facilities from the Board.

Contributions and provision for contributions to insured thrift institutions.—This item is the estimated amount needed in 1987 to prevent the default of insured institutions.

Liquidation and other expenses.—This provides for liquidation and other expenses of the Corporation in connection with the workout of contribution agreements, the disposition of assets purchased from, and loans to insured institutions to prevent default.

Interest on notes payable.—This is interest paid on promissory notes issued by the Corporation for the purchase of either Income Capital Certificates or Net Worth Certificates. The certificates are issued by qualifying insured institutions with low net worth in order to improve or maintain their capital position.

Financing.—The original capital of $100 million has been completely repaid to Treasury, together with an additional $43 million in interest. The Corporation has continuing authority to borrow from the Treasury for insurance purposes, up to a limit of $750 million outstanding at any one time. No borrowing under this authorization has ever been necessary. The Corporation has additional authority to assess against each insured institution additional premiums for insurance until the amount of such premiums equals the amount of all losses and expenses of the Corporation, except that the total amount so assessed in any 1 year against any such institution shall not exceed one-eighth of 1% of the total amount of the accounts of its insured savers.

Operating results.—The Corporation is entirely self-supporting. Revenues and other receipts have been sufficient to meet all insurance losses, operating expenses, and return on capital stock, leaving a reserve for contingencies of $10,679.9 million as of September 30, 1985. Total revenues and other receipts since 1934 of $16,037.3 million have been applied as follows:

The purpose of the Authority is to serve as a neutral party in the settlement of disputes that arise between unions, employees, and agencies on matters outlined in the Federal Service Labor Management Relations Statute, decide major policy issues, prescribe regulations, and disseminate information appropriate to the needs of agencies, labor organizations, and the public. Establishment of the Federal Labor Relations Authority gives full recognition to the role of the Federal Government as an employer.

Authority members.—The Authority adjudicates labor-management disputes in the Federal sector including: appeals on negotiability issues; exceptions to arbitration awards; appropriate units for the purposes of exclusive recognition; eligibility of labor organizations for national consultation rights and unfair labor practice complaints.

Workloads are reflected in the following table:

CASE DISPOSITIONS

	1985 actual	1986 estimate	1987 estimate
Arbitration appeals	278	215	276

The Federal Maritime Commission administers the shipping statutes, which require regulation of the domestic offshore and international waterborne commerce of the United States. In addition, the Commission has responsibility for the licensing of ocean freight forwarders and for insuring that vessel owners or operators establish financial responsibility for death or injury to passengers or other persons on voyages to and from U.S. ports, and indemnification of passengers for the nonperformance of transportation. Major program areas for 1987 will concentrate on implementing the Shipping Act of 1984; developing plans for deregulation of the domestic offshore trades; and developing a program to computerize the filing of tariffs utilizing private sector resources.

The Service assists parties to labor disputes in industries affecting commerce to settle their disputes through conciliation and mediation.

Dispute mediation.—The Service assists labor and management in mediation and prevention of disputes, other than those involving rail and air transportation, whenever such disputes threaten to cause a substantial interruption of interstate commerce or a major impairment of the national defense. The Service also makes mediation and conciliation services available to Federal agencies and organizations representing Federal employees in the resolution of negotiation disputes. The Service provides mandatory mediation and, where necessary, impartial boards of inquiry to assist in resolving labor disputes involving private nonprofit health care institutions. The workload shown below includes assignments closed in both the private and public sectors.

Total mediation conferences conducted	27,520	29,391	25,236	27,000	27,150

Preventive mediation, public information, and educational activities.—Through its preventive mediation program, the Service initiates and develops labor-management committees, training programs, conferences, and specialized workshops dealing with issues in collective bargaining. Mediators also participate in public information and educational activities such as lectures, seminars, and conferences.

Arbitration services.—The Service assists parties in disputes in utilizing the arbitration process for the resolution of disputes arising under or in the negotiation of collective bargaining agreements in the private and public sectors.

Management and administrative support.—This activity provides for overall management and administration, policy planning, research and evaluation, and employee development.

Boards and panels.—Provision is made for ad hoc use of labor relations experts, individually or in panels, in support of the mediation function, for boards of inquiry appointed by the President in emergency disputes, and for boards of inquiry which the Director of FMCS may appoint in a contract dispute involving health care institutions.

Labor-management cooperation project.—The Labor Management Cooperation Act of 1978 (29 U.S.C. 125a) authorizes the Service to carry out this program of contracts and grants to support the establishment and operation of plant, area, and industry labor-management committees. No funds are requested for this program in 1987.

The Federal Trade Commission is charged by law with ensuring that competition in the marketplace is vigorous, free, and fair. This is accomplished by eliminating threats to fair and honest competition from all sources, both public and private.

Maintaining competition.—The Commission's efforts within this mission are aimed at fostering and preserving our competitive system with the goal of maximizing consumer welfare. In addition to enforcing the antitrust laws against private sector restraints on competition, the Commission also scrutinizes regulatory policies that unduly restrain competition, and tries to exert a procompetitive influence in the development of such policies.

Consumer protection.—The Commission is charged with eliminating unfair or deceptive acts or practices affecting commerce. The goal of the consumer protection mission is to improve market performance so that consumers can make informed choices when exercising their purchasing power. To accomplish this goal, the Commission will remove harmful private and public restrictions on market performance; encourage business to provide consumers with accurate and useful information; and reinforce market forces that enhance consumer welfare.

Economic activities.—This mission has four major functions: conducting research on the performance of the industrial economy; providing economic support to Commission's antitrust and consumer protection efforts; advising the Commission on the impact of governmental regulation on competition in various industries; and developing economic reports on industrial structure and performance.

Public Law 93-642 established the Harry S Truman Scholarship Foundation to operate the scholarship program that is the permanent Federal memorial to the 33rd President of the United States. The Foundation awards college scholarships of up to $5 thousand annually for up to four years to qualified persons who demonstrate outstanding potential for and interest in careers in public service at the local, State, or Federal level.

Legislation was enacted in 1986 that raised the former $5 thousand cap on annual award levels to $10 thousand, allowing the Foundation to raise awards. The Foundation announced a new award cap of $7,000, effective for awards for school year 1986-87. However, the Foundation reserves the right, and intends if necessary, to adjust award levels or the number of scholars, or both, to avoid any decline in the asset value of its trust fund.

In 1987, the Foundation will conduct its eleventh annual competition to select up to 105 new Truman scholars and will continue to assist in the placement of graduating Truman scholars in public service positions.

Scholarship awards.—This activity is comprised of scholarships awarded to cover eligible educational expenses.

Program administration.—This activity covers all costs of operating the program, including annual program announcement, interview and selection of Truman scholars, calculation and disbursement of scholarship awards, monitoring of student progress, and placement assistance.

The Advisory Commission on Intergovernmental Relations (ACIR) is a 26-member independent, bipartisan body. The Commission and its staff examine Federal, State and local trends, events, and programs having an intergovernmental impact. Proposed legislation and executive actions are reviewed to determine their overall effect on the Federal system. The Commission also identifies emerging problems of Federal-State-local relations and assists States and localities in anticipating and meeting problems caused by various intergovernmental overlaps and conflicts, and makes recommendations concerning the workings and structural arrangements of governmental units and allocation of responsibilities and revenues among the various levels of government. The recommendations and published reports growing out of the Commission's work are submitted to the executive and legislative branches of Federal, State, and local governments for appropriate action.

Continuing and annual projects of the Commission include assessing changing public attitudes on government and taxes; developing a "representative tax system" for all 50 States; analyzing fiscal disparities; publishing an annual catalog of Federal aid; surveying and identifying trends in State and local finances; monitoring key intergovernmental legislation of Federal, State, and local governments; and providing educational and technical assistance to Federal, State, and local governments regarding Commission recommendations.

Nonrecurring projects currently under Commission study include State taxation of interstate mail order sales, turnbacks of Federal responsibilities and revenues to the States, designing a more effective intergovernmental welfare system, State-by-State analysis of proposals to reform the individual income tax, political parties and the American Federal system, fiscal discipline, the role of the national judiciary in the Federal system, Federal preemption of State and local laws and authority, alternative approaches to providing local public services, rethinking local self-government in the Federal system, and analysis of intergovernmental aid formulas.

Appropriations finance the personnel and personnel-related expenses incurred in the basic day-to-day operation of the Commission.

In 1987, the Appalachian Regional Development programs will be discontinued. Of funds available in 1986, $10 million will be carried over to 1987 and allocated to other Federal agencies in 1987 and subsequent years to close out Appalachian regional development non-highway program projects. The Department of Commerce will be responsible for closeout of activities associated with this account.

Appalachian Development Highway System.—The Appalachian Development Highway System program will also be discontinued in 1987. The Federal Highway Administration will be responsible for closeout of activities associated with this program.

Appalachian Housing Fund.—Housing program grants are being funded from the Appalachian regional development program appropriations and this housing fund has been closed out.

Appalachian Regional Commission.—The Appalachian Regional Commission will be responsible for closedown of its own activities and for initial closeout actions in the Appalachian regional development programs and for orderly transition of these programs to the Federal Highway Administration and to the Department of Commerce.

The Washington Metropolitan Area Transit Authority (WMATA) is a non-Federal agency established pursuant to an interstate compact among Maryland, Virginia, and the District of Columbia. The Authority's primary functions are to plan, develop, finance, and construct the Metro-rail rapid transit system and to operate the bus/rail transit system in the National Capital area. The rail system extends from the District of Columbia into the participating jurisdictions of Maryland and Virginia.

This WMATA account provides the annual Federal share of interest payments on outstanding WMATA bonds sold in support of the rail construction program. The WMATA bonds, totaling $997 million, are guaranteed by the Federal Government. In September 1979, the WMATA and the Department of Transportation approved an Initial Bond Repayment Participation Agreement providing for an overall two-thirds Federal and one-third local sharing of the interest and principal costs of the bonds. In August 1982, this agreement was reaffirmed in a supplement to the agreement. The 1987 request represents the Federal share under the terms of the agreement.

The U.S. International Trade Commission is an independent agency created by act of Congress. The Commission's current powers and duties are provided for by the Tariff Act of 1930; the Trade Act of 1974; the Trade Agreements Act of 1979; the Agricultural Adjustment Act; section 1911 of the Financial Institution Regulatory and Interest Rate Control Act of 1978, 12 U.S.C. 635a-2; and the Trade and Tariff Act of 1984.

The Commission conducts investigations and, where appropriate, makes determinations and recommendations, or takes action, in cases where (1) serious injury to industries may warrant increases in duties, the imposition of quotas, or the provision of adjustment assistance; (2) imports of goods sold at less than fair value may injure an industry; (3) foreign governments, organizations, or individuals, may have subsidized imports into the United States; (4) unfair methods of competition in the importation or sale of foreign articles may tend to injure an industry or restrain and monopolize trade and commerce in the United States; or (5) imports of agricultural products may materially interfere with certain programs of the Department of Agriculture.

The Commission advises the President as to the probable economic effect on the domestic industry and consumers, of modification of duties and other barriers to trade which may be considered for inclusion in any proposed trade agreement with foreign countries. Further, the Commission, at the request of the President, the Congress, or on the Commission's own motion, undertakes comprehensive studies and provides reports on key issues relating to international trade and economic policy matters.

The Commission, in cooperation with the Secretary of the Treasury and the Secretary of Commerce, establishes for statistical purposes an enumeration of articles imported into the United States and exported from the United States, and seeks to establish comparability of such statistics with statistical programs for domestic production.

The Commission also issues a publication containing U.S. tariff schedules and related matters and considers questions concerning the arrangements of such schedules and the classification of articles.

Pursuant to section 175 of the Trade Act of 1974, the budget estimates for the Commission are included without revision by the President.

The Interstate Commerce Commission is responsible for the regulation of interstate surface transportation. Consistent with the downward trend in the regulation of surface transportation which grew out of the regulatory reform legislation of 1980 and 1982, the Commission has reduced staff by more than 50 percent since 1981. The Commission is continuing its efforts to effect budget reductions through reorganization.

Motor program.—This includes the regulation of rates, the granting of operating authorities, the regulation of mergers and acquisitions, and the planning, analysis, and policy development associated with these activities as they relate to the Interstate Commerce Act as amended by the Motor Carrier Act of 1980, the Household Goods Transportation Act of 1980, and the Bus Regulatory Reform Act of 1982. The activities of interstate motor freight and passenger carriers, freight forwarders, and water carriers are monitored, and enforcement actions are instituted to ensure compliance with regulations intended to protect the public interest and promote an adequate and efficient transportation system.

Rail program.—This encompasses the regulation of rates and of mergers, acquisitions, construction and abandonment of railway lines, as well as the planning, analysis, and policy development associated with these activities as provided for in the Interstate Commerce Act, as amended by the Staggers Rail Act of 1980. Staff ensure compliance with railroad regulations in order to protect the public interest.

General management and administration.—These activities provide support services, including data processing, budget and financial management, personnel, procurement, and contracting services.

Legislation will be proposed to abolish the Interstate Commerce Commission and to deregulate interstate motor freight, freight forwarder, and water carriers by October 1, 1986. The enactment of this legislation would eliminate a major portion of ICC workload. The remaining activities would be transferred to the Departments of Justice and Transportation.

Once a railroad ceases operations due to a lack of cash or a court order, the Commission may direct other railroads to provide service over the track of the railroad which ceased operations and may compensate the directed rail carrier for its services. The responsibility for this activity would be transferred to the Department of Transportation, as part of the proposal to sunset the ICC.

The Japan-United States Friendship Act of 1975 established the Japan-United States Friendship Trust Fund, and created the Japan-United States Friendship Commission to make grants from the Fund for the promotion of scholarly, cultural, and artistic activities between Japan and the United States. The Commission is authorized to make expenditures from the appropriated income of the fund and, in an amount not to exceed 5% annually of the principal of the fund, to pay the expenses of the Commission and to make grants in support of studies, fellowships, scholarships, book collections, art programs, and other cultural and educational activities, primarily in the United States. The Commission received a contribution in May 1981 of $2 million from the Government of Japan to be used for the purposes of the Act. This should be fully expended in 1986.

(1) the project director of a recipient has expressly approved the filing of such an action in accordance with policies established by the governing body of such recipient;

(2) the class relief which is the subject of such an action is sought for the primary benefit of individuals who are eligible for legal assistance; and

(3) that prior to filing such an action, the recipient project director has determined that the government entity is not likely to change the policy or practice in question, that the policy or practice will continue to adversely affect eligible clients, that the recipient has given notice of its intention to seek class relief and that responsible efforts to resolve without litigation the adverse effects of the policy or practice have not been successful or would be adverse to the interest of the clients:

except that this proviso may be superseded by regulations governing the bringing of class action suits promulgated by a majority of the Board of Directors of the Corporation who have been confirmed in accordance with section 1004(a) of the Legal Services Corporation Act: *Provided further*, That none of the funds appropriated in this Act made available by the Legal Services Corporation may be used—

(1) to pay for any publicity or propaganda intended or designed to support or defeat legislation pending before Congress or State or local legislative bodies or intended or designed to influence any decision by a Federal, State, or local agency;

(2) to pay for any personal service, advertisement, telegram, telephone communication, letter, printed or written matter, or other device, intended or designed to influence any decision by a Federal, State, or local agency, except when legal assistance is provided by an employee of a recipient to an eligible client on a particular application, claim, or case, which directly involves the client's legal rights or responsibilities;

(3) to pay for any personal service, advertisement, telegram, telephone communication, letter, printed or written matter, or any other device intended or designed to influence any Member of Congress or any other Federal, State, or local elected official—

(A) to favor or oppose any referendum, initiative, constitutional amendment, or any similar procedure of the Congress, any State legislature, any local council or any similar governing body acting in a legislative capacity,

(B) to favor or oppose an authorization or appropriation directly affecting the authority, function, or funding of the recipient or the Corporation, or

(C) to influence the conduct of oversight proceedings of the recipient or the Corporation;

General and special funds—Continued

[PAYMENT TO THE LEGAL SERVICES CORPORATION]—Continued

(4) to pay for any personal service, advertisement, telegram, telephone communication, letter, printed or written matter, or any other device intended or designed to influence any Member of Congress or any other Federal, State, or local elected official to favor or oppose any Act, bill, resolution, or similar legislation, except that this proviso shall not preclude funds from being used to provide communication directly to a Federal, State, or local elected official on a specific and distinct matter where the purpose of such communication is to bring the matter to the official's attention if—

(A) the project director of a recipient has expressly approved in writing the undertaking of such communication to be made on behalf of a client or class of clients in accordance with policy established by the governing body of the recipient; and

(B) the project director of a recipient has determined prior to the undertaking of such communication, that—

(i) the client and each such client is in need of relief which can be provided by the legislative body involved;

(ii) appropriate judicial and administrative relief have been exhausted; and

(iii) documentation has been secured from each eligible client that includes a statement of the specific legal interests of the client, except that such communication may not be the result of participation in a coordinated effort to provide such communications under this proviso; and

(C) the project director of a recipient maintains documentation of the expense and time spent under this proviso as part of the records of the recipient; or

(D) the project director of a recipient has approved the submission of a communication to a legislator requesting introduction of a private relief bill:

except that nothing in this proviso shall prohibit communications made in response to a request from a Federal, State, or local official: *Provided further*, That none of the funds appropriated in this Act made available by the Legal Services Corporation may be used to pay for any administrative or related costs associated with an activity prohibited in clause (1), (2), (3), or (4) of the previous proviso: *Provided further*, That none of the funds appropriated under this Act for the Legal Services Corporation will be expended to provide legal assistance for or on behalf of any alien unless the alien is present in the United States and is—

(1) an alien lawfully admitted for permanent residence as defined in section 101(a)(20) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(20));

(2) an alien who is either married to a United States citizen or is a parent or an unmarried child under the age of twenty-one years of such a citizen and who has filed an application for adjustment of status to permanent resident under the Immigration and Nationality Act, and such application has not been rejected;

(3) an alien who is lawfully present in the United States pursuant to an admission under section 207 of the Immigration and Nationality Act (8 U.S.C. 1157, relating to refugee admissions) or who has been granted asylum by the Attorney General under such Act; or

(4) an alien who is lawfully present in the United States as a result of the Attorney General's withholding of deportation pursuant to section 243(h) of the Immigration and Nationality Act (8 U.S.C. 1253(h)):

Provided further, That an alien who is lawfully present in the United States as a result of being granted conditional entry pursuant to section 203(a)(7) of the Immigration and Nationality Act (8 U.S.C. 1153(a)(7)) before April 1, 1980, because of persecution or fear of persecution on account of race, religion, or political opinion or because of being uprooted by catastrophic natural calamity shall be deemed, for purposes of the previous proviso, to be an alien described in clause (3) of the previous proviso: *Provided further*, That none of the funds appropriated for the Legal Services Corporation may be used to support or conduct training programs for the purpose of advocating particular public policies or encouraging political activities, labor or antilabor activities, boycotts, picketing, strikes, and demonstrations, including the dissemination of information about such policies or activities, except that this provision shall not be construed to prohibit the training of attorneys or paralegal personnel necessary to prepare them to provide adequate legal assistance to eligible clients or to advise any eligible client as to the nature of the legislative process or inform any eligible client of his rights under statute, order, or regulation: *Provided further*, That none of the funds appropriated in this Act for the Legal Services Corporation may be used to carry out the procedures established pursuant to section 1011(2) of the Legal Services Corporation Act unless the Corporation prescribes procedures to insure that financial assistance under this title shall not be terminated, and a suspension of financial assistance shall not be continued for more than thirty days, unless the grantee, contractor, or person or entity receiving financial assistance under this title has been afforded reasonable notice and opportunity for a timely, full, and fair hearing and, when requested, such hearing shall be conducted by an independent hearing examiner, subject to the following conditions—

(1) such request for a hearing shall be made to the Corporation within thirty days after receipt of notice to terminate financial assistance, deny an application for refunding, or suspend financial assistance and such hearing shall be conducted within thirty days of receipt of such request for a hearing;

(2) the Corporation shall make such final decision within thirty days after completion of such hearing; and

(3) hearing examiners shall be appointed by the Corporation in accordance with procedures established in regulations promulgated by the Corporation:

Provided further, That none of the funds appropriated in this Act for the Legal Services Corporation may be used to carry out the procedures established pursuant to section 1011(2) of the Legal Services Corporation Act unless the Corporation prescribes procedures to ensure that an application for refunding shall not be denied unless the grantee, contractor, or person or entity receiving assistance under this title has been afforded reasonable notice and opportunity for a timely, full, and fair hearing to show cause why such action should not be taken and subject to all other conditions of the previous proviso: *Provided further*, That none of the funds appropriated in this Act for the Legal Services Corporation shall be used by the Corporation in making grants or entering into contracts for legal assistance unless the Corporation insures that the recipient is either (1) a private attorney or attorneys (for the sole purpose of furnishing legal assistance to eligible clients) or (2) a qualified nonprofit organization chartered under the laws of one of the States, a purpose of which is furnishing legal assistance to eligible clients, the majority of the board of directors or other governing body of which organization is comprised of attorneys who are admitted to practice in one of the States and who are appointed to terms of office on such board or body by the governing bodies of State, county, or municipal bar associations the membership of which represents a majority of the attorneys practicing law in the locality in which the organization is to provide legal assistance: *Provided further*, That none of the funds appropriated in this Act for the Corporation shall be used, directly or indirectly, by the Corporation to promulgate new regulations or to enforce, implement, or operate in accordance with regulations effective after April 27, 1984 unless the Appropriations Committees of both Houses of Congress have been notified fifteen days prior to such use of funds as provided for in section 606 of this Act.] *The Departments of Commerce, Justice, and State, the Judiciary and Related Agencies Appropriation Act, 1986*

The Legal Services Corporation (LSC) funds State and local agencies that provide free civil legal assistance to the poor. LSC is a private, non-profit corporation which is outside the Federal Government and acts independently of related social and community services programs. Grantees are involved both in cases for individual clients and in broader "law reform" activities.

The Administration proposes that the Corporation not be reauthorized and that no further Federal funding be provided.

The Special Counsel is empowered to investigate prohibited personnel practices in Federal agencies and political activities prohibited by the Hatch Act, and to administratively prosecute offending employees and agencies before the Merit Systems Protection Board. The Special Counsel may also transmit "whistleblower" allegations to the agency head concerned and require an agency investigation and a report to the Congress and the President when found appropriate.

Many cases that are referred to the Office are resolved without recourse to formal proceedings before the Board. Efforts to obtain such informal resolutions will continue in 1987.

Pursuant to Public Law 98-497, the National Archives and Records Administration was established as an independent agency on April 1, 1985. This agency conducts the activities previously conducted by the National Archives and Records Service of GSA.

In 1987, records in the National Archives and Federal records centers will total approximately 16.2 million cubic feet. The number of reference services expected to be provided will total 28.8 million.

Records centers.—In 1987, agencies will transfer 1,477 thousand cubic feet of inactive records to the records centers. The records centers will dispose of 1,022 thousand cubic feet of records in 1987, and 25.0 million reference services will be provided.

Archives and related services.—A substantial portion of the workload of the National Archives and related services activity is determined by the volume of reference requests received from Government agencies, the public, and the number of documents sent by Federal agencies to be published in the Federal Register. For 1987 the number of reference services is estimated at 3.8 million and the number of Federal Register pages to be processed will be 732,000.

Through the records declassification program, historically valuable information in the records of the Federal Government and in donated historical materials are made available to the public by declassifying as much information as possible without endangering the national security. In 1987, 10 million pages will be reviewed for declassification.

National Historical Publications and Records Commission.—This Commission coordinates and provides technical assistance to archival planning and assessment projects in many States and also offers a specialized reference service to Federal, State and local and nongovernment institutions that are publishing significant portions of records from official government files. The Commission also lends its endorsement and support to those specific projects that further the basic objectives stated in its legislation.

The National Council on the Handicapped is composed of 15 members appointed by the President and confirmed by the Senate. Established under the Rehabilitation Act of 1973, as amended, the Council is responsible for reviewing all laws, programs, and policies of the Federal Government affecting disabled individuals, completing a major study by February 1986 on disincentives to establishment of integrated, community-based services for handicapped persons and establishing general policies for the National Institute of Handicapped Research. The Council also makes recommendations on issues affecting the handicapped to the President, the Congress, the Rehabilitation Services Administration Commissioner, the National Institute of Handicapped Research Director, and other Federal Departments and agencies, as may be appropriate.

The insurance fund is used to carry out a program of insurance for member accounts in Federal credit unions and State-chartered credit unions which apply and qualify for insurance, authorized by Public Law 91-468, enacted October 19, 1970.

Budget program.—The activities consist of: (a) providing member account insurance, (b) formulating standards and requirements for insured credit unions, and (c) providing for liquidation or other disposition of the assets and liabilities of solvent and insolvent, insured credit unions. The fund also reimburses the operating fund for its share of the Agency's administrative costs. The reimbursement percentage which is reviewed and adjusted periodically, is currently at fifty percent.

The extent of the program is estimated as follows:

Item	*1985 actual*	*1986 estimate*	*1987 estimate*
Number of insured credit unions	15,031	15,150	15,200
Shares of insured member institutions as of Dec. 31 of the previous calendar year (in millions of dollars)	84,254	105,000	121,000

It is estimated that approximately 5,000 State-chartered credit unions will be enrolled in the program by the end of 1987.

Financing.—For calendar year 1986, the credit Union's required annual insurance premium of one-twelfth of 1 percent of their total member share accounts has been waived. However, as a result of Public Law 98-369 (July 18, 1985), each insured credit union will also be required in January 1986 to deposit and maintain in the insurance fund 1 percent of its member share accounts. The fund is structured to be entirely self supporting through the moneys paid by member credit unions. The moneys received plus the income generated from their investment are expected to cover all administrative and financial costs, as well as increase the fund balance proportionate to insured share growth. It is anticipated that the nearly fourfold increase in the insurance fund generated from the 1 percent deposit will eliminate the need to assess the annual premium except in years of catastrophic credit union losses. The fund has $100 million in borrowing authority from the Treasury for use in unforeseen emergencies.

Operating results.—Anticipated net income of $105,000 thousand will be retained in the fund, raising the balance for unforeseen emergencies to $1,584 million by the end of 1987.

The National Credit Union Central Liquidity Facility was established under Public Law 95-630. It began operations on October 1, 1979. The Central Liquidity Facility provides loans to member credit unions for seasonal and emergency needs.

The two primary sources of funds for the Facility are stock subscriptions from credit unions and borrowings from the Federal Financing Bank. Credit unions, which choose to become members of the Facility, are required to purchase stock equal to one-half of 1% of their assets. One-half of the subscription in stock is forwarded to the Facility and deposited in the fund. The remaining half of the subscription remains on call in the credit union in investments as approved by the NCUA Board.

The Facility may borrow funds from any source to relend to member credit unions. This amount of borrowings is limited to twelve times the amount of capital stock subscriptions by the authorizing statute (Public Law 95-630). In 1987, an appropriation limitation on new loans of $600 million is proposed, of which it is currently anticipated that $80 million will be used.

The National Endowment for the Humanities funds activities intended to improve the quality of education and teaching in the humanities, to strengthen the scholarly foundation for humanities study and research activity, and to advance understanding of the humanities among broad general audiences.

Support is provided through outright grants, matching grants, and a combination of the two. Eligible applicants include schools, higher education institutions, libraries, museums, historical organizations, professional associations, other cultural institutions, and individuals.

In 1987, major emphasis will be placed on projects and activities that improve humanities education and teaching in the Nation's schools, colleges, and universities, that advance humanities research and scholarship, and that stimulate non-Federal support of the humanities.

The Board resolves representation disputes in industry and remedies and prevents specified unfair labor practices by employers or labor organizations. Case intake in 1985 was 32,502 unfair labor practice cases and 8,493 representation cases. Estimates for unfair labor practice cases are 34,000 for 1986 and 36,000 for 1987. Representation case estimates are 9,000 for 1986 and 9,000 for 1987.

Field investigation.—Charges of unfair labor practices and petition for elections to resolve representation disputes are investigated by regional office personnel. Over 94 percent of the unfair labor practice cases and about 82 percent of the representation cases are closed by settlement, dismissal, or withdrawal. The remainder are prepared for public hearing. The agency strives to maximize the voluntary settlement of all cases and the avoidance of litigation.

Administrative law judge hearing.—Administrative law judges conduct public hearings in unfair labor practice cases. Their findings and recommendations are set forth in their decisions. In 1985 there were 718 hearings closed, 3 proceedings adjusted after close of hearing, and 789 decisions issued. The estimate for 1986 is for 855 hearings to be closed, 1 adjusted after hearing, and 840 decisions. The estimate for 1987 is for 885 hearings to be closed, 1 adjusted after hearing, and 869 decisions.

Board adjudication.—In an unfair labor practice case a judge's decision becomes a Board order if no exceptions are filed. About 30 percent of these decisions become automatic Board orders or are complied with voluntarily. The remainder with exceptions filed requires contested Board decision. In 1985, 889 such Board decisions were issued; the estimates for 1986 and 1987 are 1,119 and 1,141 respectively. In representation cases, regional directors initially decide the issues by Board delegation. In 1985 regional directors issued 1,336 such decisions; and the estimate is 1,136 for 1986 and 1,130 in 1987. The Board itself decides representation issues on referral from regional directors or by granting a request for review of a regional director's decision. In 1985 the Board issued 142 representation decisions; the estimates for 1986 and 1987 are 133 and 131 respectively. The Board also ruled on 284 objection and challenge questions in election cases in 1985; it is estimated that

297 such rulings will be required in 1986 and 296 in 1987.

Securing compliance with Board orders.—If the parties do not voluntarily comply with the Board's order involving unfair labor practices, the Board must request the appellate courts to enforce its decisions. In 1985 a total of 204 Board decisions of all kinds required such litigation; the estimate for 1986 is 316, and for 1987 it is 312.

Mediatory services.—The Board mediates disputes over wages, hours, and working conditions for some 650 rail and air carriers and approximately 700,000 employees in the two industries.

The Board also provides technical assistance to enable labor and industry representatives to explore informally the relevant economic and noneconomic problems that condition collective bargaining in the railroad and airline industries.

tration. If neither mediation nor voluntary arbitration is successful, the President, when notified of disputes which threaten seriously to interrupt service, may appoint emergency boards to investigate and report on the disputes under section 160 of the Railway Labor Act (RLA). Such reports usually serve as a basis for resolving the disputes.

The Northeast Rail Service Act of 1981 amended the Railway Labor Act by adding a new emergency dispute procedure covering disputes between a publicly funded and operated commuter carrier and its employees. The 1981 act requires the Board to appoint the public members of factfinding panels on Conrail.

Adjustment of Railroad Grievances.—Railroad employee grievances resulting from disputes over the interpretation or application of collective bargaining contracts may be brought for settlement to the National Railroad Adjustment Board (NRAB). The divisions of the Board are composed of an equal number of carrier and union representatives compensated by the party or parties they represent. Public Law 89-456 provides for the adjustment of disputes involving grievances resulting from interpretation or application of bargaining agreements in the railroad industry otherwise referrable to the NRAB. The Northeast Rail Service Act of 1981 also provides access to this machinery for Conrail employees with grievances arising from the application of employee protection benefits. The appropriation provides for neutral referees to sit with the various boards when they are deadlocked.

Administrative direction and support for the public law boards, special boards of adjustment and the NRAB are provided by Federal employees who are compensated by the National Mediation Board.

The major research program activities of the Foundation are:

Mathematical and physical sciences.—Research in this activity is directed at increasing understanding of natural laws and phenomena. It includes research in mathematics, computer science, physics, chemistry, and materials science. Studies deal with a broad range of significant science areas such as new amorphous materials and materials of limited dimensionality, organometallic chemistry and catalysis, the fundamental forces and constituents of physical matter, new computing methods based on existing and new architectures and new mathematical structures and techniques. Provision of modern research instrumentation and facilities and support of young scientists is stressed in all programs.

Engineering.—Research supported by this activity aims to increase U.S. engineering capability and strength, and focus that capability and strength on areas which are relevant to national problems and long-term needs. Topics supported include: electrical, communications, and systems engineering; chemical, biochemical, and thermal engineering; mechanics, structures, and materials engineering; science base development in design, manufacturing, and computer engineering; fundamental research underpinning emerging and critical engineering systems; and cross-disciplinary research, including Engineering Research Centers.

Biological, behavioral, and social sciences.—This activity supports research in cellular biology, molecular biology, behavioral and neural sciences, environmental biology, social and economic sciences, and information sciences. Research covers: inquiry into the mechanisms underlying the ways living organisms develop, grow, reproduce, maintain themselves, and age; studies in environmental biology, including the behavior of biological communities and ecological and physiological adaptations of populations to natural environments; attempts to understand the biological, environmental, and cultural factors that underlie the behavior of human beings and animals, with explicit emphasis on nervous system structure and function; analysis of the underlying forms and processes affecting economies, organizations and societies, as well as the development of scientific data bases and the improvement of measurement methodology; and discovery of the properties of information—the processes by which it is generated, structured, communicated and used.

Astronomical, atmospheric, Earth, and ocean sciences.—This research advances physical knowledge of the universe and knowledge of the planet Earth. It includes studies of galaxies, planets, and stars; the nature of the Earth and its geologic history; ocean dynamics and resources; the influence of the Arctic on the Earth's climate; the physics and chemistry of the Earth's atmosphere; and implementation of the Arctic Research and Policy Act of 1985.

General and special funds—Continued

RESEARCH AND RELATED ACTIVITIES—Continued

Scientific, technological, and international affairs.—This activity facilitates international scientific cooperation; provides policy-oriented data, information and analysis; and supports cross-disciplinary activities that strengthen the Nation's scientific and engineering research base. Programs cover small business innovation research; cooperative scientific activities between the U.S. and advanced and developing countries; policy research and analysis; science resources studies; and special research initiation and improvement activities.

Advanced scientific computing.—This activity is aimed at providing high quality access to advanced computational facilities to the academic research community. Major components are support for the establishment of supercomputer centers and improvement of networks for supercomputer access.

Program development and management.—This activity provides for the operation, support, management, and direction of all NSF programs and activities and includes necessary funds to develop, manage, and coordinate these program activities.

U.S. Antarctic program.—The Foundation manages the U.S. program in the Antarctic and supports a multidisciplinary research program on weather and climate, earth sciences, glaciology and other physical and biological characteristics of Antarctica and its surrounding seas. This activity is the major expression of U.S. interest and presence in Antarctica.

Operations support.—Logistical support, including aircraft, helicopters and vessels and living accommodations at three Antarctic bases, is provided.

The special foreign currency program utilizes U.S.-owned excess currencies in certain foreign countries to support cooperative scientific projects, seminars, and the travel of U.S. and foreign scientists involved in mutually beneficial efforts. Payments for this program are made in foreign currencies which the Department of the Treasury determines to be excess to the requirements of the United States.

The major science and engineering education activities of the Foundation are:

Research career development.—Promotes the future strength of the Nation's scientific endeavors by awarding graduate research fellowships to some of the most promising graduate students in science and engineering.

Materials development, research and informal science education.—Promotes improvement in science and mathematics education for the Nation's schools through the development of instructional materials for students and teachers, through the support of research to better understand the process of teaching and learning, and through development of programs of informal science education using museums, the media and other out-of-school organizations.

Teacher preparation and enhancement.—Supports projects for pre-professional programs, continuing education and professional development of precollege mathematics and science teachers.

Studies and program assessment.—Supports studies and analyses to provide a systematic and current understanding of the condition of science and mathematics education in the United States.

College science instrumentation.—Assists in strengthening science instruction at the Nation's undergraduate colleges through support for modern scientific equipment.

The National Transportation Safety Board, as an independent nonregulatory agency, is charged with promoting transportation safety through the investigation of accidents, the conduct of special studies, the development of recommendations to prevent accidents, the evaluation of the effectiveness of other Government agencies in preventing transportation accidents, and the review of appeals on actions taken against transportation certificates and licenses.

Policy and direction.—This activity provides Board-wide policy and program guidance, the determination of probable cause of transportation accidents, the issuance of safety recommendations, the approval of accident reports, the final review of appeals involving airman and seaman certificates and licenses, the implementation and direction of policies and programs, liaison with the Congress and other Government agencies, and legal and public affairs advice and services.

Accident investigation.—This activity provides for the management of accident investigations, the development of their probable cause, the development of recommendations, and the preparation of reports on aviation, railroad, highway, marine, pipeline, and hazardous materials accidents.

Technology.—This activity provides specialized advice and services for the Board's accident investigation, accident prevention, and safety promotion activities in the areas of human, vehicular, environmental, and operational factors. It develops recommendations, provides laboratory support, and conducts special investigations.

Safety programs.—This activity provides oversight of other transportation agencies through the conduct of evaluations of their safety programs. This activity also provides oversight of transportation systems through the conduct of safety studies. In addition, it manages the development and follow-up of the Board's safety recommendations and the Board's responses to Notices of Proposed Rulemaking. It provides statistical analysis of transportation accident and incident data, and it acts as program manager for some of the Board's safety objectives to insure action is taken on certain transpor-

tation safety problems not being addressed by Government or industry.

Administration.—This activity provides administrative support to assure accomplishment of Board programs through financial management, personnel management and training, procurement and facilities services, automated data processing services, equal employment opportunity, and other administrative support.

Administrative law judges.—These judges conduct hearings on appeal from the suspension, amendment, modification, revocation, or denial of any operating certificate or license issued by the Secretary of Transportation under the Federal Aviation Act of 1958.

The National Transportation Safety Board is mandated by Congress to investigate all catastrophic transportation accidents and, therefore, has no control over the frequency of costly accident investigations. The emergency fund provides a funding mechanism by which periodic accident investigation cost fluctuations can be met without delaying critical phases of the investigations.

The major activities of the Corporation include the establishment, provision of technical services to, and assistance in the expansion to other neighborhoods of Neighborhood Housing Services (NHS) and Apartment Improvement Programs in older, declining residential neighborhoods; identifying, evaluating, and supporting neighborhood preservation projects that show promise as strategies for reversing neighborhood decline; replicating successful neighborhood preservation projects; and, promoting a national secondary market for local NHS revolving loan funds.

The Corporation receives both Federal and non-Federal funding to finance its program activities. The program and financing schedule above reflects only direct Federal appropriations to the Corporation. For 1987, $15,285,000 is requested. The following business-type tables reflect the total program activity of the Corporation and include all sources of financing, both Federal and non-Federal.

Nuclear reactor regulation.—The primary objective of nuclear reactor regulation is the assurance of public health and safety, and protection of the environment in the design, siting, construction and operation of nuclear power reactors. Continued emphasis will be on the review and implementation of cost-effective safety issues pertaining to operating reactors, and ensuring that the NRC licensing process does not unnecessarily delay plant fuel loading, startup testing, and operations. Other major goals include timely resolution of priority generic safety issues, including human factor issues and implementation of the Severe Accident Program. NRC will perform the regulatory activities necessary for the decontamination of the Three Mile Island-2 (TMI-2) power plant, the defueling of the reactor, and the disposition of the radioactive waste.

Inspection and enforcement.—The purpose of Inspection and enforcement programs is to ensure that nuclear reactors, fuel facilities and material licensees under NRC jurisdiction are constructed, operated and used in a manner which protects the public health and safety and the environment, and that prompt and vigorous enforcement action is taken against licensees who do not comply with NRC regulations. The Inspection and enforcement program is conducted by the NRC headquarters Office of Inspection and Enforcement and NRC's five regional offices. The headquarters office has responsibility for inspection policy and program development, assessment of regional implementation of the inspections program, appraisal inspections to determine licensee and regional performance, vendor inspections, escalated enforcement actions, evaluation of licensee events, response to incidents, management of the NRC Operations Center, emergency preparedness license reviews, specialized technical training for all of NRC, and the NRC Quality Assurance program. The regional offices implement the NRC inspection program by conducting inspections of reactors, fuel facilities and materials licensees, initiating and taking certain enforcement actions, conducting systematic assessment of licensee performance, performing emergency preparedness annual reviews, responding to incidents by dispatching personnel to the site in question, and providing technical support to the Office of Investigations. In the regions, the increased number of operating reactors will require additional effort. A second resident inspector will be assigned to all construction sites and reactors in preoperational testing. A second resident will also be assigned to almost all sites having only a single operating unit.

Nuclear material safety and safeguards (NMSS).—These programs have the primary objective of ensuring adequate protection of the public health and safety and the environment in the design, siting, construction, and operation of nuclear fuel cycle facilities including nuclear waste storage and disposal facilities, and the utilization and transportation of nuclear materials. NMSS is responsible for performing the safety, environment, and safeguards reviews of applications for fuel cycle facility operating licenses, and the amendment and renewal of such licenses. NMSS is also responsible for licensing the utilization of nuclear materials and for regulating the design of containers, as required by 10 CFR 71, used for transporting nuclear materials. In addition, NMSS is responsible for conducting reviews of the safeguards plans for power and non-power reactors. The achievement of program goals is a joint undertaking of the NMSS Headquarters Office and the five regional offices. Major emphasis during 1987 will continue to be placed on implementation of the Nuclear Waste Policy Act of 1982.

Nuclear regulatory research.—The 1987 program will continue to develop an independently verified source of safety information to be used in conjunction with data furnished by licensees as a basis for regulatory decisions. Research is also used to develop analytical methods in support of Commission rulemaking activities and policy determinations. Efforts in 1987 will deal with safety issues that arise from equipment malfunction that can be expected to occur during the life of a nuclear power plant. Further, efforts associated with accidents beyond the current design basis with fission product releases will be continued along with efforts on developing and improving reliability analysis and methods for quantifying probability consequences associated with reactor accidents. Disposal of both low and high level nuclear waste involves issues that are at the forefront of technology related to radionuclides in the disposal facility environment. Regulatory research is required to ensure that criteria are appropriate to permit a sound evaluation and to assure that all regulatory requirements will be met.

The Panama Canal Act of 1979 established the Panama Canal Commission to operate and maintain the interoceanic waterway. The Commission is self-sufficient in its operations and makes payments to the Republic of Panama as specified in the Panama Canal Treaty of 1977.

Budget program—Transit operations.—The services performed by this activity are (in thousands of dollars):

	1985 actual	1986 estimate	1987 estimate
Maintenance of channels and dams	42,414	38,581	38,562
Navigation service and control	66,727	72,594	72,969
Lock operations	42,847	45,452	47,376
General repairs, engineering, and maintenance services	51,577	48,571	48,351
Fire and facility protection services	9,564	9,565	10,673
Public service payments to Panama	10,000	10,000	10,000
Payments to Panama	62,803	64,343	67,806
General canal expense	16,057	17,891	18,545

Less intra-agency recoveries	−32,825	−30,645	−30,706
Net operating expenses	269,164	276,352	283,576

Annuity payments to Panama are for certain public services to be provided by Panama, a fixed annuity of $10 million, and an annuity based on net tonnage of vessels transiting the canal. These payments are prescribed in paragraph 5 of article III and paragraph 4(a) and 4(b) of article XIII of the Panama Canal Treaty of 1977.

In 1987, the Transit Reservation System, which is designed to finance partially the capital program, is projected to generate $6.5 million. Vessel traffic volume and other indices of workload are as follows:

	1985 actual	1986 estimate	1987 estimate
Ship transits (over 300 net Panama Canal tons)	11,654	11,965	12,000
Tolls (in thousands of dollars)	300,808	311,000	312,000

Capital obligations for 1987 include the following major projects: replacement of two diesel cranes, replacement and addition of transit equipment, installation of a fire protection system at locks facilities, replacement of transformers containing PCB at locks facilities, and other improvements to transit facilities.

Supporting services.—The services performed by these support activities are (in thousands of dollars):

	1985 actual	1986 estimate	1987 estimate
Supply and logistical services	33,296	37,052	38,186
Utilities	40,998	45,492	47,266
Other supporting services	12,750	11,057	10,540
Total operating expenses	87,044	93,601	95,992
Less intra-agency recoveries	24,095	24,684	25,461
Net operating expenses	62,949	68,917	70,531

Capital obligations for 1987 include several projects for electric power and communication systems improvements.

Administrative and general expense.—This category includes the overall direction and administrative expenses of the Commission; the costs of the employee health benefits program; special retirement costs; the annuitant welfare program; death and disability payments; and the cost of health and education services provided to Commission employees and dependents at Department of Defense facilities. Also included is the interest expense on the investment of the U.S. Government in the Canal. Interest collected in 1986 and hereafter will be paid into miscellaneous receipts of the U.S. Treasury. In 1987 the Panama Canal Commission is proposed to be financed by general fund appropriations with the collections deposited in a proprietary receipt account. This proposal follows this presentation.

The Panama Canal Act of 1979 established the Panama Canal Commission to operate and maintain the interoceanic waterway. The Commission is self-sufficient in its operations and makes payments to the Republic of Panama as specified in the Panama Canal Treaty of 1977. The Commission currently is financed by tolls deposited in a special fund, but is proposed to be financed by general fund appropriations in 1987.

Budget program—Transit operations.—The services performed by this activity are (in thousands of dollars):

	1985 actual	*1986 estimate*	*1987 estimate*
Maintenance of channels and dams			38,562
Navigation service and control			72,969
Lock operations			47,376
General repairs, engineering, and maintenance services			48,351
Fire and facility protection services			10,673
Public service payments to Panama			10,000
Payments to Panama			67,806
General canal expense			18,545
Total operating expenses			314,282
Less intra-agency recoveries			−30,706
Net operating expenses			283,576

Annuity payments to Panama are for certain public services to be provided by Panama, a fixed annuity of $10 million, and an annuity based on net tonnage of vessels transiting the canal. These payments are prescribed in paragraph 5 of article III and paragraph 4(a) and 4(b) of article XIII of the Panama Canal Treaty of 1977.

In 1987, the Transit Reservation System, which is designed to finance partially the capital program, is projected to generate $6.5 million. Vessel traffic volume and other indices of workload are as follows:

	1985 actual	*1986 estimate*	*1987 estimate*
Ship transits (over 300 net Panama Canal tons)			12,000
Tolls (in thousands of dollars)			312,000

Capital obligations for 1987 include the following major projects: replacement of two diesel cranes, replacement and addition of transit equipment, installation of a fire protection system at locks facilities, replacement of transformers containing PCB at locks facilities, and other improvements to transit facilities.

Supporting services.—The services performed by these support activities are (in thousands of dollars):

	1985 actual	*1986 estimate*	*1987 estimate*
Supply and logistical services			38,186
Utilities			47,266
Other supporting services			10,540
Total operating expenses			95,992
Less intra-agency recoveries			−25,461
Net operating expenses			70,531

Capital obligations for 1987 include several projects for electric power and communication systems improvements.

Administrative and general expenses.—This category includes the overall direction and administrative expenses of the Commission; the costs of the employee health benefits program; special retirement costs; the annuitant welfare program; death and disability payments; and the cost of health and education services provided to Commission employees and dependents at Department of Defense facilities. Also included is the interest expense on the investment of the U.S. Government in the Canal. The interest collected in 1987 will be paid into miscellaneous receipts of the U.S. Treasury.

This appropriation reimburses the Postal Service for previously unfunded liabilities of the former Post Office Department. The Administration proposes to stop reimbursing the Postal Service for losses in revenue associated with carrying certain categories of mail at free and reduced rates beginning in 1987. However, legislation will be proposed that will enable the Postal Service to continue the subsidy for most existing subsidized mailers.

The Postal Reorganization Act of 1970, Public Law 91-375, converted the Post Office Department into the U.S. Postal Service, an independent establishment

Public enterprise funds—Continued

Postal Service Fund—Continued

within the executive branch. The Postal Service commenced operations July 1, 1971. This agency is charged with providing patrons with reliable mail service at reasonable rates and fees.

The U.S. Postal Service is governed by an 11-member Board of Governors, including 9 Governors appointed by the President, a Postmaster General who is selected by the Governors, and a Deputy Postmaster General who is selected by the Governors and the Postmaster General.

Decisions on changes in domestic rates of postage and fees for postal services are recommended to the Governors of the Postal Service by the independent Postal Rate Commission after a hearing on the record under the Administrative Procedure Act. The Commission also recommends decisions on changes in the domestic mail classification schedule to the Governors. Decisions of the Governors on rates of postage, fees for postal services, and mail classification are final, subject to judicial review.are all postal activities providing window services; processing, delivery, and transportation of mail; research and development; administration of postal field activities; and associated expenses of providing facilities and financing.

Financing.—The activities of the U.S. Postal Service are financed from the following sources: (1) mail and services revenue, (2) reimbursements from Federal and non-Federal sources, (3) proceeds from borrowing, (4) interest from U.S. securities and other investments, and (5) appropriations by the Congress. All receipts and deposits are made to the Postal Service Fund and are available without fiscal year limitation for payment of all expenses incurred, retirement of obligations, investment in capital assets, and investment in obligations and securities.

Section 2005 of title 39, United States Code, authorizes the Postal Service to borrow by issuing obligations which may not exceed $10 billion outstanding at any one time. In any one fiscal year, the net increase in amounts outstanding may not exceed $1.5 billion in obligations issued for the purpose of capital improvements and $500 million for the purpose of defraying operating expenses. As of September 30, 1987, it is expected that the total debt instruments issued and outstanding pursuant to this authority will amount to $4.7 billion.

Operating.—Estimated receipts will total $31.5 billion in 1987. This includes $31.2 billion from mail and services revenue, $216 million from investment income and $40 million from appropriations.

Legislation will be proposed to increase the employer's contribution for retirement beginning in 1987 by 2% each year until the Postal Service is paying the full cost of benefits for its employees. In addition, the Postal Service will match additional employee retirement contributions which are proposed to increase by 2% in 1987. Legislation will also be proposed to require the Postal Service to pay the government's portion of health insurance costs for all postal annuitants.

This appropriation is a Federal subsidy to the rail industry pension for costs not financed by the railroad sector. The American taxpayer subsidy annually approaches $1,000 per rail employee.

Subsidy for windfall payments.—When first authorized in 1974, the windfall subsidy appropriation was estimated at $250 million annually for 25 years, or a total subsidy of $6.25 billion. In two years, the annual windfall subsidy estimate increased by 45 percent and, within five years, the Railroad Retirement Board reported that the original 1974 estimate had doubled to $500 million and would continue to increase if there were any inflation after 1980.

The Carter administration, faced with increasingly large projected subsidy costs, sought to limit to $350 million annually the general taxpayers' liability to subsidize this rail industry pension, a position also reflected in the March revisions to the 1982 budget. Based on their collectively-bargained agreement and assuming a $350 million subsidy appropriation, rail labor and management successfully sought congressional restructuring of the rail industry windfall in Public Law 97–35. The rail sector sought to limit windfall payments to the appropriated subsidy amounts rather than rely on the rail industry funded retirement account. This extended the subsidy well beyond the year 2000.

To prevent an uneven transition in individual benefit amounts between 1986 and 1987, the 1987 windfall appropriation request reflects 1986 reductions required by Public Law 99–177. Should Public Law 99–177 require additional reductions later in 1987, lowering appropriation amounts eliminates the necessity of upward and subsequent downward adjustments in individuals' benefit amounts.

The Board administers a separate rail sector fund for unemployment and sickness insurance payments. Administrative expenses are financed from employer unemployment taxes. The rail sector fund is projected to be unable to pay full benefits on a timely basis beginning in 1986. Excess administrative funds will be transferred to the railroad sickness and unemployment fund to help pay unemployment and sickness benefits to rail workers.

Maintenance of rail earnings accounts.—Unemployment and sickness payments are based on individual records of rail earnings and daily wage rates.

Processing of rail unemployment insurance claims.—Claims for unemployment compensation are filed with employers and certified for payment through the headquarters office. As the table below indicates, unemployment claims are projected to decline by 64 percent from 1983 to 1987, resulting in a proportionate reduction in workloads and staffing requirements. The budget proposes to increase rail sickness and unemployment insurance administrative resources and staffing above the levels justified by the declining workload, to enhance the prevention and detection of waste, fraud, and abuse.

Processing of rail sickness claims.—These claims are filed by mail and certified for payment through the headquarters office. Sickness claims are also projected to decline by 24 percent, from 411,900 in 1983 to 314,000 in 1987.

Rail claimant placement services.—The Board conducts an employment service for unemployment benefit claimants.

Administration.—The costs of administration are shared between this and the rail pension program on an allocated basis, which is periodically revised for actual experience.

Railroad retirees generally receive the equivalent to a social security benefit and a rail industry pension collectively bargained like other private pension plans but embedded in Federal law. About 314,000 individuals also receive a "windfall" benefit.

Income.—Railroad industry pension fund revenues are derived from pension contributions by railroad employers and employees; interest on investments; various temporary subsidies; and payments from the Federal old-age, survivors and disability insurance trust funds. The railroad retirement system has an annual financial interchange with social security. Under this arrangement, social security has paid railroad retirement some $24 billion, with annual payments exceeding $2 billion. It was designed by the rail sector to help finance the rail industry pension, placing social security in the same position in which it would have been if railroad employment had been directly covered by social security.

Retirement, disability, and survivor benefit payments.—Estimates reflect the increases in benefit rates provided by law.

Administrative expenses.—These expenses are subject to annual limitations in appropriation acts (see Limitation on Administration).

Payment to Federal hospital insurance trust fund.—That portion of taxes which finances hospital insurance benefits is for payment to the Federal hospital insurance trust fund, since payments of hospital benefits for railroad beneficiaries are made from that fund.

These proposals would: (1) make uniform the treatment of rail pension payments for income tax and cost-of-living adjustment purposes; (2) freeze cost-of-living adjustments on rail pensions for 1 year; (3) extend Federal/State unemployment insurance coverage to railroad employment; (4) require the railroad retirement trust funds to pay the full normal costs of Railroad Retirement Board employees' civil service retirement benefits to the civil service retirement trust fund; (5) require the rail sector to finance 25 percent of full windfall costs, and (6) require the Secretary of Health and Human Services to conduct continuing disability reviews for railroad retirement disability beneficiaries.

Maintenance of rail earnings accounts.—Eligibility for retirement and the amount of rail benefits paid are based on individual rail earnings records.

Processing rail applications.—This activity includes processing annuity claims under the Railroad Retirement Act of 1974. Based on amendments enacted in Public Law 97-35, benefit computations were simplified. Coupled with the continued decline in railroad retirement applications and automation of previously manual procedures, the Board's workload devoted to this activity is expected to continually decrease each year. The table below shows the continued decline anticipated in major workloads.

	1985 actual	*1986 estimate*	*1987 estimate*
Pending, start of year	27,850	27,000	23,700
New Railroad Retirement applications	84,469	76,000	79,000
New Social Security certifications	12,759	15,000	15,000
Total dispositions (excluding partial awards)	98,078	94,300	94,300
Pending, end of year	27,000	23,700	23,400

The budget proposes to invest $3.3 million for software to upgrade the Board's automated claims processing capability. (Substantial funds for investments in automation were also included in the 1985 and 1986 appropriations.) The Board estimates that the major automation projects to be completed in 1987 will result in improved service, more accurate payments, and a dramatic improvement in productivity. The Board projects these investments will result in savings of about 200 work years and full-time equivalent positions and commensurate savings in administrative and other program expenses. The budget proposes to adjust staffing levels in railroad retirement only for the estimated savings from automation, and to devote the staff resources freed by declining workloads to automation and quality control.

The Board projected work year savings of 17 in 1985, 36 in 1986, 64 in 1986, 173 in 1987, and 203 in 1988 from these investments.

Maintenance of rail beneficiary rolls.—The Board will explore and adopt new approaches to improve service to beneficiaries, primarily by making improvements in automation.

As shown below, the Board projects this workload will continue to decline, as the number of beneficiaries on the rolls continues to decline.

	1985 actual	*1986 estimate*	*1987 estimate*
Total beneficiaries	954,000	940,000	926,000

Medicare.—This activity includes on a reimbursable basis processing applications for the Social Security and Health Care Financing Administrations of the Department of Health and Human Services to establish eligibility for health and medical insurance benefits under title XVIII of the Social Security Act for rail beneficiaries.

Administration.—The cost of administration is shared between the rail pension, social security, and the railroad unemployment insurance programs.

In recognition of the continuing decline in virtually all its major workloads, the Board will explore and adopt new approaches to improve service to beneficiaries, primarily by making improvements in automation.

All investigatory activities will be brought under this office's direction.

All railroad retirees receive the equivalent of a social security benefit, and they may also receive other add-ons including rail industry pension payments, windfall payments, and supplemental annuities. Social security benefits for former railroad employees are funded by the social security trust funds, and rail industry pension payments are the responsibility of the rail sector. The combination of both these payments in a single trust fund gave rise to serious concerns that social security payments to railroad retirees might be jeopardized by the continuing financial problems of the rail industry pension fund. To ensure and protect the integrity of social security benefits to railroad retirees, the Railroad Retirement Solvency Act of 1983 mandated that beginning in 1985, the financing and payment of Federal social security benefits be separated from the rail industry pension trust fund.

The primary purpose of the Commission is to protect the interests of the investing public.

Full disclosure.—To insure that investors will be provided with material facts concerning securities offered for public sale, issuers who propose to offer new securities for public sale are required to file registration statements with the Commission at its home or regional offices. Issuers having total assets and security-holder populations of specified sizes are also required to furnish comparable information on a continuing basis in annual and other periodic reports, in proxy solicitation materials, and in tender offers and acquisition reports. Commission staff review these filings to insure full and fair disclosure and to prevent fraud and misrepresentation.

Electronic filing pilot project.—The purpose of this pilot project is to improve the efficiency, effectiveness and productivity of the receipt, review and dissemination of public disclosure filings by eliminations of the reliance on paper. The pilot project which began operating in September 1984, is testing the feasibility of receiving, analyzing, and disseminating a limited number of full disclosure filings electronically.

Following the pilot project, the SEC intends to select an operational contractor which will assume the responsibility for providing to the government, a nationwide capability for electronic receipt, analysis, and dissemination of filings. Transition from the pilot to the operational system will occur during late 1986. The contractor will have the right to market and sell public information from the Commission's data base.

Annual and periodic reports filed—other than investment companies	48,891	51,244	52,644
Ownership and transaction reports filed	114,758	126,000	138,000

Prevention and suppression of fraud.—Suspected fraud and manipulation in the purchase, sale, and trading of securities, illegal distributions of unregistered securities, and other unlawful conduct is prevented, minimized, or eliminated by investigating complaints, questionable trading activities, and other indications of possible violations of the Federal securities laws. In addition, remedies through civil, criminal and administrative legal actions are sought as appropriate.

In 1987 the Selective Service System will continue to register men as they reach age 18, conduct a non-registrant identification program to insure compliance with the law, and maintain a data base of registrant records. The System will continue to develop enhancements to ensure its capability to respond rapidly and efficiently from its standby posture.

Mobilization readiness.—This activity includes all facets of National and Regional operational planning, maintenance of automated registration information, a comprehensive training program for the Selective Service Reserve Forces, a training program for the standby board members, and administrative functions. The processing procedures of the Registrant Information Management System will continue to be tested and refined to insure that it can fully satisfy the emergency manpower needs of the Armed Forces.

Reserve program.—This activity involves the preparation of the Reserve and National Guard officers for mobilization assignments in specific positions with the Selective Service System. Special focus of the program is on the exercise of the mobilization plans to ensure a high readiness capability in the event of mobilization.

as the Museum of African Art buildings; a zoological park and animal conservation and research center; the new Museum Support Center and other collections storage and preservation facilities at Silver Hill, MD; two natural preserves, in Panama and on the Chesapeake Bay; an astrophysical observatory on Mount Hopkins, AZ; and supporting administrative, laboratory, and storage areas. The new Center for African, Near Eastern, and Asian Cultures, currently under construction in the Quadrangle south of the Smithsonian Institution Building, is scheduled to open to the public in 1987. Visitor attendance to buildings on and off the Mall, including the National Zoological Park, is expected to total approximately 27 million in 1986. Millions more will view traveling exhibitions.

In 1987, emphasis will continue to be placed on strengthening the security of the collections; improving the maintenance of the physical plant; providing collections management support, including the purchase of additional collections storage equipment for the Museum Support Center and continuation of the move of the collections to be located there; insuring scientific equipment support of ongoing research programs; and proceeding with collections and management information systems. Resources are also included to staff and operate the Center for African, Near Eastern, and Asian Cultures and for the Directorate of International Activities.

This account encompasses repairs, alterations, and improvements; additions, renovations, and restorations of a long-term nature and utility; construction of minor new temporary and permanent buildings or facilities; and facilities planning and studies. In 1987, funds are sought to continue comprehensive programs to keep Smithsonian facilities, including roofs, facades, and terraces, in good repair and efficient operating condition; provide for the safety and security of visitors, staff and collections by upgrading existing and installing new fire detection and suppression systems; remove hazardous materials such as asbestos; upgrade heating, ventilating and air-conditioning systems to provide the proper environmental conditions for the National Collections and to improve energy efficiency; and provide for the needs of disabled visitors and staff. Other restoration and renovation improvements necessary to meet the research, exhibition, educational and conservation program objectives of Smithsonian organizations are also included.

National Air and Space.—The National Air and Space Museum was completed and opened to the public on July 1, 1976. Necessary repairs to the building's facade and terrace will continue.

Museum Support Center.—The Institution accepted beneficial occupancy of the Museum Support Center in early 1983. These facilities will provide additional space for the care, curation, conservation, deposit, preparation, and study of the National Collections, for the related documentation of the collections, and for the training of museum conservators. Space presently used for storage will be returned to its intended use for public exhibition.

Quadrangle.—The construction and equipping of the new Center for African, Near Eastern, and Asian Cultures will continue in 1987 in preparation of the public opening.

Hirshhorn Museum and Sculpture Garden.—The unobligated balance of the construction account for the Hirshhorn Museum, returned to the Institution by the General Services Administration in 1985, will be used to correct defects related to the original construction of the building.

Smithsonian Tropical Research Institute.—To design and construct a scientific laboratory and research conference facility, including necessary equipment and furnishings.

The objectives of the Woodrow Wilson Center are to produce scholarship of the highest quality on subjects that matter to our civilization and to communicate that scholarship to a wider audience within and beyond Washington through publication and dialog.

The Center has chosen to fulfill these objectives through its fellowship and guest scholar program. Each year the Center conducts a major open international competition for a limited number of fellowships. The scholars and the scholarly work they produce constitute the memorial to Woodrow Wilson. Virtually all of the Center's expenditures derive from the basic decision to create a resident body of fellows.

The Center is directed by its congressional statute to raise both public and private funds and the Center's major objectives could not be attained by an exclusive reliance on either Federal appropriation or private contribution.

The Navajo and Hopi Indian Relocation Commission was established by Public Law 93-531 to plan and conduct relocation activities associated with the settlement of a land dispute between the two tribes.

Bonuses are paid to clients who volunteered for relocation prior to July 7, 1982. Relocation of clients includes such activities as certification, housing acquisition and construction, and land acquisition. Discretionary funds will be used for activities which will facilitate and expedite the overall relocation effort.

The Tennessee Valley Authority (TVA) was created in 1933 as a Government-owned corporation for the unified development of a river basin comprised of parts of seven States. Its program in 1987 will be financed from three sources: (1) appropriations by the Congress; (2) proceeds available from current power operations and borrowings against future power revenues; and (3) proceeds available from nonpower activities.

The following table provides detailed information on programs financed by power proceeds and borrowings and programs financed by appropriations and nonpower proceeds.

Budget program—natural resources.—TVA concentrates its efforts on programs in navigation, flood control, dam safety and maintenance of the waterway.

Water resources.—Includes operation and continuing development of the navigation channel from Paducah, KY, to Knoxville, TN.

For flood control, TVA operates a system of multipurpose reservoirs to retain excessive seasonal runoff and regulate discharges at flow rates that can be accommodated by downstream channels and reservoirs. As a result, flood crests are reduced along the Tennessee River and its tributaries and also the lower Ohio and Mississippi Rivers.

Dam safety modifications and maintenance activities ensure that the waterway system meets Federal safety guidelines in the event of severe flood conditions and maintenance is performed to keep the system in good and safe operating condition.

Land and forest resources.—This program consists of operation of dewatering areas associated with TVA's reservoir system.

Resource management.—The program contains two major areas of effort: Protection of public lands and waters under TVA trust; and valley mapping and demonstrations of remote sensing in support of TVA activities as well as the regional mapping needs of the U.S. Geological Survey.

National fertilizer development.—The National Fertilizer Development Center in Muscle Shoals, AL, is active in two program areas: Research and development and technology development.

Research and development consists of basic chemical and agronomic research and development of fertilizer products and processes. This is accomplished in cooperation with the Department of Agriculture, the land-grant universities, and industry.

Technology development is conducted with the land-grant universities and the fertilizer industry. It includes small-plot demonstrations, tests and demonstrations of fertilizer materials and practices on selected operating farms. In 1987 non-federal funding for this component of the fertilizer program will become self-supporting.

Power program: Power supply and use.—TVA is the sole supplier of electric power to an area of 80,000 square miles in the seven Tennessee Valley States. Income from power operations, net of interest charges and depreciation, and other operating expenses is estimated at $621,000 thousand in 1987.

The power generating facilities presented in the capital investment table are financed from power proceeds and borrowings.

General services.—Operating costs for general service activities include bridge maintenance, fallout shelter maintenance, and reimbursable services furnished at the request and expense of other agencies.

Financing.—Amounts estimated to become available in 1987 are to be derived from (1) the requested appropriation of $58,038 thousand; (2) nonpower revenues and receipts of $125,600 thousand; and (3) power revenues and receipts of $4,978,629 thousand. In addition, the budget program anticipates financing from borrowings of $532,000 thousand backed by future revenues. A summary of the application of appropriations follows:

Operating results and financial conditions.—Only the power program and fertilizer introduction are intended to be self-supporting; the net expense of nonpower programs is covered largely by appropriation funding. Payments to the Treasury from power proceeds in 1987 are estimated at $104,900 thousand—$84,900 thousand as a dividend (return on the appropriation investment in the power program) and $20,000 thousand as a reduction in the appropriation investment in the power program. Outstanding borrowings for the power program are expected to increase by $532,000 thousand during 1987.

Total assets are estimated to increase by $814,752 thousand during 1987. A total of $867,776 thousand of the increase in assets is in the power program and −$53,024 thousand is in nonpower programs. The estimate of liabilities at September 30, 1987, is $299,075 thousand more than the estimate at September 30, 1986. Total Government equity at September 30, 1987, is estimated to be $515,677 thousand greater than that at September 1986. This change includes the requested appropriation for 1987 and the net income from power operations, less payments to the Treasury and the net expense of nonpower programs.

The United States Information Agency conducts the international communication, educational, cultural and exchange programs of the United States. The Agency advises the President, the National Security Council, and the Secretary of State on the above areas, and assists in the development and execution of a national policy on international communications.

Agency operations are largely financed from this appropriation and the related special foreign currency appropriation and consist of the following major elements:

Overseas missions.—The Agency plans to operate 218 posts in 129 countries in 1987. These posts administer the exchange-of-persons program and conduct informational and other cultural programs using materials prepared locally and by the media services in Washington.

Voice of America.—This activity produces radio broadcasts in English and in 41 languages. Programs are broadcast from transmitters at 4 domestic and 13 overseas locations.

Educational and cultural affairs.—This activity covers the staff that administers educational and cultural exchanges between the United States and over 140 countries. It also provides program and support costs for the President's International Youth Exchange program, American-sponsored schools abroad, binational centers, U.S.-operated libraries and reading rooms abroad and other educational and cultural activities. Grant costs for the Academic and Visitor Exchanges, the Humphrey Fellowship program and the Private Sector Exchange program are funded separately in the Educational and Cultural Exchanges account.

Program coordination, production, and support.—This activity serves primarily to support overseas missions by coordinating program planning and by producing, acquiring, and adapting various program materials for their use.

Television and Film Service.—This Service acquires and produces programs for distribution overseas and for direct telecasts via satellite. This activity also includes the Agency's new television service, WORLDNET, which has opened a new era in worldwide communication.

National Endowment for Democracy.—In 1985, funding for this activity was appropriated as part of the Salaries and Expenses account. However, 1986 funding was provided in a separate account. As shown below, the 1987 budget proposes to continue this practice.

Agency direction and management.—This activity encompasses managerial staffs and centralized servicing functions for the Agency as a whole.

The 1987 request for this account will provide funds to cover added operating costs, principally overseas employee wage scales and inflationary increases for rents, utilities, diesel fuel, and other overseas goods and services. Additional increases will provide funds to continue the operation of the Agency's two initiatives for which supplemental funding is requested in 1986. These include Agency support for the US-USSR cultural accords announced by the President in Geneva and the initiation of a television station in Berlin (RIAS-TV). See part II of this volume for further information.

This appropriation, together with the balances available from prior years, was formerly used for payment of local program expenses in U.S.-owned foreign currencies in those countries where the Department of the Treasury had determined that the supply of such currencies was in excess to the normal requirements of the U.S. Government. Beginning in 1986, new appropriations for these payments in excess of available balances were budgeted for in the Salaries and expenses account.

This appropriation provides funding for programs authorized by the Mutual Educational and Cultural Exchanges Act of 1961, as amended, including academic exchanges and grants for foreign leaders and professionals to make short-term visits to the United States. USIA operates a variety of cooperative exchange programs with the private sector. It also arranges special programs for selected foreign individuals and groups visiting the United States under other than U.S. Government sponsorship.

The Agency also manages other exchange related activities funded from the Agency's S&E appropriation, i.e.: international youth exchange, Board of Foreign Scholarships, student support, studies of the U.S. and libraries, reading rooms, cultural centers and related resources.

The staff costs to operate the exchange programs funded by this appropriation are included in the Agency's S&E account.

Academic and visitor exchanges.—This activity consists of academic exchange of American and foreign graduate students, teachers, scholars and specialists; and officially invited international visitors as well as important foreign visitors who are not U.S. Government-sponsored.

Hubert H. Humphrey fellowships.—This activity provides for one year of graduate training to promising mid-career professionals from third world countries.

Private sector programs.—This activity supports traditional and other exchange programs conducted by nongovernmental organizations.

Congress-Bundestag Exchange Program.—This activity provides mutual full scholarships for year-long academic homestay programs between Germany and the United States. This project is co-funded with each country providing half of the necessary funds to support these exchanges.

The 1987 request will provide for cost increases and enhancements in the academic and visitor exchanges and Humphrey fellowships.

The National Endowment for Democracy is a private, nonprofit corporation established in the District of Columbia to encourage and strengthen the development of democratic institutions and processes internationally, including activities which promote individual rights and freedom, through private sector initiatives, exchanges, training programs, and other activities.

The National Endowment for Democracy Act provides that the U.S. Information Agency will make an annual grant to the Endowment to enable the Endowment to fulfill the purposes of the Act. The Endowment does not carry out programs directly but provides funding for activities of the Free Trade Union Institute of the AFL-CIO, the National Chamber Foundation of the U.S. Chamber of Commerce (the Act earmarks funds for these two organizations), and other private organizations and groups. The 1987 estimates will enable the Endowment to continue programs initiated during its initial years of operation.

The Voice of America: Radio Marti Program was created by the Radio Broadcasting to Cuba Act (Public Law 98-111). The programs are transmitted via the present Voice of America transmitter facility at Marathon, Florida.

The objectives of the Radio Marti Program are: (1) to support the right of the people of Cuba to seek, receive, and impart information and ideas through any media and regardless of frontiers; (2) to be effective in furthering the open communication of information and ideas through use of radio broadcasting to Cuba; (3) to serve as a consistently reliable and authoritative source of accurate, objective, and comprehensive news; and (4) to function in accordance with all Voice of America standards, and to broadcast programs which present a variety of views.

Program operations.—These funds provide for program operations which include personnel compensation, research, transmission costs and other programming requirements. The Radio Marti Program began broadcasting at 5:30 AM, May 20, 1985, from studios in Washington, D.C. The program currently broadcasts 14.5 hours each day, seven days per week.

Acquisition and construction of facilities.—Upgrading of the transmitter site at Marathon, Florida, and construction of permanent broadcast studios in Washington are currently underway. Presently, the Agency is broadcasting from temporary studios in Washington, and using the existing facilities at Marathon.

The Center for Cultural and Technical Interchange between East and West is a national educational institution administered on behalf of the United States Information Agency by a public, nonprofit educational corporation under a grant from the Agency. The Center promotes better relations and understanding between the United States and the nations of Asia and the Pacific through cooperative programs of research, study, and training, which bring qualified persons from the countries of the area to work jointly on problems of mutual concern.

The funds requested in 1987 will essentially maintain the Center's programs at current levels and will provide for 2,290 participant awards for an average of ten weeks each.

Acquisition and construction of facilities.—In 1987, the Agency will continue the multi-year effort of modernizing and expanding the technical transmission capability of the Voice of America (VOA). This effort responds to reviews of the operations of U.S. Government funded radios, which found deficiencies in the VOA's capability to meet current public diplomacy objectives. To eliminate these deficiencies and provide an operationally effective global radio network that is a critical element of the public diplomacy programs of the Agency, VOA will continue to rehabilitate and modernize existing stations, expand selected operational sites, and construct additional new facilities. The 1987 appropriation, plus balances, will provide $175,322 thousand for this program.

Maintenance and improvement of existing facilities.—This program will provide $11,551 thousand in 1987 for the continuing repairs and improvements required to maintain the VOA's existing global radio network.

Advanced engineering and technical development.—This category will provide $500 thousand for the continuing program of engineering development, equipment design and radio propagation techniques specifically applicable to the VOA. It also will provide $10,363 thousand to continue work on developing an automated worldwide monitoring system and the worldwide operations center, continue studies on worldwide technical transmission requirements, and purchase additional systems engineering technical assistance.

Land rentals.—This activity will provide $517 thousand for land rental payments for certain VOA facilities overseas and in the United States.

USRA was created as a temporary agency in 1973 to oversee the formation of Conrail, monitor its performance, and act as a conduit for Federal assistance. These activities have been completed; Conrail is currently a profitable corporation operating without government subsidy.

The Department of Transportation continues its efforts to sell Conrail. It is anticipated that the tasks of USRA (to be prepared to respond to congressional requests on Conrail) will be fulfilled by the middle of 1986, and the agency will have no function thereafter.

PAYMENTS FOR PURCHASE OF CONRAIL SECURITIES—Continued

These funds were provided for the U.S. Railway Association to purchase debentures and series A preferred stock issued by the Consolidated Rail Corporation.

The Association purchased $1 billion in Conrail debentures prior to 1978. Since reaching the $1 billion level, purchases of securities have been in the form of series A preferred stock. These purchases amounted to $2,280 million at the end of 1985.

The Department of Transportation is currently trying to sell the Government's interest in Conrail, as mandated by the Northeast Rail Services Act of 1981.

[1] Includes direct loans made by USRA and guaranteed by the Federal Railroad Administration, previously shown in FRA.
[2] Reflects repayment of accrued interest.

The United States Railway Association is authorized by the Regional Rail Reorganization Act, as amended, to borrow funds and make loans to certain railroads. These borrowings are guaranteed by the Secretary of Transportation and are limited to an aggregate of outstanding obligations of $395 million. Two types of loans are currently authorized: (a) loans related to the implementation of the system plan developed by the Association for restructuring the bankrupt railroads in the Northeast and Midwest, and (b) loans to defray obligations of the reorganized railroads which were incurred prior to the conveyance of their rail properties but which were unpaid after the conveyance to the Consolidated Rail Corporation on April 1, 1976. During 1985 the Association disposed of Erie Lackawana stock holdings and repaid $4 million in outstanding loan interest. No new loans will be made in 1987.

The United States Sentencing Commission was established pursuant to provisions of the Comprehensive Crime Control Act of 1984 (Public Law 98–473, Title II). The purpose of the Commission is to establish sentencing guidelines for the United States district courts and other sentencing policies and practices for the Federal criminal justice system. The Commission is also charged with developing means of measuring the degree to which the sentencing, penal, and correctional practices are effective in meeting the purposes of sentencing as set forth in new section 3553(a)(2) of Title 18, United States Code, by section 212(a) of the Act.

PART II

SUPPLEMENTALS AND RESCISSIONS

EXPLANATION OF REQUESTS

This part contains supplemental appropriations requests for 1986 being proposed for congressional consideration in this budget. Requests for supplemental appropriations are usually made after enactment of regular appropriations. In cases where programs are funded under a continuing resolution, some requests are included to supplement the funding available under the resolution. Information is also included on proposals to rescind budget authority and to rescind or otherwise reduce the availability of other budgetary resources.

PROPOSED SUPPLEMENTAL REQUESTS

Supplemental requests are shown as separate sections.

Section I.—Supplementals proposed in this budget for various purposes are presented in this section and usually include: suggested appropriation language, the related budget schedules, and the reasons for the requests. In some cases, language is proposed to reduce mandatory program levels (entitlements, for example) included in authorizing legislation. In such cases, separate budget schedules are not shown, but the reduced funding levels that would result are reflected in the regular budget schedules for the account in Part I. Language is also included to propose reductions in enacted direct loan and guaranteed loan limitations. A status of direct loans or status of guaranteed loans schedule will show the changes in credit activity resulting from the lower limitation.

RESCISSION PROPOSALS

Section II.—Under the provisions of the Impoundment Control Act of 1974 (Public Law 93-344), whenever the President proposes rescission of enacted appropriations, a special message must be sent to the Congress giving details of the proposal. Included in this part—for rescission proposals being made in conjunction with this budget—are related budget schedules, references to the special message being sent to the Congress, and explanations of the proposals.

	Relation of obligations to outlays:			
71.00	Obligations incurred, net		2,000	
90.00	Outlays		2,000	

This proposal would provide funds to make a preliminary study for the construction of a building to meet the present and future office space needs of the Judiciary.

Funds Appropriated to the President

Disaster Relief

(Supplemental now requested, existing legislation)

For an additional amount for "Disaster relief", $250,000,000, to remain available until expended.

Program and Financing (in thousands of dollars)

Identification code 11-0039-1-1-453		1985 actual	1986 est	1987 est
	Program by activities:			
10.00	Total obligations		250,000	
	Financing:			
40.00	**Budget authority (appropriation)**		**250,000**	
	Relation of obligations to outlays:

74.40	Obligated balance, end of year		−125,000	−50,000
90.00	Outlays		125,000	75,000

This supplemental appropriation would provide funds to alleviate the suffering and damage that results from disasters. The large number and magnitude of disasters during the latter part of 1985, along with on-going requirements for previously declared disasters, have resulted in greater than anticipated demand for disaster assistance funds.

Object Classification (in thousands of dollars)

Identification code 11-0039-1-1-453		1985 actual	1986 est	1987 est
25.0	Other services		37,500	
41.0	Grants, subsidies, and contributions		212,500

Department of Agriculture

FARMERS HOME ADMINISTRATION

Rural Housing Insurance Fund

(Supplemental language now requested, existing legislation)

During fiscal year 1986, and within the resources and authority available, gross obligations for the principal amount of direct loans shall not exceed $1,427,600,000.

Status of Direct Loans (in thousands of dollars)

Identification code 12-4141-1-3-371		1985 actual	1986 est	1987 est
	Position with respect to appropriations act limitation on obligations:			
1111	Limitation on direct loans to the public		−700,000	
1150	Total direct loan obligations		−700,000	
	Cumulative balance of direct loans outstanding:			
1210	Outstanding, start of year			
1231	Disbursements: Direct loan disbursements		−361,000	
1254	Repayments: Loan asset sales to the FFB		361,000	
1290	Outstanding, end of year			

Rural Housing Insurance Fund, FFB Loan Asset Purchases

(Supplemental language now requested, existing legislation)

Status of Direct Loans (in thousands of dollars)

	Cummulative balance of direct loans outstanding:			
1210	Outstanding, start of year			−361,000
1231	Disbursements: Direct loan disbursements		−361,000	
1290	Outstanding, end of year		−361,000	−361,000

The proposed reduction in direct lending is part of an overall proposal to transfer the responsibility for rural housing to the Department of Housing and Urban Development's voucher program. Historically, the Farmers Home Administration has been able to meet the housing needs of very low-income households due to income constraints. An accompanying rescission of budget authority is found elsewhere in Part II.

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

(Supplemental now requested, existing legislation)

SALARIES AND EXPENSES

For an additional amount for "Salaries and expenses", $71,598,000, *to be derived by transfer from the Commodity Credit Corporation fund.*

Program and Financing (in thousands of dollars)

Identification code 12-3300-1-1-351	1985 actual	1986 est.	1987 est.
Program by activities:			
00.01 Program formulation and appraisal		2,721	
00.02 Operation of supply adjustment, conservation, and price support programs		61,510	
00.03 Inventory management and merchandising		7,367	
10.00 Total obligations		71,598	
Financing:

39.00 **Budget authority**			
Relation of obligations to outlays:			
71.00 Obligations incurred, net			
90.00 Outlays			

This supplemental request would provide transfer authority to cover increased administrative costs related to the implementation of the Food Security Act of 1985; as well as for increased costs to carry out record commodity loan making and forfeiture activity in Agricultural Stabilization and Conservation Service county offices and in Kansas City field offices.

Object Classification (in thousands of dollars)

Identification code 12-3300-1-1-351	1985 actual	1986 est.	1987 est.

24.0 Printing and reproduction		63	
25.0 Other services		1,828	
26.0 Supplies and materials		49	
31.0 Equipment		23	
41.0 Grants, subsidies, and contributions		64,110	
99.9 Total obligations		71,598	

Personnel Summary

Total number of full-time permanent positions			
Total compensable workyears: Full-time equivalent employment		169	

COMMODITY CREDIT CORPORATION

COMMODITY CREDIT CORPORATION FUND

(Supplemental now requested, existing legislation)

For reimbursement of the Commodity Credit Corporation for net realized losses sustained or anticipated, but not previously reimbursed, such sums as may be necessary are available in this and subsequent years, as authorized by the Act of August 17, 1961 (15 U.S.C. 713a-11, 713a-12).

Program and Financing (in thousands of dollars)

Identification code 12-4336-1-3-351	1985 actual	1986 est.	1987 est.
Program by activities:			
10.00 Operating expense, interest (total obligations) (object class 25.0)		71,598	
Financing:			
39.00 **Budget authority**		**71,598**	
Budget authority:			
40.00 Appropriation: Reimbursement for net realized losses (indefinite)		7,950,000	
40.47 Portion applied to debt reduction		−7,950,000	
43.00 **Appropriation (adjusted)**			
47.10 **Authority to borrow**		**71,598**	
Relation of obligations to outlays:			
71.00 Obligations incurred, net		71,598	
90.00 Total outlays		71,598	

This proposal would provide funds to reimburse the Commodity Credit Corporation (CCC) for net realized losses. This request is needed to finance record fiscal year 1986 CCC outlays that, without the requested supplemental, would exhaust CCC borrowing authority in late January 1986. This request would also finance increased Agricultural Stabilization and Conservation Service administrative costs related to implementation of the Food Security Act of 1985 and record commodity loanmaking and forfeiture activity.

FOREST SERVICE

NATIONAL FOREST SYSTEM

(Supplemental now requested, existing legislation)

For an additional amount for "National Forest System", $165,700,000.

Program and Financing (in thousands of dollars)

Identification code 11-1106-1-1-302	1985 actual	1986 est.	1987 est.
Program by activities:			
10.00 Land and resource protection (total obligations)		165,700	
Financing:			
40.00 **Budget authority (appropriation)**		**165,700**	
Relation of obligations to outlays:			
71.00 Obligations incurred, net		165,700	
90.00 Outlays		165,700	

These funds would be used to provide for the costs of fighting forest fires in 1985.

This schedule reflects the effect of proposed supplemental language to reduce the direct and guaranteed loan limitations for Trade Adjustment Assistance and subsequent transfer to their account.

INTERNATIONAL TRADE ADMINISTRATION

OPERATIONS AND ADMINISTRATION

(Appropriation language now requested, existing legislation)

During fiscal year 1986, and within the resources and authority available, gross obligations for the principal amount of direct loans shall not exceed $960,000 and no commitments to guarantee loans may be made.

Department of Education

OFFICE OF SPECIAL EDUCATION AND REHABILITATIVE SERVICES

Rehabilitation Services and Handicapped Research

(Supplemental language now requested, existing legislation)

Of the amounts made available under this head in Public Law 99-178, $9,000,000 shall be for activities under section 100(b)(2) and part C of title I of the Rehabilitation Act: Provided, That such funds be used only to award grants for projects that develop or expand transition from school to employment programs or that establish support employment programs for severely disabled individuals.

The last paragraph under this head in Public Law 99-178 is deleted.

This proposed language would ensure that the Department of Education could require State vocational rehabilitation agencies to use the entire amount of Innovation and Expansion grant funds for either transition or supported employment projects. Current legislation and regulations would only allow the Department to require that 50% of these funds be used for these purposes. This language would also allow the Department to award projects with Industry and Centers for Independent Living funds competitively.

OFFICE OF POSTSECONDARY EDUCATION

College Housing Loans

(Supplemental language now requested, existing legislation)

Under the heading "College Housing Loans" in the Department of Education Appropriation Act, 1986, Public Law 99-178, delete the phrase that reads "During the fiscal year 1986 and within the resources and authority available, gross commitments for the principal amount of direct loans shall be $60,000,000." and substitute the following: During the fiscal year 1986, no new direct loan commitments may be made.

74.98 Obligated balance, end of year: Fund balance		50,299	
90.00 Outlays			–5,742

This language would prohibit any new college housing loan commitments from being made in 1986. There is no demonstrated national need for new college housing construction subsidies. Available cash resources of the fund, in excess of program operating costs, would be used to amortize the fund's outstanding borrowing liability to the Treasury.

This supplemental is required to enable the Department of Energy to repay notes issued to the Treasury to pay off the Federal Financing Bank debt on the Great Plains Gasification Project. A total of $1,169,895,322 was borrowed from Treasury on September 30, 1985. Repayment is assumed on June 30, 1986 with interest accruing at 8.29 percent. The interest payment equals $72,538,959. This interest amount, plus $149,535,000 of the principal borrowed, would be repaid from funds held in reserve by the Department of Energy to cover costs associated with a default on the Federal Financing Bank loan to Great Plains. The balance of $1,020,360,322 is the subject of this supplemental request.

RENT SUPPLEMENT PROGRAM

(Limitation reduction now requested, existing legislation)

The limitation otherwise applicable to the maximum payments that may be required in any fiscal year by all contracts entered into under section 101 of the Housing and Urban Development Act of 1965 (12 U.S.C. 1701s), is further reduced in fiscal year 1986 by not more than $41,390,000 in uncommitted balances of authorizations provided for this purpose in appropriation Acts.

RENTAL HOUSING ASSISTANCE

(Limitation reduction now requested, existing legislation)

The limitation otherwise applicable to the maximum payments that may be required in any fiscal year by all contracts entered into under section 236 of the National Housing Act (12 U.S.C. 1715z-1), is further reduced in fiscal year 1986 by not more than $10,128,000 in uncommitted balances of authorizations provided for this purpose in appropriation Acts.

The program for conversions of Rent Supplement units to Section 8 was completed in 1985. However, recaptures will continue for projects for which Section 8 units have been reserved, but have not yet converted. The supplemental language for Rent Supplement and Rental Housing Assistance is proposed to recover any recaptured authority as a result of the conversions.

HOUSING FOR THE ELDERLY AND HANDICAPPED FUND

(Supplemental language now requested, existing legislation)

Of the amount provided under this heading in the Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1986 (Public Law 99-160, 99 Stat. 909, 911), the limitation of direct loan obligations which may be made under section 202 of the Housing Act of 1959, as amended (12 U.S.C. 1701q), is reduced to $54,642,000.

The reduction in the direct loan limitation for Section 202 elderly and handicapped housing is proposed to effect outlay savings, and is consistent with the proposal to use housing vouchers to meet the housing needs of those currently served by the Section 202 program. The proposed loan limitation for 1985 is sufficient to cover units already reserved in 1986, and to address the expected capital amendment requirements for units reserved in prior years.

This reduction in the direct loan limitation for nonprofit sponsor assistance is proposed to effect outlay savings consistent with deficit reduction policies. The new limitation is adequate to assist organizations in need of assistance with Section 202 elderly and handicapped housing projects which were reserved in 1985.

COMMUNITY PLANNING AND DEVELOPMENT

COMMUNITY DEVELOPMENT GRANTS, FFB DIRECT LOANS

(Supplemental language now requested, existing legislation)

The limitation on total commitments to guarantee loans, as authorized by section 108 of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 5901), provided under this heading in the Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1986 (Public Law 99-160) is reduced to $50,000,000 of contingent liability for loan principal.

This proposal would effect outlay savings consistent with deficit reduction policies. In addition, the Budget proposes to terminate the Community Development Loan Guarantee program (Section 108 of the Housing and Community Development Act of 1974, as amended).

REHABILITATION LOAN FUND

(Supplemental language now requested, existing legislation)

Of the amounts made available under this heading in the Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1986 (Public Law 99-160), not to exceed $11,000,000 may be used for commitments for loans.

MINERALS MANAGEMENT SERVICE

Payments to States From Receipts Under Mineral Leasing Act

(Supplemental now requested, existing legislation)

Notwithstanding any other provision of law, in fiscal year 1986, moneys received from sales, bonuses, royalties (including interest charges collected under the Federal Oil and Gas Royalty Management Act of 1982), and rentals of the public lands under the provisions of the Mineral Lands Leasing Act of 1920, as amended, and the Geothermal Steam Act of 1970, which are not payable to a State or to the Reclamation Fund, shall be available for the payment of interest in accordance with 30 U.S.C. 1721 (b) and (d), prior to the crediting of such funds to miscellaneous receipts of the Treasury.

This proposal would provide funds for payments of interest to States and Indian accounts when such revenues are not disbursed within the timeframes prescribed by the Federal Oil and Gas Royalty Management Act of 1982. Payments to the States for their share of mineral leasing revenues must be made no later than the last day of the month following the month in which the revenues have been received. Payments to Indian accounts must be made no later than the last business day of the month in which such funds are received. The Act provides that any payment not made by the required date would include an interest charge computed at the rate applicable under Section 6621 of the Internal Revenue Code.

This proposal would provide funds for the following:

1. The preparation of environmental impact statements and other activities necessary to comply with a preliminary injunction relating to mining in Alaska national parks.
2. Putting the Park Police pension fund on a sound actuarial basis for 1986.
3. The cost of wildlife prevention and suppression incurred in 1985.

This supplemental request would provide funding for the first full year of the Compact of Free Association. The people and Governments of the Marshall Islands and the Federated States of Micronesia have approved the Compact negotiated with the United States and approved by the Congress on December 13, 1985. The President is notifying the United Nations of the impending change in status of the two states, and the Trusteeship Agreement will terminate this year. The Compact binds the United States to make annual payments to the two Governments during the next fifteen years totaling $2.3 billion to aid in their development as sovereign states.

This proposed supplemental would provide for the increased average daily prisoner population in the Federal Prison System.

OFFICE OF JUSTICE PROGRAMS

CRIME VICTIMS FUND

(Appropriation language now requested, existing legislation)

Not to exceed $64,917,420 shall be obligated during fiscal year 1986 for victim compensation and assistance programs, notwithstanding section 1402, 1403, or 1404 of the Victims of Crime Act of 1984 (Public Law 98-473).

74.40	Obligated balance, end of year		2,038	680
90.00	Outlays		−1,358	−1,358

This proposal would reduce the anticipated obligations of the Crime Victims Fund by $3.4 million in 1986. No grant funds targeted for the States would be affected; only outlays for Federal victims activities would be reduced. The purpose of the obligation limitation is to reduce overall Government outlays by deferring activity planned for the Federal Government into 1987.

90.00	Outlays		2,600	37,000

This supplemental would provide funding for the Job Training Partnership Act dislocated worker assistance program. The funds would be provided to the States under section 301(c) of the Act in order to deal with the most severe dislocated worker unemployment problems. Funding would be available for obligation from the date of the supplemental's enactment through June 30, 1987.

STATE UNEMPLOYMENT INSURANCE AND EMPLOYMENT SERVICE OPERATIONS

This proposal, when added to the reduction required by Public Law 99-177, would result in a total reduction of $37 million in authority to spend from the Unemployment Trust Fund for Employment Service (ES) formula grants for the program year that begins July 1, 1986. This reduction, part of overall efforts to constrain expenditures in order to meet deficit reduction goals, would reduce grants that finance State ES administra-

tive costs 3.0 percent below the level of such grants for the program year that began July 1, 1985.

ADMINISTRATIVE PROVISIONS—INTERNAL REVENUE SERVICE

(Appropriation language now requested, existing legislation)

Section 1. Notwithstanding any other provision of this title, any appropriations made available to the Internal Revenue Service for the current fiscal year may be transferred to any other Internal Revenue Service appropriation to the extent necessary for increased pay costs authorized by law.

Section 2. Not to exceed 5 per centum of any appropriation made available to the Internal Revenue Service for the current fiscal year may be transferred to any other Internal Revenue Service appropriation.

The appropriation language in Section 1 would provide the Internal Revenue Service (IRS) authority to transfer funds related to pay costs among appropriations. This gives the IRS flexibility to correct misallocations which occurred when the 5 percent pay reduction was restored.

Section 2 would provide the authority to enable the Internal Revenue Service to transfer funds between operating appropriations so as to minimize disruptions to programs resulting from budget reductions such as those required under the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99-177).

General Services Administration

REAL PROPERTY OPERATIONS

FEDERAL BUILDING FUND

LIMITATIONS ON AVAILABILITY OF REVENUE

(Limitation increase now requested, existing legislation)

In addition to the aggregate amount heretofore made available for real property management and related activities in fiscal year 1986, $200,000 shall be made available for such purposes and shall remain available until expended for the construction and acquisition of facilities, as follows:

Payment of construction claims:

Georgia: Atlanta, Federal Building-Courthouse, $200,000: Provided, That any revenues, collections, and any other sums accruing to this fund during fiscal year 1986 in excess of $2,412,201,000, excluding reimbursements under section 210(f)(6) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 490(f)(6)), shall remain in the fund and shall not be available for expenditure except as authorized in appropriations Acts.

This limitation increase would finance costs associated with the payment of an outstanding construction claim on the Atlanta, Georgia, Federal Building-Courthouse.

Office of Personnel Management

SALARIES AND EXPENSES

(Appropriation language now requested, pending existing legislation)

Not to exceed $2,500 shall be made available for official reception and representation expenses.

This language would authorize the Office of Personnel Management to use funds already appropriated for official reception and representation expenses to carry out responsibilities for programs such as Veterans and handicapped employees, and provide information on personnel matters to the public, private industry, State and local officials and foreign nations.

Veterans Administration

COMPENSATION

(Supplemental now requested, existing legislation)

For an additional amount for "Compensation", $272,000,000, to remain available until expended.

PANAMA CANAL COMMISSION

OPERATIONS AND FACILITIES

(Supplemental now requested, existing legislation)

For an additional amount for "Operations and facilities," $25,619,000, to be derived from the Panama Commission Fund, of which $24,500,000 shall be available for payment of vessel accident claims as authorized by Public Law 99-209, and $1,119,000 shall be available for payment to the Republic of Panama, pursuant to article XIII, paragraph 4(c) of the Panama Canal Treaty of 1977.

This rescission proposal reflects a decline in the inflation rate and a lower level of farmer participation due to a depressed farm economy that has reduced the cost of completing the 21 approved projects.

74.40 Obligated balance, end of year		97,462	17,010
90.00 Outlays		-43,377	-80,452

This proposal reflects the policy of privatization of government functions best left to the private sector when possible. Responsibility for the maintenance of the productivity and profitability for the individual farm is primarily the responsibility of its owner, who has an economic stake in preserving its productivity. Finally, financial assistance under the Food Security Act of 1985 should be concentrated on the longer term conversion of cropland that meets strict criteria for entry into a Conservation Reserve Program.

74.40 Obligated balance, end of year		7,327	6,465
90.00 Outlays		-1,044	-862

This proposal reflects the fact that the major program thrust for waterfowl habitat protection is in the Department of the Interior, which has a dedicated source of funding for waterfowl habitat preservation authorized by the Migratory Bird Conservation Act. Finally, the "swampbuster provision" of the Food Security Act of 1985 would deny farm benefits to producers who convert wetlands to crop use in the future, except where the impact of the action is found to be minimal.

Dairy Indemnity Program

(Rescission proposal)

Relation of obligations to outlays:			
71.00 Obligations incurred, net		-95	
90.00 Outlays		-95	

This proposal reflects the fact that the Dairy Indemnity Program is a low priority program for which no 1986 claims for losses were filed prior to September 30, 1985. The $95 thousand provided in 1986 was not requested in the President's Budget. Rescission of these funds is proposed in order to contribute to deficit reduction. The funds provided by this appropriation address a problem which is of limited scope and about which there are differences of opinion concerning the proper role of the Government.

RURAL ELECTRIFICATION ADMINISTRATION

Rural Electrification and Telephone Revolving Fund

REIMBURSEMENT TO THE RURAL ELECTRIFICATION AND TELEPHONE REVOLVING FUND

(Rescission proposal)

Program and Financing (in thousands of dollars)

Identification code 12-3101-5-1-271	1985 actual	1986 est.	1987 est.
Program by activities:			
10.00 Reimbursement for interest subsidies and losses (total obligations) (object class 33.0)		-100,000	
Financing:

Relation of obligations to outlays:			
71.00 Obligations incurred, net		-100,000	
90.00 Outlays		-100,000	

This rescission proposal would reduce 1986 budget authority by the amount made available to reimburse the Rural Electrification and Telephone Revolving Fund for interest subsidies and losses incurred in 1984. This reimbursement to the Revolving Fund is not necessary since the fund's actual interest income exceeds its interest expense in 1984.

The Federal Government, however, incurred a loss of at least $100 million in 1984 from REA loans because REA direct loan interest rates are below the cost of Government borrowing. An appropriation to reimburse the Revolving Fund would continue a costly subsidy. The only way to cover this loss to the Government and the taxpayer is to raise REA direct loan interest rates to the cost of Government borrowing. This would be in accord with the original statute establishing the REA loan program, which set interest rates at and above Treasury cost of borrowing.

The 1986 appropriation for the Federal purchase of Bank stock is proposed for rescission. The Federal Government has already provided the $300 million in capital called for in the original statute establishing the Bank. These funds only begin to be repaid starting in 1995. The Bank has the authority to raise funds in private credit markets on the $300 million capital base provided by the Federal Government, and it is authorized to borrow without limitation from the U.S. Treasury at the same interest rate the Treasury pays, with 50-year repayment terms. Even without the capital proposed for rescission, the Bank would continue to be heavily subsidized with taxpayer dollars, and rural telephone borrowers would continue to enjoy low-cost money. The Banks's current lending rate is 9.0 percent. This proposal would not affect the Bank's lending levels or outlays, nor would it reduce the total budgetary resources available to the Bank.

These rescissions are proposed to permit the transfer of responsibility for rural housing to the Department of Housing and Urban Development's voucher program. Historically, the Farmers Home Administration loan program has been unable to meet the housing needs of very low income households due to income constraints. This rescission is accompanied by proposed supplemental language elsewhere in Part II to reduce the direct lending program.

This proposal would rescind funds for grants and loans to firms adversely affected by increased imports. The fact that a firm has been harmed by import competition should not in and of itself constitute justification for special government assistance. U.S. trade laws provide remedies against unfair import competition. In addition, high default rates suggest that a large proportion of these loans and loan guarantees have not assisted in the intended adjustment. This rescission is part of an overall proposal to terminate this program. Supplemental language reducing the direct and guaranteed loan programs is included elsewhere in Part II of the Budget Appendix.

The public telecommunications facilities program provides grants to plan for and construct non-commercial broadcasting in areas not served by public television and radio. Over 95 percent of the United States currently receives public broadcasting. This rescission would eliminate $21.8 million of the $24.0 million available for

Public Telecommunications Facilities, Planning and Construction—Continued

grants from the 1986 appropriation while allowing for an orderly phaseout of the program.

90.00 Outlays		−2,170	−27,506

This rescission proposal covers eight small categorical programs. Funding for training and advisory services would be reduced to $16 million as the first step in a two-year phaseout. Funding for the other seven programs would be terminated immediately. These programs duplicate the assistance provided under broader, more flexible authorities such as Chapter 1, the Chapter 2 block grant, the Teacher training and improvement program, and the Magnet schools assistance program. In several cases, such as Women's educational equity and Follow through, the programs have outlived their usefulness as specific activities. In other cases, such as Excellence in education, the programs are poorly designed to accomplish their objectives. In all cases, the programs can be considered nonessential diversions of Federal resources.

This proposal would rescind funds appropriated for the emergency immigrant education program. Children eligible for this program who need services can be served by other programs if they are educationally disadvantaged or limited English proficient. Services under Chapters 1 and 2 of the Education Consolidation and Improvement Act of 1981 and title VII of the Elementary and Secondary Education Act are sufficient to ease any burden to school districts of educating these children.

Funding for the deaf-blind centers within special populations is proposed for partial rescission as part of the phasedown of Federal funds for these services which the States are already required to provide. Special education personnel development funding within the training and information activity is proposed for partial rescission. Data available to identify personnel shortage areas do not support the need for the enacted level of funding. Special studies funding within the research and technology activity is reduced to a level sufficient to fund all mandated studies. The remaining reductions are proposed to maintain the activities at about the 1985 level of funding, a level which is adequate to finance the Federal government's share of responsibility.

This proposal would rescind funds for recreation programs because these programs are more appropriately supported by voluntary organizations and local governments. The training program would be funded at the level necessary to meet continuation costs. Evaluation would be funded at the level needed for new evaluation contracts. Other reductions return funding to the 1985 level, a level adequate for Federal contributions to these activities.

This proposal would rescind a portion of the funds for vocational education basic grants and all funds for community-based organizations and consumers and home-

making education. Categorical funding for community-based organizations and consumer and homemaking education is not necessary, since activities under these programs are allowable under the basic grant program. The rescission in the basic grant program is necessary in order to achieve deficit reduction targets, while protecting other higher priority programs. However, funds for title II, part A, which authorizes vocational education opportunities for six special populations, would be maintained at the full enacted level.

This proposal would rescind funds in student aid programs of grant, work and loan assistance to reduce Federal funding to levels consistent with overall budget constraints and with limited Federal responsibility in this area. Loan capital contributions would be eliminated because of the excessive, unnecessary borrower subsidies in the current direct loan program. The goals of the State student incentive grant program have been achieved and the program no longer requires Federal financial support.

This recission is proposed for the following purposes:

1. *Special programs for the disadvantaged.*—A partial rescission is proposed to refocus resources on providing only direct services for students. Grantees would be required to share in the costs of their continuation projects.

2. *Veterans' cost-of-instruction.*—This program is no longer needed for Vietnam-era veterans in college.

3. *Fund for the improvement of postsecondary education.*—A partial rescission is proposed to focus support only on potentially exemplary projects which respond to identified, needed improvements in postsecondary education.

4. *International education and foreign language studies.*—This program has successfully established foreign language studies and area and international education programs in postsecondary curriculums so that Federal funding is no longer necessary. Specific Federal-level needs in this area can be met with related programs of the Departments of Defense and State and the U.S. Information Agency.

5. *Cooperative education.*—This demonstration program has repeatedly demonstrated the virtues of coop-

erative education. Federal encouragement and stimulation of such activity has not been needed for many years.

6. *Academic facilities construction grants.*—This program duplicates support for research facilities and equipment currently provided by several other Federal agencies and is an inappropriate activity for the Department of Education.

7. *Graduate programs and scholarship programs.*—These student aid programs duplicate support available under the Department's general student financial aid programs and through the National Science Foundation and National Endowment for the Humanities.

8. *Special grants.*—These activities, including the Robert A. Taft Institute of Government, assistance to Guam, and the Center for Excellence in Education at Indiana University, are narrow in purpose and nonessential.

90.00	Outlays		−4,994	−705

The rescission proposal would reduce matching funds available for Howard's endowment to a level more consistent with the University's demonstrated ability to generate non-Federal funds. The rescission of the research funds reflects the fact that the 1985 appropriation for this purpose was intended to be a one-time supplement to improve Howard's research grant acquisition capacity. Research is an integral part of university academic operations and should not be funded as if it were a separate activity.

This rescission is proposed because (1) Federal support for public library construction has long since accomplished its goal and is thus no longer an appropriate Federal responsibility; (2) training, demonstrations and research library support substitutes Federal for ample non-Federal resources and provides money to many well-financed institutions; and (3) starting a new program, library literacy, which can have only the most marginal impact, is not appropriate when spending control is necessary to help reduce deficits.

NATIONAL INSTITUTES OF HEALTH

These following rescission proposals represent an integral component of the administration's policy to fund the National Institutes of Health (NIH) at a strong, stable, and sustainable level. These proposed rescissions provide for a smooth transition to 18,000 total NIH research project grants in 1987, and assumes implementation of the congressional directive to restrain excessive growth in direct costs and allocated overhead.

This rescission proposal represents an integral component of the administration's policy to fund the Alcohol, Drug Abuse, and Mental Health Administration at a strong, stable, and sustainable level. The proposed rescission provides for a smooth transition to 1,400 total research project grants in 1987, and it assumes implementation of the congressional directive to restrain excessive growth in direct costs and allocated overhead. The proposal reflects the adequate supply of mental health clinicians, completion of the Federal role in community services demonstrations, and States' capabilities to monitor care for the mentally ill.

This proposal would rescind funds that are in excess of estimated requirements for this program in 1986. Existing targeted assistance grants are expected to last well into 1987, requiring no additional funding in 1986. Where necessary funding for other activities would be continued at rates required to meet the needs of the declining number of newly arriving refugees.

This rescission proposal would terminate financing for the Work Incentive (WIN) program in the last quarter of fiscal year 1986. Repeated studies of WIN have shown that the program is not cost-effective. Alternative job finding and social services programs are available for Aid to Families With Dependent Children (AFDC) recipients under the Job Training Partnership Act, which requires equitable service to AFDC recipients, and the Social Services Block Grant.

The proposal would rescind $182,139,000 from 1986 funds for community services activities. The community services block grant and discretionary community services activities have been proposed for termination as they duplicate other sources of Federal funding, such as the $2.7 billion social services block grant. The rescission proposal implements the termination proposal.

The budget authority that is no longer required in 1986 as a result of the proposal to fund housing vouchers in lieu of longer term subsidies, which require more budget authority, is rescinded by this proposal. The rescission also includes the funds made available for the rental rehabilitation and rental development grant programs. Funds set aside by each of the provisos in the proposed language are sufficient to cover reservations made to date and fund an additional 50,000 housing vouchers. The proposed language also would make funds recaptured under the Section 235 homeownership assistance program and the rental housing development grant program subject to the same automatic rescission provision that governs the rest of the resources in this account.

90.00	Outlays		–13,379	–11,041

This rescission proposal would reduce the appropriation for State grants and would reduce low priority Federal land acquisition by $19.3 million. This is consistent with the administration's position that the cost of State programs should be borne by the States and that low priority land acquisitions be avoided. It is also proposed that $28.7 million in annual contract authority for land acquisition be rescinded. Significant increases in the authorized level of the fund and the use of reprogramming procedures have eliminated the need for this authority.

This proposal would rescind unobligated carry-forward grant funds of the National Institute of Corrections. In light of the increasing Federal deficit, the Federal Government can no longer afford to fund programs to benefit State and local governments at the same level as in the past. The remaining funds are adequate to carry out the National Institute of Corrections' mission.

This proposal would rescind funds for four programs: The first, juvenile justice grants, has already accomplished its major program objectives, as established by the authorizing legislation—i.e., separation of adult from juvenile offenders and deinstitutionalization of status offenders. The second program, State and local assistance grants, fund projects that are beneficial only to particular State or local communities, and should, therefore, be funded by those communities rather than by the Federal Government. The Regional Information Sharing System projects were originally funded by the Law Enforcement Assistance Administration on a demonstration basis with the expectation that financial support for the projects would be assumed by the States. The projects serve less than 10 percent of the State and local law enforcement agencies and the Administration believes that the agencies which benefit from the services should now pay for those services. The same can be said for the Mariel Cuban program. This program, which began in 1985, benefits only 16 States and should be paid for by those 16 States, not by the Federal Government.

This rescission proposal includes both grants to states and federally administered Job Training Partnership Act funding. In the grants to states area, a summer youth employment and training program rescission is possible since proposed program changes will permit the targeting of resources to areas with the most severe youth unemployment problems. In the federally administered programs area, the rescission proposal, in conjunction with reductions mandated by the Balanced Budget and Emergency Deficit Control Act of 1985, would reduce Job Corps capacity from 40,500 to 22,000 between May 1986 and January 1, 1987. In addition, the rescission eliminates unnecessary set-aside funding for the rural concentrated employment programs, and reduces native American, migrant and seasonal farmworker, and veterans employment programs funding to statutorily-required levels related to block grant funding.

90.00	Outlays		−5,455	−4,019

The rescission is proposed to reduce the 1986 funding for the Local Rail Service Assistance Program consistent with the President's budget proposal to eliminate this program. This grant program to States for rehabilitation of rail lines abandoned by the railroads is local in nature and is more appropriately the responsibility of the State and local governments.

74.40	Obligated balance, end of year		30,456	28,853
90.00	Outlays		−1,603	−1,603

The proposal would rescind 1986 funding for the Redeemable Preference Share program. This program has served the purpose for which it was intended to serve and should have expired at the end of 1985 as scheduled. The provision of low cost loans to rehabilitate railroad lines is no longer necessary in light of the improved health of the railroad industry and availability of private sector loans.

This account funds administrative expenses incurred by the Railroad Retirement Board in disbursing benefit payments under the Milwaukee Railroad Restructuring Act and the Rock Island Act. The Board estimates that very little in the way of administrative expenses will be charged to the account in 1986, and anticipates no costs in future years. Rescission of remaining budget authority would close out the account.

OTHER MATERIALS

EXPLANATION OF OTHER MATERIALS

This section includes the following material:

(a) A list of advance appropriations, as required by the Congressional Budget Act of 1974 (31 U.S.C. 1105(17)), a list of appropriations with advance funding provisions, and a list of appropriations with forward funding provisions.

(b) A statement of amendments and revisions to 1986 budget authority requests that were transmitted to the Congress after the 1986 Budget but prior to the transmittal of the 1987 Budget, as required by section 601 of the Congressional Budget Act of 1974.

(c) A statement of the amounts of appropriations requested for Offices of Inspectors General, as required by section 3 of the Federal Managers' Financial Integrity Act of 1982 (Public Law 97-255).

ADVANCE APPROPRIATIONS, ADVANCE FUNDING, AND FORWARD FUNDING FOR 1987

I. Advance appropriations are provided for use in a fiscal year, or more, beyond the fiscal year for which the appropriation act is passed. Advance appropriations in 1987 appropriations bills will provide funding for programs beyond 1987. Since these appropriations are not available until after 1987, the amounts will not be included in 1987 budget totals, but will be reflected in the budget totals for the fiscal year requested.

The Congressional Budget Act of 1974 (31 U.S.C. 1105(17)) requires inclusion in the budget of "information on estimates of appropriations for the fiscal year following the fiscal year for which the budget is submitted for grants, contracts, and other payments under each program for which there is an authorization of appropriations for that following fiscal year when the appropriations are authorized to be included in an appropriation law for the fiscal year before the fiscal year in which the appropriation is to be available for obligation." In fulfillment of this requirement, the table below lists those accounts authorized to receive, in 1987, advance appropriations for 1988 and later years. The listing is in two parts: Part A shows the amounts of advance appropriations included in the 1987 budget. Part B is a listing of accounts for which advance appropriations are authorized but not requested in the 1987 budget.

A. Accounts for which advance appropriations are included in the 1987 budget:
  Department of Health and Human Services, except Social Security: [1]
    Assistance payments program (42 U.S.C., sec. 601) $2,293,615 thousand for 1988.
    Child support enforcement program (42 U.S.C., sec. 651) $187,000 thousand for 1988.
    Supplemental security income program (42 U.S.C., sec. 1381) $2,765,000 thousand for 1988.
    Special benefits for disabled coal miners (30 U.S.C., sec. 921) $252,450 thousand for 1988.
    Grants to States for medicaid (42 U.S.C., sec. 1396) $7,100,000 thousand for 1988.
  Department of Energy: Clean Coal Technology (Public Law 99-190), $150,000 thousand for 1987; $150,000 thousand for 1988.
  Corporation for Public Broadcasting: $200,000 thousand for 1987; $214,000 thousand for 1988; $130,000 thousand requested for 1989.

B. Accounts authorized to receive advance appropriations but for which none are requested in the 1987 budget:
  Department of Agriculture:
    Food program administration (42 U.S.C., sec. 1752).
    Food donations program (Public Law 93-29, sec. 209).
    Child nutrition programs (42 U.S.C., sec. 1752).
  Department of Education. The following activities are authorized to receive advance appropriations (20 U.S.C. 1223 and 29 U.S.C. 703): [2]
    Compensatory education for the disadvantaged.
    Impact aid.
    Special programs.
    Indian education.
    Bilingual education.
    Immigrant education.
    Education for the handicapped.
    Payments to institutions for the handicapped.
    Rehabilitation services and handicapped research.
    Vocational and adult education.
    Student financial assistance.
    Guaranteed student loans.
    Higher education.
    Higher education facilities loans and insurance.
    College housing loans.
    Howard University.
    Education research and improvement.
    Libraries.
    Education and research overseas (special foreign currency program).
  Department of Health and Human Services:
    Family social services (Public Law 96-272).
    Human development services (Public Law 97-35, sec. 657, Public Law 97-115, sec. 209).

II. Advance funding is authority provided in appropriations acts to obligate and disburse funds during a fiscal year from a succeeding year's appropriation. The funds so obligated increase the budget authority for the fiscal year in which obligated and reduce the budget authority of the succeeding fiscal year. Essentially, this is a device for avoiding supplemental requests late in the fiscal year for certain entitlement programs should the appropriations for the current year prove to be too low. The table below lists those accounts for which advance funding authority is requested in the 1987 budget.

Department of Labor:
  Federal unemployment benefits and allowances.
  Special benefits.
  Black lung disability trust fund.

III. Forward funding is authority provided in an appropriations act to obligate funds in one fiscal year for the financing of ongoing programs of grantees during the succeeding fiscal year. The budget authority for such programs is included in the budget totals for the year in which it is appropriated. This device is often used for education programs, so that grants can be made prior to the start of the school year. The language providing forward funding for education programs will specify that amounts appropriated will not be available until some time into the year of the appropriation (e.g., July 1, 1987) and in most cases will specify that such amounts will remain available until the end of the succeeding fiscal year. The table below lists those accounts for which forward funding is requested in whole or in part in the 1987 budget.

Department of Education:
  Compensatory education for the disadvantaged.
  Special programs.
  Education for the handicapped.
  Vocational and adult education.

In the training and employment area, forward funding is provided in some accounts by providing appropriations for a program year which starts in the fiscal year of the appropriation and extends into the following fiscal year. Program years running from July 1 to June 30 are authorized for training programs under the Job Training Partnership Act, State Employment Service operations under section 6 of the Wagner-Peyser Act, and senior citizen employment programs under Title V of the Older Americans Act. The table below lists those accounts for which such forward funding is requested in the 1987 budget.

---

[1] The accounts listed for the Department of Health and Human Services for which advance appropriations are requested for 1987 also are requesting advance funding (see section II).

[2] These statutes erroneously refer to "advance funding"; advance appropriations is what is described and clearly intended.

Department of Labor:
- Training and employment services.
- Community service employment for older Americans.
- State Unemployment Insurance and Employment Services Operations.

STATEMENT OF AMENDMENTS TO AND REVISIONS IN BUDGET AUTHORITY FOR 1986

(Between the Transmittal of the 1986 and 1987 Budgets)

A statement of all amendments to or revisions in budget authority requested between transmittal of the 1986 budget and the 1987 budget is presented below. This statement is being included in the budget in accord with the Congressional Budget Act of 1974 (31 U.S.C. 1105(d)).

The modifications to requests for 1986 budget authority that were made through the course of the past year took three forms. If the Congress had not yet acted on a pending request, the President sent amendments to the budget requests transmitted in February 1985. If appropriations had been enacted, the President proposed either supplemental budget authority or rescission of enacted appropriations.

Amendments and requests for supplemental appropriations are printed in the documents of the House of Representatives and the Senate that are identified in part A of the following listing. The President's proposals for rescissions are included in special messages to the Congress under the Impoundment Control Act of 1974 (Public Law 93-344). Both the special messages and monthly cumulative reports on the items they cover are printed in the Federal Register.

PART B. REQUESTS FOR RESCISSION OF BUDGET AUTHORITY

There are no rescissions currently pending before the Congress. Rescission proposals associated with the 1987 budget request are shown in Part II of this appendix.

APPROPRIATIONS REQUESTED FOR OFFICES OF INSPECTORS GENERAL

A statement of the amounts of appropriations requested for the Offices of Inspectors General for Federal departments or establishments is provided below. This statement is submitted in accordance with section 201 of the Budget and Accounting Act, 1921, as amended by section 3 of the Federal Managers' Financial Integrity Act of 1982, Public Law No. 97-255. The following table shows the amount of budget authority requested for 1987 for the Offices of Inspectors General.

PART IV

GOVERNMENT-SPONSORED ENTERPRISES

GOVERNMENT-SPONSORED ENTERPRISES

Part IV contains detailed budgets and explanatory statements of certain Government-sponsored enterprises. All of these enterprises were established and chartered by the Federal Government and are sponsored by a Government agency, although they are privately owned and generally privately financed. These budgets are not reviewed by the President; they are presented as submitted by the enterprises. This section includes:

- —The Student Loan Marketing Association (SLMA); a corporation to assist in financing college student loans. It is sponsored by the Department of Education.
- —The Federal National Mortgage Association; a mortgage finance corporation supervised by the Department of Housing and Urban Development.
- —The banks for cooperatives, Federal intermediate credit banks, and Federal land banks, supervised by the Farm Credit Administration.
- —The Federal Home Loan Banks and the Federal Home Loan Mortgage Corporation, supervised by the Federal Home Loan Bank Board.

The Board of Governors of the Federal Reserve System provides calendar year data for its administrative budget for inclusion without further review. The Board's budget schedules and statements are provided here for information.

[1] Amortization of discount on purchased loans

The Student Loan Marketing Association (Sallie Mae), a shareholder-owned corporation, was created by the Education Amendments of 1972 to expand funds available for student loans by providing liquidity to lenders engaged in the guaranteed student loan program (GSLP).

Sallie Mae provides liquidity through direct purchase of insured student loans from eligible lenders and through warehousing advances, which are loans to lenders secured by insured student loans or by Government or agency securities. In capital shortage areas, Sallie Mae is authorized, at the request of appropriate State and Federal officials, to make insured loans directly to students and to advance funds to States that will provide loans to students. Public Law 97-35 authorized Sallie Mae to provide a secondary market for noninsured loans; to serve as a guarantee agency in support of loan availability at the request of the Secretary of Education; to purchase and underwrite student loan revenue bonds; and to provide such additional services as determined by its board of directors to be supportive of the credit needs of students generally.

Sallie Mae is authorized by the Health Professions Educational Assistance Act of 1976 to provide a secondary market for federally insured loans to graduate health professions students.

Between 1980 and 1983, Sallie Mae was also authorized to make direct loans to borrowers for purposes of loan consolidation. Between November 1981 and October 1983, it consolidated 31,805 loans worth $389,668 thousand. On November 1, 1983, the authority to carry out this activity expired.

Operations.—At September 30, 1985, Sallie Mae had $5,100 million outstanding in warehousing advances. It is expected that volume will reach a level of $6,324 million by September 30, 1986, with continued activity in 1987. It is also expected that Sallie Mae will purchase $1,833 million in loans in 1986 and have a net increase of $1,326 million in 1987. At September 30, 1985, Sallie Mae had entered into agreements to purchase during the next 167 months up to $3,765 million in insured student loans if such loans are offered for sale. At September 30, 1986, it is expected that Sallie Mae will have outstanding the same level of such agreements to purchase. At September 30, 1985, Sallie Mae also had outstanding $2,200 million in financing commitments; at September 30, 1986, it is expected to have the same level of commitments outstanding.

The forecast data with respect to operations are based on certain general economic and specific GSLP loan volume assumptions and should not be relied upon as an official forecast of the corporation's future business.

est on such obligations issued prior to October 1, 1985. Under an agreement with the Department of the Treasury reached in early 1981, Sallie Mae began borrowing directly in the private capital markets. Its last borrowing through the FFB occurred in January 1982. Its obligations today have certain characteristics, provided by Charter, which give them "agency" status, but they are not federally insured or guaranteed. As of September 30, 1985, Sallie Mae had outstanding $5,000 million in long-term notes from the Federal Financing Bank, as well as $7,670 million in nonguaranteed obligations. Nonguaranteed obligations included $689 million in discount notes, $2,247 million in short-term debt obligations and $4,733 million in long-term debt obligations.

Management.—At its annual meeting in May 1985, the shareholders of Sallie Mae elected a board of directors to serve until May 1986. The shareholders of Sallie Mae are entitled to elect 14 members to the board. Pursuant to the Education Amendments of 1972, seven public directors are appointed by the President, who also names the chairman from among the 21 members.

The 1987 Budget proposes legislation that would impose on all Government-sponsored enterprises a fee on new securities issued after September 30, 1986. The purpose of this fee is to reimburse the Federal Government for the borrowing advantages these enterprises enjoy as a result of their special relationship with the Government. As part of this proposal, Sallie Mae will be charged a fee on net new securities issuances, defined as:

- —any increase above the level of Sallie Mae securities outstanding on September 30, 1986, plus
- —the lesser of:
  - —Sallie Mae debt issued prior to 1987 rolling over in 1987 and beyond, or
  - —repayments and prepayments of direct loans made prior to 1987.

This fee will begin at .10 percent (10 basis points) in 1987, rising to .125 percent (12.5 basis points) in 1988, and .15 percent (15 basis points) in 1989 and beyond.

The Federal National Mortgage Association (Fannie Mae) is a Government-sponsored private corporation. Its purpose is to provide supplementary assistance to the secondary market for home mortgages by supplying a degree of liquidity for mortgage investments, thereby improving the distribution of investment capital available for home mortgage financing.

Fannie Mae purchases mortgages at market prices pursuant to commitments issued to sellers through a variety of programs. It finances these purchases through the issuance of debt securities. Fannie Mae's debt instruments are characterized as "Agency Issues" in the securities market, but not in the Federal Government's budget.

The common stock of the Corporation is owned by the public, is fully transferable and is listed on major stock exchanges.

The forecast data contained in this material has been developed based on certain general economic assumptions prevalent in October 1985 and should not be construed as an official forecast of the Corporation's position.

The Corporation has three separate authorities to borrow money from private sources. It may issue subordinated obligations. It may, in addition, borrow amounts not in excess of the sum of net equity and subordinated obligations outstanding multiplied by a factor established by the Secretary of Housing and Urban Development. This factor is currently set at 30. These borrowings usually take the form of debentures and short-term discount notes. Finally, Fannie Mae may issue securities guaranteed by the Government National Mortgage Association which are fully backed by pools of mortgages. There is no statutory limitation on the amount of those obligations that may be outstanding.

According to accounting practices for private corporations, the mortgages in the pools of loans supporting the mortgage-backed securities are considered to be owned by the holders of these securities. Consequently, on the books of the Federal National Mortgage Association (Fannie Mae), these mortgages are not considered assets and the securities outstanding are not considered liabilities. However, the concepts of the budget of the U.S. Government consider these mortgages and mortgage-backed securities to be assets and liabilities, respectively, of Fannie Mae. For the purposes of this document, therefore, they are presented as assets and liabilities in the accompanying schedules. On the schedule of Status of direct loans for mortgage-backed securities, the items labeled "New loans" and "Recoveries: Repayments and prepayments" are budgetary terms. However, from the Corporation's perspective, these items are "Amounts issued" and "Amounts passed through to the holders of securities", respectively.

The forecast data contained in this material has been developed based on certain general economic assumptions prevalent in October 1985 and should not be construed as an official forecast of the Corporation's position.

As part of the Government-sponsored enterprise user fee proposal, Fannie Mae will be assessed fees on the sale of mortgage-backed securities. In 1987, Fannie Mae will be charged a fee of .05 percent (5 basis points) on mortgage-backed securities sold after September 30, 1986. In 1988 and beyond, Fannie Mae will be charged a fee of .10 percent (10 basis points) on mortgage-backed securities sold after September 30, 1986. The fee will only apply to mortgages which Fannie Mae had purchased after the effective date of this proposal.

The 13 banks for cooperatives are under the general supervision of the Farm Credit Administration. They finance the operations of farmers' cooperatives. The funds to finance these loans are obtained primarily from sales of bonds to the public and from their own capital funds. The bonds issued by the banks are not guaranteed by the U.S. Government either as to principal or interest. All of their expenses are paid from their own income and are not included in the budget of the United States. Included in these expenses is the banks' share of the costs of the Farm Credit Administration.

BANKS FOR COOPERATIVES—Continued

The Farm Credit Act of 1955 provided for eventual ownership of the banks by farmers' cooperatives and the retirement of the U.S. Government's investment. This was accomplished on December 31, 1968, when the remainder of the U.S. Government capital was retired.

The banks for cooperatives presently operate under authorities contained in title III of the Farm Credit Act of 1971, Public Law 92-180, as amended.

The 1987 Budget proposes legislation that would impose on all Government-sponsored enterprises a fee on new securities issued after September 30, 1986. The purpose of this fee is to reimburse the Federal Government for the borrowing advantages these enterprises enjoy as a result of their special relationship with the Government. As part of this proposal, the Banks for Cooperatives (BC's) will be charged a fee on net new securities issuances, defined as:

—any increase above the level of BC securities outstanding on September 30, 1986, plus

—the lesser of:

 —BC debt issued prior to 1987 rolling over in 1987 and beyond, or

 —repayments and prepayments of loans made prior to 1987.

This fee will begin at .01 percent (1 basis point) in 1987, rising to .05 percent (5 basis points) in 1988, .10 percent (10 basis points) in 1989, .30 percent (30 basis points) in 1990, and .50 percent (50 basis points) in 1991 and beyond.

The 12 Federal intermediate credit banks are under the general supervision of the Farm Credit Administration. They serve as banks of discount for agriculture, discounting agricultural and livestock paper for, and making loans to local financing institutions such as production credit associations, agricultural credit corporations, livestock loan companies, and commercial banks. They also provide the production credit associations with necessary supervision and services.

The banks' lending funds are obtained primarily from the sale of bonds to the public and from their own capital funds. The bonds are not guaranteed by the U.S. Government either as to principal or interest. All of their expenses are paid from their own income and are not included in the budget of the United States. Included in these expenses is the credit banks' share of the costs of the Farm Credit Administration.

The banks were originally wholly owned Government corporations set up exclusively as banks of discount; however, pursuant to the Farm Credit Act of 1956, the banks become mixed-ownership corporations and were made responsible for supervising the production credit associations and assisting them to make sound credit available to farmers.

All of the capital stock of the Federal intermediate credit banks, from organization in 1923 to December 31, 1956, was held by the U.S. Government. The 1956 act provided a long-range plan for the eventual ownership of the credit banks by the production credit associations and the gradual retirement of the Government's investment in the banks. This retirement was accomplished in full on December 31, 1968.

The Federal intermediate credit banks presently operate under authorities contained in title II of the Farm Credit Act of 1971, Public Law 92-181, as amended.

The 1987 Budget proposes legislation that would impose on all Government-sponsored enterprises a fee on new securities issued after September 30, 1986. The purpose of this fee is to reimburse the Federal Government for the borrowing advantages these enterprises enjoy as a result of their special relationship with the Government. This fee will begin at .01 percent (1 basis point) in 1987, rising to .05 percent (5 basis points) in 1988, and .10 percent (10 basis points) in 1989, .30 percent (30 basis points) in 1990, and .50 percent (50 basis points) in 1991 and beyond.

The Federal land banks, through the 438 Federal land bank associations, which are located at the local level, make long-term real estate loans to farmers and ranchers. These banks and associations are under the general supervision of the Farm Credit Administration. The funds to finance these loans are obtained primarily from the sale of the banks' bonds to the public and from their own capital funds. These bonds are not guaranteed by the U.S. Government either as to principal or interest. All of their expenses are paid from their income and are not included in the budget of the United States. Included in these expenses is the land banks' share of the costs of the Farm Credit Administration.

The last of the Government capital that had been invested in the banks was repaid in 1947.

The Federal land banks presently operate under authorities contained in title I of the Farm Credit Act of 1971, Public Law 92-181, as amended.

The 12 Federal Home Loan Banks are chartered and supervised by the Federal Home Loan Bank Board under the authority of the Federal Home Loan Bank Act of 1932. The banks are financial institutions whose main function is to supply their members—principally savings and loan-type institutions and savings banks—with credit to smooth their operations and enhance their service to the public as savings media and home-mortgage lenders. Each bank operates in a geographic district designated by the Board and together the banks cover all of the United States as well as Puerto Rico, the Virgin Islands, and Guam. In 1985, the banks extended credits of $124.9 billion and received repayments of $112.7 billion. Advances outstanding on September 30, 1985, totaled $87 billion.

The principal source of funds for the lending operation is the sale of consolidated obligations of the banks to the public. On September 30, 1985, $73.6 billion of these obligations were outstanding. The consolidated obligations are not guaranteed by the U.S. Government as to principal or interest. Other sources of lendable funds include a portion of members' deposits as determined by Board policy (total deposits were at $18.8 billion on September 30, 1985) and funds paid for the purchase of capital stock by member institutions, amounting to $8.1 billion at the end of 1985. Funds not immediately used for advances to members are invested until such times as needed.

The capital stock of the Federal home loan banks is owned entirely by the members. Initially the U.S. Government purchased stock of the banks in the amount of $125 million. The banks had repurchased the Government's investment in full by mid-1951.

The entire operating expenses of the banks are paid from their own income and are not included in the budget of the United States. Included in these expenses is the assessment by the Federal Home Loan Bank Board to cover a portion of the Board's administrative and other costs.

The 1987 Budget proposes legislation for changing Government-sponsored enterprises a fee on certain securities issued after September 30, 1986. The purpose of this fee is to reimburse the Federal Government for the privileges these enterprises enjoy as a result of their relationship with the Government. As part of this proposal, the Federal home loan banks will be charged a fee on net new securities issuances, defined as:

- —any increase above the level of FHL bank securities outstanding on September 30, 1986, plus
- —the lesser of:
  - —FHL bank debt issued prior to 1987 rolling over in 1987 and beyond, or
  - —repayments and prepayments of advances made prior to 1987.

This fee will begin at .10 percent (10 basis points) in 1987, rising to .125 percent (12.5 basis points) in 1988, and .15 percent (15 basis points) in 1989 and beyond.

The Federal Home Loan Mortgage Corporation (Freddie Mac) is a government-chartered corporation created under the Emergency Home Finance Act of 1970. Congress chartered Freddie Mac to provide mortgage lenders with an organized national secondary market into which they could sell conventional mortgage loans, so lenders can obtain needed funds to meet new demands

for mortgages. Freddie Mac serves as a conduit to facilitate the flow of investment dollars from capital market investors to mortgage lenders, and ultimately to homebuyers in the form of more affordable mortgage credit.

Freddie Mac is a publicly-chartered corporation whose preferred stock is owned by savings institutions across the Nation. Freddie Mac is managed by a Board of Directors, the members of the Federal Home Loan Bank Board, who are appointed by the President with consent of the Senate. All of Freddie Mac's expenses are paid from its own income, and no Federal budget authority or outlays have ever assisted in its mission.

After purchasing mortgage loans from individual mortgage lenders, Freddie Mac groups a portion of the mortgages into pools, that have ranged from as low as $1 million to as high as $914 million, which are sold in the form of conventional mortgage pass-through securities, called Mortgage Participation Certificates (PCs). A PC represents an undivided ownership interest in a pool of residential mortgage loans as purchased by Freddie Mac. The timely payment of interest and full return of principal on the mortgages underlying the PCs is guaranteed solely by Freddie Mac. This guarantee is backed by corporate reserves to cover default losses on individual mortgages and not by the Federal Home Loan Bank System or the full faith and credit of the U.S. Government.

Freddie Mac offers lenders the opportunity to either sell their mortgages for cash or "swap" them for PCs. "Swap" PCs enable lenders to restructure their portfolios by offering these PCs directly to investors, using them as collateral for borrowing or retaining them for sale later. This provides lenders with greater liquidity when the need for more mortgage credit arises. The conventional mortgage PC is one example of how Freddie Mac has perceived a need within the marketplace, committed its resources to identifying the need and developed a mortgage program to meet that need.

Freddie Mac's success as a pathfinder for the mortgage finance industry is evidenced in another development, the Collateralized Mortgage Obligation (CMO), introduced in 1983. The CMO is a bond of several classes secured by a pool of mortgages. The cash flow from the principal payments on the mortgage collateral is directed through a multi-tiered maturity structure—short, intermediate and long—from which investors may choose. The CMO has been successfully replicated by others in the marketplace and, as a result, has provided another restructuring tool for thrifts as well as attracted new investors and capital to mortgage finance. Over 80 percent of the $29.4 billion in CMOs issued since 1983 through September 1985 represent issuances by others in the marketplace besides Freddie Mac.

In 1984, Freddie Mac recognized the increasing popularity of another mortgage instrument when it introduced the first mortgage pass-through security exclusively backed by the 15-year single family mortgage instrument. Freddie Mac has sold over $4.3 billion of this new security since its introduction.

In 1985, the first pass-through security exclusively backed by newly originated multifamily mortgages was introduced to the marketplace by Freddie Mac. The multifamily PC represents Freddie Mac's on-going commitment to providing additional financing for multifamily housing through the sale of multifamily mortgage pass-through securities. The introduction of the multifamily PC also represents the first time a mortgage pass-through security was sold exclusively to international investors.

Another significant development in 1985 occurred when the CMO was offered for the first time on the international market, representing Freddie Mac's commitment to finding new ways to tap capital markets and providing additional mortgage credit to America's homebuying public.

According to accounting practices for private corporations, the mortgages in the pools of loans supporting the mortgage pass-through securities are considered to be owned by the holders of these securities. Consequently, on the books of Freddie Mac, these mortgages are not considered assets and the securities outstanding are not considered liabilities. However, the concepts of the budget of the United States Government consider these mortgages and mortgage pass-through securities to be assets and liabilities, respectively, of Freddie Mac. For the purposes of this document, therefore, they are presented as assets and liabilities in the accompanying

MORTGAGE-BACKED SECURITIES—Continued

schedules. On the Status of Direct Loans schedule for mortgage pass-through securities, the items labeled "New loans" and "Recoveries: Repayments and prepayments" are budgetary terms. However, from Freddie Mac's perspective, these amounts represent "Sales of PCs" and "Amounts passed through to PC holders," respectively.

As part of the Government-sponsored enterprise user fee proposal, Freddie Mac will be assessed fees on the sale of mortgage-backed securities. In 1987, Freddie Mac will be charged a fee of .05 percent (5 basis points) on mortgage-backed securities sold after September 30, 1986. In 1988 and beyond, Freddie Mac will be charged a fee on .10 percent (10 basis points) on mortgaged-backed securities sold after September 30, 1986. The fee will only apply to mortgages which Freddie Mac had purchased after the effective date of this proposal.

The Federal Reserve System operates under the provisions of the Federal Reserve Act of 1913, as amended, and other acts of Congress.

Program.—To carry out its responsibilities under the act, the Board determines general monetary, credit, and operating policies for the System as a whole and formulates the rules and regulations necessary to carry out the purposes of the Federal Reserve Act. The Board's principal duties consist of exerting an influence over credit conditions and supervising the Federal Reserve banks and member banks.

Financing.—Under the provisions of section 10 of the Federal Reserve Act, the Board of Governors levies upon the Federal Reserve banks, in proportion to their capital and surplus, an assessment sufficient to pay its estimated expenses. The Board, under the act, determines and prescribes the manner in which its obligations are incurred and its expenses paid. Funds derived from assessments are deposited in the Federal Reserve Bank of Richmond, and the Act provides that such funds "shall not be construed to be Government funds or appropriated moneys." No Government appropriation is required to support operations of the Board.

The information presented pertains to Board operations only. This information has been prepared in accordance with OMB guidelines; accordingly it may differ from other financial material published by the Board of Governors. Expenditures made on behalf of the Federal Reserve banks for production, issuance, retirement, and shipment of Federal Reserve notes are not included, since they are reimbursed in full by the Federal Reserve banks.
